DOOM 3

Strategy Guide by
Raphael Minchella

Doom 3 continues in the ways of old; it's still a close-quarters first-person shooter, but with a twist of tense darkness and horror. Each level may seem to be a small, complex labyrinth, but the game is actually somewhat linear. There's usually only one true way to advance to the next section, and the path will be pretty well laid out for you. So don't worry about getting lost, backtracking to the beginning or drawing out maps on graph paper; instead, you should be concerned with fighting and staying alive.

A SOLDIER'S GUIDE TO MARS SURVIVAL

After many hours of wandering the dark hallways and blasting demons into oblivion, we've compiled some tips and tricks into a basic field survival manual. Read this manual carefully, soldier—your survival depends on it!

Table of Contents

Chapter 1: Weapons and Ballistics Training—Page 4
This is a basic course on recognizing and properly using all of the weapons that you may come in contact with on your visit To Mars.

Chapter 2: Combat Tactics—Page 6
Combat Tactics are the core focus of this guide and will cover all types of enemy encounters. This chapter will cover such subjects as taking down an enemy efficiently, proper weapon selection and using evasive maneuvers during a fight.

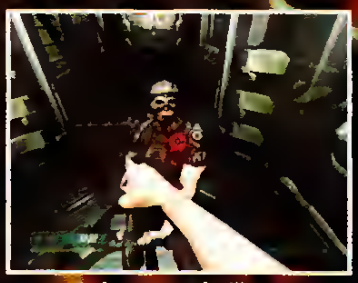

Chapter 3: Survival Tactics—Page 7
Chapter 3 deals with keeping your body in the best of health while traveling through the facility on Mars. Consult Chapter 3 if you are having trouble keeping your armor and health above 50% for a substantial period of time.

Chapter 4: Progression Tactics—Page 8
Lost or having trouble finding your way around? Turn to Chapter 4 for the latest information on helping you navigate your way through the Mars facility. Here you will learn useful techniques that will help you to get from point A to point B.

CHAPTER 1:
WEAPONS AND BALLISTICS TRAINING

This section will break down and rate each weapon in *Doom 3*, along with a short explanation of how it should properly be used. Please take note of each weapon's clip capacity, maximum ammo reserve, damage rating (1 being weakest and 5 being strongest) and range in order to maximize your effectiveness with it.

Fists

Clip Capacity: N/A
Max. Ammo Reserve: N/A
Damage Rating: 1
Range: Very Close

Your fists of fury may have helped to get you through some of the previous *Doom* games, but they will help you little here. When all of your weapons are out of ammunition and you are backed into a corner with Death beckoning you to come hither, you should *still* not use your fists. Why? Because your flashlight can cause twice as much damage and will prove to be a much more useful tool than your bare knuckles.

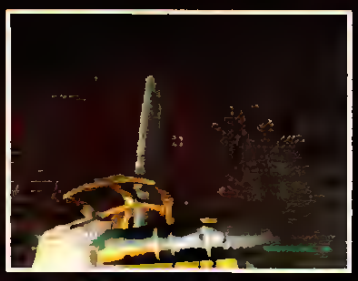

Flashlight

Clip Capacity: N/A
Max. Ammo Reserve: N/A
Damage Rating: 1
Range: Very Close

Obviously, the flashlight is used for lighting up those dark places you fear to explore. But if you happen to bump into a zombie while exploring a dark crevasse and you're stumbling to pull out a weapon, remember that you can use the flashlight to bludgeon your foes as well. The flashlight is surprisingly effective when it comes to taking down certain enemies at close range, so don't hesitate to use it as a weapon when you are in this situation. If you come across a nastier hell-spawn while toting the flashlight, you might want to back off, put down the flashlight and bring out the guns.

Chainsaw

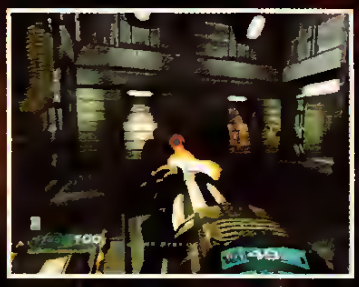

Clip Capacity: N/A
Max. Ammo Reserve: N/A
Damage Rating: 2
Range: Very Close

The chainsaw is the most powerful melee weapon. Unfortunately, by the time you receive it, you will also have a vast assortment of other arms which will make the chainsaw a weapon of last resort. You should only use the chainsaw if all of your weapons are out of ammunition (which should never happen in the first place) or if you feel like portraying a crazed, leather mask-wearing madman from Texas.

Chain Gun

Clip Capacity: 60 bullets
Max. Ammo Reserve: 600 bullets
Damage Rating: 3
Range: Mid to Long

The chain gun is a very powerful weapon with an incredible rate of fire. Once this weapon is fired up, it will mow down most targets within a fraction of a second. The only drawback is that it will not fire instantaneously—once the trigger is pulled, you must wait a second for this weapon to warm up before it starts firing. Because of this, the chain gun is not recommended for close-range combat. When you plan on using the chain gun, make sure that you have ample space between you and your attacker(s), or that you have the opportunity to retreat while the chain gun is still warming up. Despite this flaw, the chain gun is still an extremely useful weapon and should be set up as one of your hot key weapons on the D-pad.

Grenades

Clip Capacity: 1 grenade
Max. Ammo Reserve: 50 grenades
Damage Rating: 4
Range: Mid to Long

These packages of exploding joy cause a tremendous amount of damage. They can be thrown around corners to kill pesky zombie marines who are using cover, or tossed into a room to clear out the unsuspecting enemies within. The only problem with the grenades is that they are very awkward to use; they usually end up causing more harm than good. (I lost count of the number of times I have tried to throw a grenade down a corridor, only to have it bounce off some structure, rebound toward me and blow me to smithereens.) I strongly recommend that you forego the use of these weapons. If you wish to experiment with hurling grenades for positive results, then please save your game before you do so. Trust me when I say that grenades are not all they're cracked up to be.

Shotgun

Clip Capacity: 8 shells
Max. Ammo Reserve: 320 shells
Damage Rating: 3
Range: Close

The shotgun is one of your four bread-and-butter weapons and should always be accessible when entering new areas. Most marines have named the shotgun as their favorite weapon, since it is the most effective firearm for fighting enemies that are too close for comfort. A point-blank shotgun blast will usually level a demon with pull of the trigger, just be sure the shot is accurate, since the reload time is rather slow. If there's some distance between you and the enemy, a shotgun blast will not be as effective due to the loss of power from the shot traveling distances greater than 15 yards. The shotgun should be assigned to one of the D-pad directions as a "hot key" weapon.

Pistol

Clip Capacity: 12 bullets
Max. Ammo Reserve: 360 bullets
Damage Rating: 1
Range: Close

This will be the first firearm you will receive when you venture into the Mars Research Facility. The pistol doesn't really pack a fierce punch, but it will be good enough to get you through some areas and help you retrieve your next firearm. Once you do get your hands on the shotgun or machine gun, you should holster your pistol and only use it when you start running low on shotgun/machine gun ammo. The pistol's main role for the rest of the game should be as a back-up weapon when all of your main firearms (shotgun, machine gun, chain gun and plasma rifle) are extremely low on reserve ammo.

Machine Gun

Clip Capacity: 60 bullets
Max. Ammo Reserve: 600 bullets
Damage Rating: 2
Range: All

The machine gun is another weapon that should always be assigned to a D-pad hot key for quick selection when entering a new area. Machine gun slugs aren't very powerful, but they are very accurate and have a high rate of fire. Enemies that seem to be too far away for an effective shotgun blast will usually fall under a hail of machine gun fire. The best use for the machine gun is to train it on zombie marines who are firing at you; its accuracy and high rate of fire will take down the gunmen before you lose too much health.

Plasma Rifle

Clip Capacity: 50 plasma shots
Max. Ammo Reserve: 500 plasma shots
Damage Rating: 3
Range: All

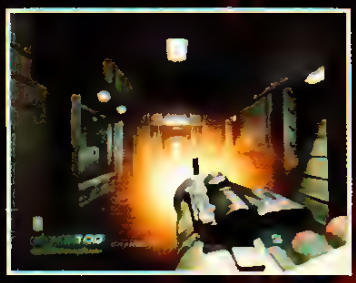

The last of your four most important weapons, the plasma rifle could be classified as the best all-around rifle for several reasons. It inflicts good damage, has a high rate of fire with a large clip capacity and is the best gun to use when shooting and prematurely destroying enemy fire in midair (such as the Revenant's missiles or Sabaoth's BFG blasts). Use the plasma rifle in rotation with your other hot key weapons, particularly against Revenants so you have a greater chance of destroying their missiles before they make "airmeat" out of you. The plasma rifle should also be set up as one of your hot key weapons on the D-pad.

continued

Rocket Launcher

Clip Capacity: 5 rockets
Max. Ammo Reserve: 95 rockets
Damage Rating: 4
Range: Mid to Long

The rocket launcher is a devastating, highly-damaging weapon that should be handled with the utmost care. Use this weapon when you are facing a powerful foe or if you are in a room with multiple enemies at a safe distance. The rockets from the rocket launcher will detonate on impact, causing a large amount of damage to the target and a considerable amount of "splash" damage to the surrounding parties. Due to the fact that the splash can also damage yourself, the rocket launcher is not recommended for targets at close range.

BFG

Clip Capacity: 4 blasts
Max. Ammo Reserve: 32 blasts
Damage Rating: 5
Range: Mid to Long

The Big Freakin' Gun is the most superior handheld weapon developed by UAC and is a certified demon eliminator. The BFG shot can be charged for a more powerful blast, but be aware that overcharging this weapon may cause the BFG to malfunction. This will be your "oh, crap!" blaster if you happen to reach a point where you constantly die, or if you ever come across a vile demon that seems to be too strong for your other weapons. Try not to overuse the BFG, extra ammunition for this weapon is scarce.

Soulcube

Clip Capacity: 1
Max. Ammo Reserve: 0
Damage Rating: 5
Range: All

To charge up the Soulcube, you must kill five demons when the Soulcube is in your possession. After the fifth death, the Soulcube will be ready to fire. Throw it at the demon you want destroyed, and the Soulcube will drain the life of the demon (killing it instantly) and award the stolen life to you. The Soulcube is best used to eliminate strong enemies or to refill your health when you are dangerously low. It is also the only weapon that can hurt the final boss, The Cyberdemon.

CHAPTER 2: COMBAT TACTICS

Now that you are familiar with your weapons, it's time to take it up a notch and teach you some advanced military tactics that will help you to achieve victory out on the battlefield. These strategies have been proven time and time again on past missions and will benefit you now on your current tour of duty. Please take the time to review these tips, which have been gathered by our military intelligence.

"Hot Key" Your Important Weapons

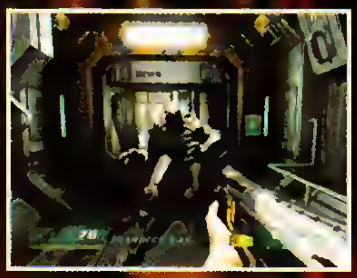

At the Options menu, you can choose four weapons and assign them to directions on the D-pad for quick hot key access in the heat of battle. As explained above, I strongly suggest that you configure the shotgun, machine gun, plasma rifle and chain gun as your hot key weapons. These are the most used weapons in the game, and will provide a vast range of firepower that will help you in almost any situation.

Reload When Not in Combat

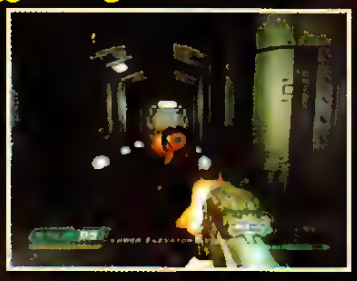

When engaging enemy after enemy, you will sometimes get caught up in the heat of the battle and lose track of how much ammo your current weapon has. This could lead to an unexpected confrontation where you are faced with a group of vile demons and no ammo in the chamber. We have had dozens of marines fall in battle because of this and we do not want another incident to occur. That is why we have made it standard operating procedure to always reload your weapon when not in combat, or immediately after an encounter. This task might seem tedious at first, but after some training, you will soon find it as automatic as breathing.

Aim for Center Mass

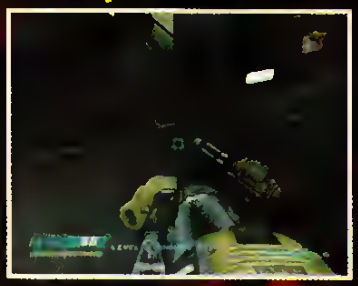

Many of you veteran marines have learned from your previous experiences that the typical weak spot for any enemy is the head. This is not the case for your current mission. The monsters that you will encounter in this tour of duty will not have any specific location weaknesses of any kind. Therefore, you must retrain yourself and aim for the largest spot on the target to ensure a direct hit. This will most likely be the chest.

Keep a Tight Trigger Finger

When making your way through the Mars Research Facility, you will find that there will not be a huge surplus of ammunition for your arsenal. Because of the scarcity of ammo, it is recommended that you hold your fire until you have conformation that there is an enemy present. Do not shoot wildly at oncoming enemies, do not shoot blindly into dark corners and—most importantly—do not use overpowering weapons on weaker demons. The ammunition for your stronger weapons is in much shorter supply than for your normal weapons. Just remember your training: Do not get rattled, confirm enemy location, take aim and fire. You will find that this will help you to retain more ammo for the more difficult areas in the mission.

Select Appropriate Weapons

The best way to try to figure out the proper weapon you should be using is to recognize the type of ammo that is being dropped in your area. For example, if you are clearing an area and you notice that there is a large amount of shotgun ammo, it would be a good idea to equip your shotgun and go from there. This trend has been observed in previous missions and should be used on your mission throughout Mars.

Rotate Weapons to Maximize Ammo Opportunities

Another good method of keeping your main guns stocked with ammo is called Hot Key Rotation. The way it works is to rotate the use of the hot key guns, and always equip the one with the most ammunition in order to conserve weapons with the least amount of ammo. For instance, if you are using the plasma rifle and notice that you have 100 shots or less remaining, cycle through your bread-and-butter weapons and equip the weapon with the most reserve ammo instead of firing off the last 100 plasma shots (which could be useful later). Many times you will discover ammo for a weapon that's already maxed out with reserve ammo; when this happens, you'll be forced to pass up valuable ammo which could have increased your overall reserves. By keeping your weapons in constant rotation, you can prevent yourself from having to abandon valuable resources.

Keep Moving When in Combat

The best way to avoid getting hit is to always keep in motion during combat; remember, a still target is much easier to hit. If you encounter an enemy in a wide-open room, then it's best to strafe from side to side and in a circular motion (circle strafing) in order to avoid projectile attacks. If you are engaged in a narrow hallway, pull back while keeping your aim on the target to best avoid melee attacks. Remember to use sprinting in conjunction with your evasive maneuvers to cover more ground within a shorter amount of time. Just be sure that you do not advance to the next section of a level while you are moving around to avoid enemy attacks; you could inadvertently trigger more demons to spawn and decrease your odds of survival.

Take Cover When Being Fired Upon

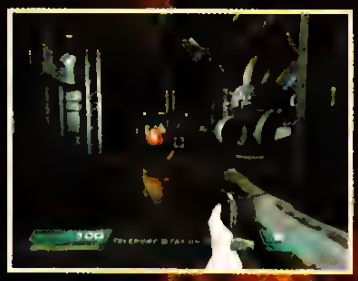

Some enemies, such as marine zombies, will attack you with firearms. If you do not react quickly against these attacks, you could lose your life before you even realize where the shots are coming from. Instead of trying to locate the enemy while being shot at, quickly retreat and take cover behind a wall, pillar or some other similar structure. This way you can scan the area and pinpoint the enemy's location without remaining in an exposed position.

Learn to Aim Around Corners

The safest way to move around corners is to make sure that you are aiming around the corner so you will be lined up and ready for the next possible surprise. To do so, line up and hold your crosshair just beyond the corner of the wall while you are rounding the corner. By doing this, you will be able to clear a path through the next corridor without fear of being flanked by enemies.

Be Patient

Doom 3 does not constantly surround you with monsters the way the first two Doom games did; you won't have to frantically strafe and shoot just to remain alive. By allowing yourself to be patient and deal with the small situations as they come instead of rushing into the fray, you will find that enemy encounters will become much more easy to handle.

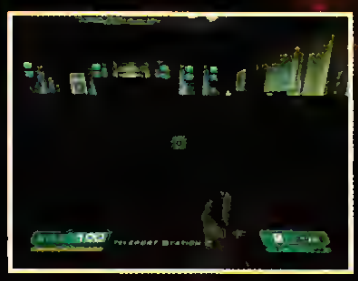

Eliminate All Enemies

Enemies do not respawn in *Doom 3*, so it's a good idea to eliminate every enemy that you encounter. If you do kill all of your enemies, you will always have a safe place where you can retreat if things get too dangerous later on in the level. Remember: The marines take no prisoners!

CHAPTER 3: SURVIVAL TACTICS

Chapter 3 deals with situations for survival in enemy territory when you are not engaged in combat.

Play With the Lights Off

Most of the areas you run into in *Doom 3* are almost completely dark. If you play the game in a well-lit room, you will notice that the TV screen may reflect a large amount of glare that is sure to distract you while playing. To avoid this problem, try to play the game with all of the lights turned off—you will notice a substantial difference in visual quality which may help you to notice details you might otherwise have missed.

continued

Learn to Use Your Flashlight

The Mars Research Facility has had reports of sudden surges of brownouts and blackouts. This is why every marine in the Mars Facility is issued a standard heavy-duty flashlight. Always use your flashlight to guide your way through dark areas of the Mars facility—you could stumble upon much-needed ammo, weapons or health that would normally be passed up if the area was not illuminated. Keep your finger just above that flashlight button to quickly switch weapons, just in case you come across a nasty demon lurking in the shadows.

Don't Waste Health

Health stations can be found throughout the Mars Research Facility. Each health station will have a set amount of health stored in the machine that you can use to replenish your own health. Every time you use a health station, 10 points of health will be transferred from the health station to you. Once you use up the health from a station, it is gone for good, so don't use the health station if your health is greater than 90 points. If you do, you'll be throwing away any points that would put you over 100% health. You can always come back to health stations to use them if there are problems further down the level.

Conserve Med Kits and Armor

Inside the facility, you will find Med Kits (small and large), Security Armor and Armor Shards to help protect you and sustain your health. If you happen to come across a large Med Kit and your health is close to 100%, it would be more beneficial for you to leave the Med Kit behind and come back for it if you happen to get injured later. Don't worry about the Med Kit disappearing; it will always be there and the path to get there will always be clear (as long as you eliminated all of the enemies along the way). The same rules apply to Security Armor. If the armor is not going to be fully used when you pick it up, leave it behind for later use.

Read and Listen to All PDAs

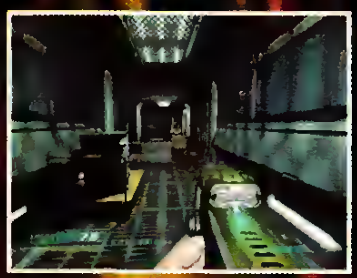

During your travels inside the research facility, you will come across a multitude of other people's PDAs. After reading and listening to several PDAs, you might find yourself becoming tired and bored of sifting through the useless office gossip and complaints just to find useful information. Though it can be a painful process to endure (especially the audio files), you should check out all messages to make sure you did not overlook any vital info. Take note of any three digit numbers you see and hear; these codes will be used for storage lockers or to activate/deactivate machinery which will allow you to advance through the game.

Check the Storage Lockers

Storage lockers can be found in almost every section of the Mars Research Facility. Most storage lockers will contain valuable items such as guns, ammunition, health kits and security armor. Just about every storage locker that you come across will be locked by a three-digit code. Remember, if you find an item that cannot be fully utilized (such as a large med kit when your health is nearly full), it is best to leave the item behind and come back if you happen to run into trouble.

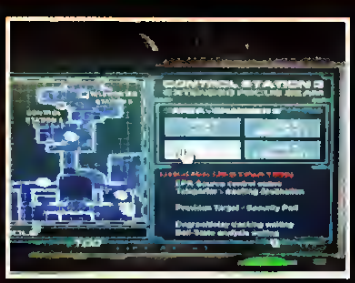

Watch for Explosive Barrels

Scattered around the rooms of the facility, you will find sealed yellow barrels filled with volatile toxic waste. If these barrels are disturbed by gunfire, it could trigger an explosion that will severely injure anything within its radius. You could wait to shoot these barrels to blow up demons if they happen to wander too close to a barrel, but by doing so, you could put yourself in grave danger. It's safer to shoot the barrels as soon as you see them, just in case a firefight happens to break out near that area. By following this procedure, you will prevent all accidental deaths from such explosions.

CHAPTER 4: PROGRESSION TACTICS

By now you should be a professional weapons handler as well as a close- and long-range combat expert who can survive the deadliest of conditions. But what good is fighting and surviving if you cannot progress through the game? In this chapter, you will learn tips from marines who have been formerly stationed at the Mars Research Facility that will help guide you through the dark, lifeless hallways of the MRF if you get lost while on your run.

Look for Interactive Screens

The entire lock and key system of *Doom 3* is based on PDAs and interactive computer screens. You should make it a habit to look at every computer screen and monitor to see if you can interact with it. (i.e. turn machinery on/off, open a door, turn on lights etc.). If there is an option to do something from a computer monitor, do it. Every action that is triggered by accessing a computer screen will have a positive effect in the game.

Search for Security PDAs

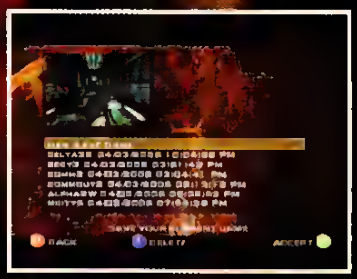

Security PDAs are the true keys to the locked doors that prevent you from advancing to the next area. The locked doors that require PDAs are those that have a security clearance attached to them. If you do not have the proper security clearance when interacting with the door monitor, the door monitor will show you the PDAs that will have the proper security level to open that particular door. Not all PDAs have a security upgrade, but you will be notified if you do find one that does upgrade your security status. You can typically find PDAs resting on personal/security U-shaped desks, or close to corpses that you come across. Use your flashlight to brighten up inconspicuous corners of a room where secret PDAs might be hidden.

Recognize When You Are Alone

After traversing the Mars underground for a short while, rooms and corridors will start to look very similar. This can sometimes cause you to become disoriented and lose your sense of direction. Don't be ashamed; it happens to the best of marines. If you find yourself aimlessly wandering around the facility, not knowing where to go to advance to the next area, just remember that demons only show up in places that you have not yet explored. If you are walking into rooms and you find that you have not encountered an enemy for quite some time, then there's a good chance that you are not moving in the right direction. If you move from room to room and you are constantly fighting demons, then you're probably going the right way. Try not to worry about the complexity of any given stage; there is only one way out of every level.

Save Often

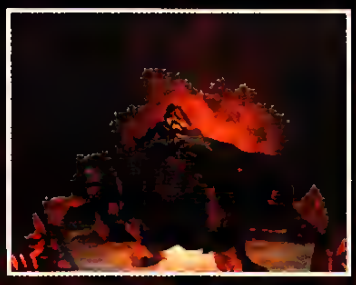

To keep yourself from constantly redoing difficult levels over and over again, it is strongly recommended that you save your progress often. There are two ways to save. If you choose the save option from within the pause menu, you'll be able to save at multiple positions throughout the game. The second type of save is the quick save feature that is activated by hitting the BACK button on the controller. Note that you can only have one quick save at any time; each time you hit the quick save button, it will automatically overwrite your previous quick save position. I recommend using the pause menu to save after every level you complete, and using the quick save feature for incrementally progressing through the current level. Be careful not to save your game when you are running low on health. If you do so and your next fight is a difficult one, you could inadvertently get yourself stuck in an impossible "loop," since you will always restart from that save with a low amount of health and no way to recharge yourself.

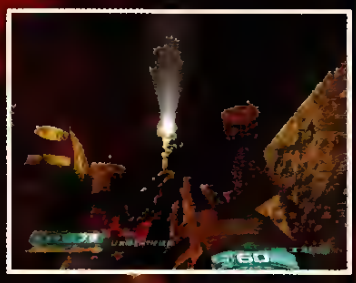

BOSS BATTLES

You will encounter three "boss" characters during your mission. Your performance in these battles will prove whether or not you have been studying your field manual.

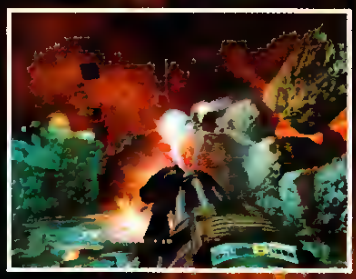

BOSS: Guardian

You will meet the Guardian in Hell—which is actually a good thing, since being in Hell grants you unlimited sprint ability which you will need to survive. Your weapons cannot hurt the Guardian, so don't bother trying to unload on him. The guardian's weak spot is a blue orb that hovers above his head, but the blue orb doesn't appear until you have destroyed all of the Guardian's Seekers (the flying robots with headlights).

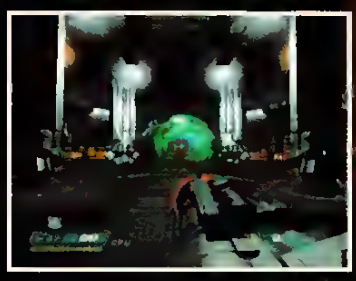

Make use of your unlimited sprint and run around one of the four pillars to keep your distance from the Guardian. While doing this, target and destroy the Seekers, preferably with your chain gun (your machine gun or plasma rifle will also do).

Once the Seekers are destroyed, the blue orb will appear above the Guardian's head. Take aim and unload on the blue orb until it disappears and more Seekers are respawned. Repeat this process a few times and the Guardian will hit the floor faster than a ton of bricks.

BOSS: Sabaoth

Your battle with Sabaoth will be very tough. He is armed with a BFG that can melt you in one shot, there are electrical pillars that can shock you into a fried corpse and the edges of the fighting arena will drop into a bottomless lava pit! However, if you follow these steps exactly, you will kill Sabaoth in ten seconds flat without much effort at all. The first thing you need to do is to set your hot key weapons to rocket launcher, chain gun and plasma rifle. Next, make sure that the auto-aim option is off. If auto-aim is on, you will find it very difficult to target the BFG blasts since the auto-aim will keep locking onto Sabaoth.

Now equip the rocket launcher and enter the arena. Move into the arena until you see the door ahead of you start to open, then quickly backpedal all the way to the entryway where you came from (you will remain here for the rest of the fight). Aim your rocket launcher at Sabaoth's chest and unload your rockets. Make sure that you aim high enough so that one of your rockets hits the BFG blast and destroys it before it melts you to the wall.

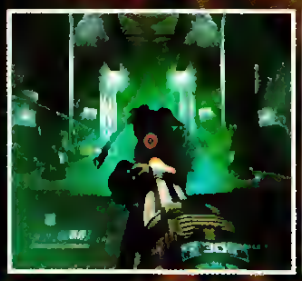

continued

BOSS BATTLES continued

Sabaoth will rush you down and swipe you for some damage, but don't worry—this is the only hit that will damage you. Sabaoth will now move to the right side of the room. This is your cue to switch to your plasma rifle (if you haven't done so already). Shoot Sabaoth's chest with your plasma rifle, making sure you hit the second BFG shot that will occur between the two left pillars.

After you shoot down Sabaoth's second BFG blast, switch to your chain gun. Sabaoth should now be directly in front of you on the other side of the room. Fire up your chain gun and nail Sabaoth's third BFG shot. If you keep plugging away at Sabaoth with the chain gun, he will quickly slump over his treads as a bloody, lifeless corpse. Don't forget to pick up his BFG after you are finished with him!

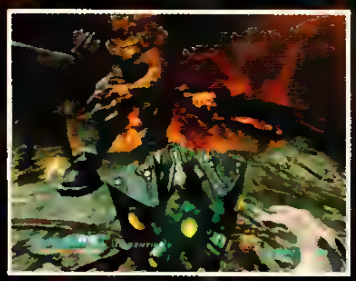

BOSS: Cyberdemon

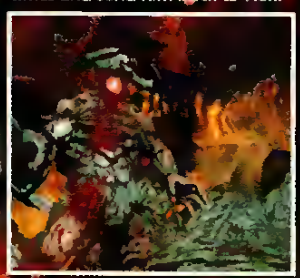

In case you *Doom* fans were missing your old friend the Cyberdemon, he is back and he is *massive* this time around. The Cyberdemon is a very dangerous adversary who can kill you in an instant, but if you keep away from him and use this simple pattern, you will pass this final exam with flying colors.

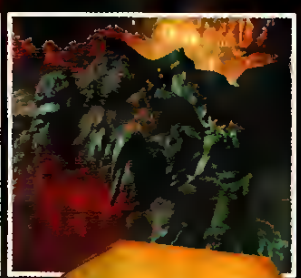

The first thing you need to know is that your ordinary weapons will not hurt the Cyberdemon. The only weapon that can damage him is the Soulcube. What you must do is charge up the Soulcube by killing the lesser demons that linger around the ring of Hell. Run around the circular arena (away from the Cyberdemon, of course) by using your unlimited Sprint ability and kill the Imps and Maggots that cross your path to charge up the weapons.

Once you kill five demons, your Soulcube will be charged. Switch to the Soulcube, turn around to face the Cyberdemon and let the Soulcube fly. After hitting the Cyberdemon with the Soulcube, you'll have to turn around and charge it up again by killing the Imps and Maggots while running from the Cyberdemon. Repeat this pattern to nail the Cyberdemon with the Soulcube four times and send him back to Hell.

CHEAT SHEET

Like naughty schoolchildren who get by with *Cliff's Notes* and answers scrawled on their palms, some marines are not willing to fight their way through *Doom 3* the honorable way. Here are some helpers for the lazy, the unimaginative and the unskilled.

Level Skip—During gameplay, hold **Left Trigger** and press **B, A, X, Y**. This will allow you to automatically pass the level that you are currently on.

Invincibility—During gameplay, hold **Left Trigger** and press **X, Y, B, A**. This will grant you invincibility against every attack in the game.

GOD OF WAR™

STRATEGY GUIDE BY
CHARLOTTE CHEN

Kratos is on a quest for vengeance, and his bloodthirsty nature is complemented by brutal fatality animations where heads are ripped off, knives are plunged into throats and monsters many times larger than him are brought down by a combination of strength and skill. As an action/adventure game based on ancient mythology, everything is on an epic scale, from the storyline to the size of the "boss" characters. The game's combat designer, Derek Daniels of SCEA Santa Monica Studios, was kind enough to answer several interview questions about *God of War*; both the questions and answers are scattered throughout the guide.

COMBOS AND REWARDS

God of War has a very straightforward and open-ended combo system. Basically, any uninterrupted sequence of attacks will start a chain, and any additional attack or chain of attacks will be added to the combo counter as long as it connects within a second or so of your most recent successful attack. The more hits in the combo, the more red orbs you will obtain. Here's a breakdown of the number of orbs you'll receive and the confirmation message that appears at each combo milestone:

Milestone	Bonus	Message
10 hits	+2 orbs	Vicious!
20 hits	+4 orbs	Gory!
30 hits	+6 orbs	Savage!
40 hits	+8 orbs	Inhuman!
50 hits	+10 orbs	Bloodthirsty!
75 hits	+15 orbs	Relentless!
100 hits	+20 orbs	Merciless!
125 hits	+25 orbs	Pitiless!
150 hits	+30 orbs	Monstrous!
175 hits	+35 orbs	Tyrannical!
200 hits	+40 orbs	Immortal!
250 hits	+45 orbs	Ferocious!
300 hits	+50 orbs	Godly!
400 hits	+75 orbs	Omnipotent!
500 hits	+100 orbs	Olympic!
600 hits	+125 orbs	All-Powerful!
700 hits	+150 orbs	Herculean!
800 hits	+200 orbs	Supreme!
900 hits	+250 orbs	Unearthly!
1,000 hits	+300 orbs	Impossible!

In addition, you will receive bonus orbs if you kill an enemy with one of the following techniques while your combo counter is 10 or higher:

Kill Type	Bonus	Message
CS Kill (context-sensitive grab move)	+10 orbs	Ruthless Kill!
MG Kill (mini-game move)	+20 orbs	Brutal Kill!
Decap Kill (Blade of Artemis move)	+5 orbs	Mutilation!
Shatter Kill (grounded statue smash)	+15 orbs	Crushed!
Air Shatter Kill (falling statue smash)	+30 orbs	Ruined!

WALKTHROUGH

SHIPS

Kill all the hydras until one breaks a hole in the deck. Dive in and swim along the left to reach the netting. Cross the beams between ships.

Use the small box to jump up to the archers' ledge.

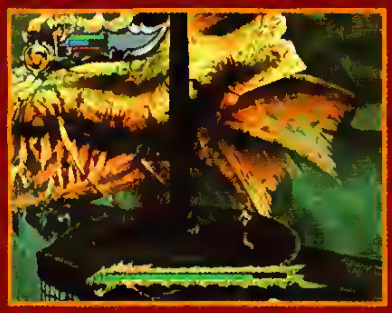

Pulling soldiers off the netting by grabbing them is the fastest way to get rid of them. Zeus gives you Poseidon's Rage, a useful area-attack spell.

©2005 Sony Computer Entertainment America Inc.

BOSS: HYDRA

Disable the two side heads first. When they fall over, you can climb the boxes on each side and jump onto the platform to spike their heads into the deck. Climb up and use the evade roll to dodge the main head's bites. Attack until the mini-game activates. Repeat until Kratos finally spikes the last head.

Walk into the mouth and get the key. Go back and open the big door with the wheel on it.

This section contains the "sex mini-game." Jump on the bed to start it. Perform well and you're rewarded with lots of red orbs. Each subsequent time you only get five red orbs.

DESIGNER Q&A

Q: The sex mini-game is probably the most controversial element of the game. Was it more difficult to get this approved than the violence?

A: Nothing is shown on screen; everything is implied, from the vase rocking, camera shaking, sound, etc. The violence, on the other hand, is very over-the-top—blood everywhere, in-your-face type of violence—so we had more of a problem with that.

GATES OF ATHENS

Kill the minotaurs, then take the elevator up to the third level. In the courtyard, you'll fight your first cyclops.

DESIGNER Q&A

Q: Which enemies did you enjoy creating the most? What are the best ways to defeat some of them? Were there any mythological beasts you wanted to include, but weren't able to?

A: The Cyclops was a big favorite here, as we really wanted to get across that feeling of a big, menacing creature. When you fight your first Cyclops, you are just like, "Wow, this guy is really awesome and hard!" Then after killing him, we drop in two more! Then we get to mix him into the other fights. While three skeletons aren't that hard to fight, you add in a Cyclops and it completely changes the dynamic of that fight scenario. The best way to fight against the first Cyclops you encounter is to attack him until you see him pull back for his ball attack. Roll out of the way, then continue attacking him. Once the O icon appears, combo into the mini-game. If done perfectly, you can keep the combo going from the dead Cyclops into the other, so you can full combo all three.

There were some creatures that we wanted to do, but some got cut. I don't want to give too much away because we might revisit some of these ideas if we ever do a sequel.

In the next room, break the wooden crates to lower the concrete blocks.

BOSS: MEDUSA

Roll to dodge Medusa's gaze. Block her strikes. Don't jump or you might get stoned in midair and shatter when you fall. After you rip off her head, a group of minotaurs will attack you. Stone them all and break them.

Use the crossbow to break the wooden door. The ladder going down leads to a Gorgon Eye. Take the ladder going up and climb the walls. Push the statue over and use it to climb up. Shoot the rope and use it to get across. Open the metal door, then use the crossbow to shoot the door that enemies are pounding on. Use the crossbow to shoot the minotaurs.

ROAD TO ATHENS

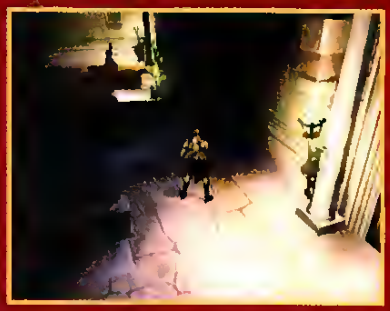

Go west, and you'll get trapped in a cave.

There is a chest in the corner that refills your magic. Stone one of the minotaurs while it's standing on top of the button. Roll forward to quickly get past the gate before the minotaur recovers.

In the town square, kill all the cyclopes. Kill civilians for health.

Follow the woman to get a key. Use the Plume of Prometheus combo to break the magic shields. When you get to the outer balcony again, jump to the right and use the key on the hatch.

ROOFTOPS OF ATHENS

Push the crossbow into the room on the left. Open a door on the left to find a lever. Push the crossbow on the turnstile and pull the lever. Pull the crossbow off and pull the lever again. Push the crossbow on and pull the lever a third time. Shoot the door.

Kill the archers on the roof. Go back to the room with the save point and climb the ladder. Kill the civilian who won't let go of the lever.

TEMPLE OF THE ORACLE

Grab the two statues in the back of the room and use them to block the holes the harpies are coming out of.

Go upstairs and walk along the rafters. Eventually you'll see the Oracle. Push the two large statues to the bottom level so that one falls directly on top of the other and they form a tall pillar. Go down and push them to the side until you see a small pool with a square-shaped indent in the side. Push them into the space. Use the structures to reach the vines on the wall. Don't jump when the wheels are moving or you'll get knocked down. When you reach the Oracle, she unlocks the door to the desert for you.

THE SEWERS OF ATHENS

Kill all the enemies. You emerge on the road to Athens again; head east this time.

DESERT OF LOST SOULS

Walk along the eastern perimeter of the desert until you reach a temple door.

The first siren is near the entrance. Kill her, then go hunting in the northern and southern sections of the central area to find the last two. The remaining sirens both have two minotaur guards. The sound of singing gets louder as you get closer to the sirens.

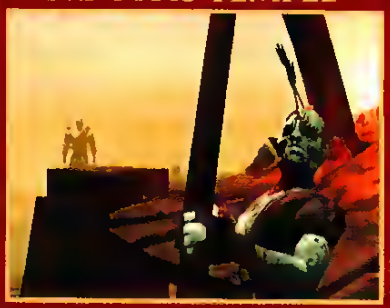

In the small temple, use the block behind the door and push it up the conveyor belt until you can use it to jump up. Prop it against the pillars as you fight enemies. Blow the horns to clear a path.

BOSS: SIRENS

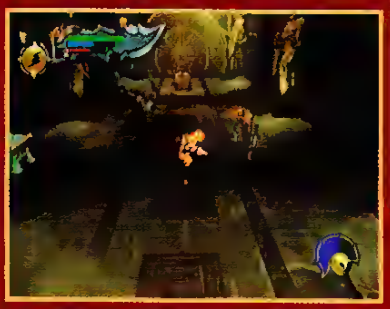

Use Poseidon's Rage to hit a lot of them at once. After they're all gone, blow the last horn.

PANDORA'S TEMPLE

Go left and follow the small path down until it wraps all the way to the right. Pull out the steps using the handle, then jump up before they retract. Speak to the gatekeeper.

Kill the cyclops, then go inside. Kill the enemies, then read the book. Press R2 while near the circular door.

The Rings of Pandora

Run around the circumference until you come to a doorway leading down a hallway with slamming spiked walls. At the end of the hall is a lever you can pull to bring a turnstile down in the outer ring. When you rotate the turnstile, the outer wall moves, and you can pull up new doorways. The first leads to a mural missing two Muse Keys. The second leads to a room with Artemis, who gives you the Blade of Artemis. Go into the room behind her.

The Challenge of Atlas

Kill the enemies on the ground floor, then kill the archers. Pull the lever to lower a rope. Climb down and get across the gap. Pick up the Shield of Hades, and the wall to the left will start moving. Kill the enemies before you are crushed. Climb back up.

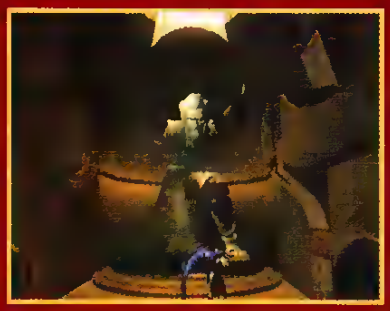

Drag the box of rocks to the room with the floor switch. Drag it to the other side of the room, kick it onto the button and do a quick roll onto the turning platform so it spins around while you're on it. Climb up the ladder and get the Shield of Zeus. Drop down and put the two shields in the door.

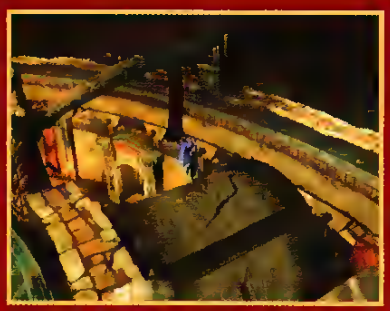

Ignore the saw blades room for now, and go through the door on the right. Break the wall and get on the conveyor belt. Climb up the wall until you reach a small room on the upper left. You have to kill

all the enemies within a time limit or the floor falls and you all die. Upgrade Poseidon's Rage if you haven't done it yet Use Plume of Prometheus to break the magic shields or the soldiers holding them won't take damage. Get the Handle of Atlas and climb the chain back down.

Go back to the room with the saw blades. Pull the two levers quickly, then roll through the doorway before the bars fall. Inch along the side, then use the handle on the crank near the Atlas statue. Kill the enemies, then turn the crank until Atlas raises the sphere over his head. Go upstairs and pull the lever. Open the coffin and rip off the skull. A ladder is underneath the coffin. Go back to the outer ring of the Rings of Pandora, and use the skull inside the door with the large skull icon. You can enter the second outermost ring.

A metal cylinder is rolling in the hall. Wait in the doorway for it to pass, then follow it until you reach a set of stairs. Climb up and then jump on the cylinder. Walk in the opposite direction of its roll until you get near a ladder you can jump onto.

The Challenge of Poseidon
Boss: Cerberus

The full-grown cerberus is easy to kill using Medusa's Gaze. Do not ignore the puppies, since they'll eventually grow to full size. Use combo attacks on the puppies, or Poseidon's Rage if you have enough magic.

Pull the lever to rotate the room. You can get the red orbs, but you'll have to quickly roll backward before the spikes kill you. Go out the door to another cliffside. Climb up and inch to the right to reach the first Muse Key. Inch back to the left until you reach a room with soldiers in hanging cages. Walk up the ramp to the small room and pick up the handle. Take it back to the crank near the caged soldiers. Lower a soldier, then push him up the ramp. Prop him against the rubble when you need to fight. The enemies never stop respawning, so push him up whenever you get a chance. Once you get him in the last room, place him on the floor switch so the burners move into place. Pull the lever.

Designer Q&A

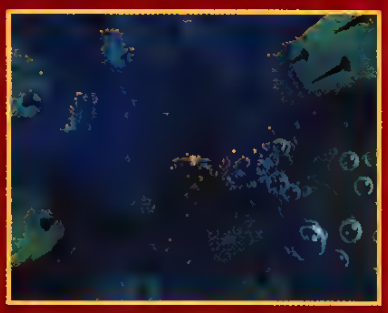

Q: The live human sacrifice element of this puzzle was incredibly disturbing. Was this just to shock the player, or to help flesh out Kratos' character for the story?

A: A little bit of both. We wanted to create a puzzle that was not only unique, but something that people would remember 10 years from now—one of those key moments that we all talk about when we discuss games we have played over those years. Sort of like when you talk about your childhood movies; everyone always remembers the same part and screams it out at the same time.

We wanted to show how Kratos is willing to get the job done, no matter what. We have the dead guy lying on the wall next to the level with the note saying how he just could not do it. We have the guy in the cage screaming, "No—not that room!" because he knows what is about to come. Then we have Kratos who knows that for him to obtain his goal, Pandora's Box, he must do what the other guy could not do and what the man in the cage does not want to happen. The whole thing plays itself out wonderfully, with the puzzle of getting the cage up to the top, the satisfaction of pulling the lever, the music, the sounds, etc.

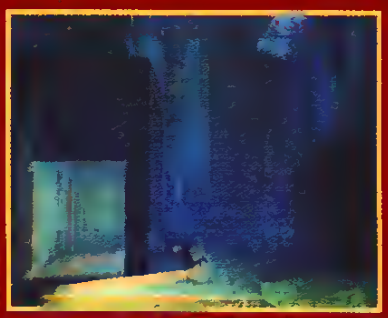

Take Poseidon's Trident from the crystal. Dive into the water on the right, and swim into the tunnel under the surface. You emerge in a cave full of puppies. Open the door and pull the lever to reveal stairs in the first room. Go back, climb the stairs, follow the tunnel and dive in the water.

Dive into the area below the nyad. A large door with a picture of Poseidon blocks the way forward. Swim right and break the cracked nyad carving. The nyad behind will give you a Phoenix Feather if you kiss her (press ○). Swim to the left and surface in a room full of enemies. Break the wall in the back and you'll find a lot of urns, and also the second Muse Key. Go back into the water and swim to the right until you see a doorway that doubles as the mouth of a face carving. Dash through to the other side. Defeat all the enemies in the courtyard. Pull the lever, and the Poseidon door will open.

Swim through the new opening. At the statue, dive until you see a chain pulling a barrier. Dive and dash, then quickly dive again into a safe area in the ground to let the barrier pass over you. The second leg requires you to dash three times before you reach the next safe spot. If you make it there, the last one is an easy short burst to safety.

In this next room, large pillars rise when you pull the lever. Dive into the water on the left and swim to the back. Dive to the bottom of the tallest pillar and you'll see a hidden room. Swim inside and it will bring you down to a new level. Swim along the tunnel and you'll be back in the Rings of Pandora.

Go to the large pool of water in the center. Dive into the underwater tunnel and you'll emerge in a huge cavern. Break the rocks in the doorway on the right to be faced with a new challenge.

The Challenge of Hades

Look at the wooden door on the left and accept the challenge. Kill four centaurs inside each circle. Using a grab move to throw them inside helps a bit.

Watch the movement of the floor panels so you don't fall in the lava. Kill the enemies on the lower floor, then use the turnstile to rise one level. Kill the enemies in the area, then go to where the stone is hitting the wall. Wait for it to hit, then follow it and jump on top. Notice the doorway on the right, near the end. Get inside and kill the remaining enemies. The floor switch will raise a huge statue from the water. Dive into the water and pull the lever inside the statue. Turn the statue so the light shines into the dark doorway.

Boulders are rolling down the ramp. Avoid them as you run to the room in the back of the ramp. It has a clue telling you that one of the side doors is an exit. Walk back to the ramp and stay on the right (moving with the boulder traffic). Walk down until you reach the third door. This is the one you want to open. Move along the path, killing enemies, until you reach a save point.

Spinning blades try to knock you off narrow beams. Double-jump straight up to avoid them. Turn the wheel in the red door and you'll loosen the bolts on the gigantic door in the huge cavern where you first entered. Go back there and approach the door.

Boss: Giant Minotaur

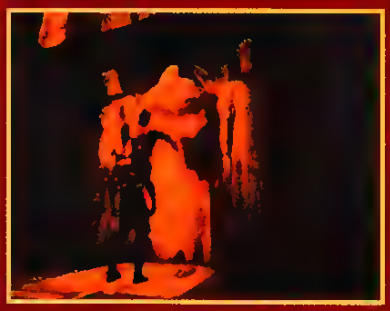

Climb the platform in the back. You can block every attack except the one where he tries to grab you, or slams the ground to cause an earthquake. Double-jump up and to the side when he tries to grab you, and whenever he's about to slam the ground. When he gets stunned, he gets knocked backward and a ○ icon appears over his head. When this happens, start running toward the back immediately, or you won't get there in time to start the mini-game. If you do the mini-game correctly, he'll be stunned, so return to the platform, pull the lever and shoot the fireball. Do this until his armor breaks. Deplete his health meter until he's stunned again. Shoot him one last time.

DESIGNER Q&A

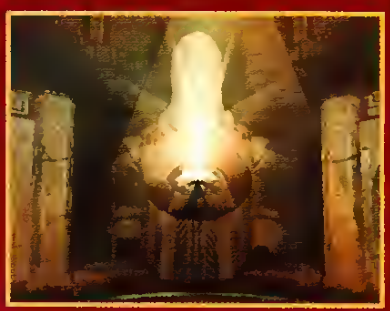

Q: *The mini-games are an interesting gameplay mechanic that make the combat feel "up-close and personal." Were they a feature of the game from the very beginning?*

A: The idea of performing a throw with a big enemy and doing something spectacular was an idea from the very beginning. It went through various forms. Some were too complex in nature and ultimately not as much fun. As the character and story developed, we knew we wanted to make Kratos brutal, and the throw sequences lend themselves naturally to that.

Go through hole in the big door. Open the coffin and rip off the skull. Back downstairs, Hades will give you the Army of Hades. Kill everyone, then leave. Swim back to the Rings of Pandora. Use the skull key in the underwater door with the skull icon and the water will drain. Go to the outermost ring and use the turnstile to rotate it so the open doorway leads to the room with the Muse carvings. Read the book, then stand in the sands to power up.

Rotate the outer ring again so the open doorway leads to the room with the giant eyeball. Turn the other rings so all the doors line up, allowing the light from the eyeball to strike the gem in the statue in the inner chamber. Take the elevator in the statue to the upper floors.

Satyrs appear. A purple streak shows when they're about to attack. Block or evade, then counter using Apollo's Ascension to knock them into the air.

CLIFFS OF MADNESS

Climb down the rope, then take the turnstile elevator up. There are two paths: a ladder leading up and a path to the right from the rocks.

Take the ladder to reach a cave on the upper right. There are two half-bridges controlled by turnstiles. Turn them so they overshoot each other and you have time to jump before they wind back. Outside, there's a mechanism with two statue heads of Hera and Aphrodite. Go into the cave behind it and dive in the pool to get some red orbs. Go back to the head statues and take the ladder down. Slide down the rope. Kill all the enemies in the cave. Push the wooden formations into the wall. A turnstile in the center lets you

rotate the pieces. Ignore the smallest block. Take the block that looks like a question mark, and turn it so the lower gap is on the right. Push it into the wall so the metal block that's already there fits into the lower gap. Push the tall straight block into the gap on the right. Turn the block that looks like a "T" so it faces forward, then push it in the space next to the question mark block. Push the block that looks like an upside-down "L" and turn it so the hook points to the right. Push it into the gap on the left. Take the stump that's two blocks tall and push it into the last gap. If the blocks are pushed in all the way, the bars should fall. Take the Necklace of Hera. Climb the ladder and start climbing the walls. Head to the right and down, and eventually you'll see the rope you used earlier below you. Drop down off the wall and go back to the statues to hang the necklace.

Return to the start, and go to the right. Kill all the enemies in the first cave, then use the turnstile to rise a level. This cave contains another puzzle. When you pull the lever, a timer starts. You'll have to push and kick the small block to the other

side of the cave, and use it to jump up to the ledge before time runs out, or you'll get killed. Get the Necklace of Aphrodite. Outside the cave, stand on the rock and the rope will lower you. Go to the cave on the right and retrace your previous steps to return to the statues. Hang the necklace. Use the moving platforms to reach the higher levels.

THE ARCHITECT'S TOMB

Get across the gap and open the door on the right. Kill all the enemies, then climb up the middle ladder. It has a turnstile attached to a crane with a dangling rock. Turn it so the rock is over the cracked ground below. Pull the lever at the end of the crane to drop the rock. Pull it back up, then turn the crane so the rock is over the button on the ground. Drop the rock on it and leave it there. Go down and grab the statue in the far left. Push it into the hole in the ground and on top of the button. Now you just have to stand on the button that was in the beginning of the level, get across the gap and roll through the door before the gate closes again. Rip off the Architect's Skull.

Go downstairs and you'll be trapped in a room with conveyor belts, archers and lots of harpies. Kill all the harpies (use Army of Hades with Rage of the Gods and maxed-out Blades of Chaos) and just keep on moving to avoid being crushed. After you kill all the enemies, go into the room with the three statues and pull open the sphere to reveal Pandora's Box. Bring the box outside.

THE PATH OF HADES

The platform-jumping in this level is hard, so proceed with caution. The first section has rotating horizontal pillars covered with spikes. In the second part, Kratos must make careful jumps while being shot at by archers with exploding arrows. The third section features two very tall, rotating vertical pillars covered in spikes; you'll be knocked to the ground if you take any damage at all. While climbing up these pillars, you sometimes have to climb back down or sideways to avoid spikes, so be careful. Near the very top, just jump up to grab the ledge. Finally, you need to kill the satyrs to make platforms appear. Climb the rope up.

THE TEMPLE OF THE ORACLE (DESTROYED)

Run to the outside and go down the hallway past the wounded Oracle.

BOSS: ARES

Almost all of Ares' attacks can be blocked if you time it right. When he teleports, run around until the four pillars emerge. Jump up when they crash. Use Army of Hades and regular attacks to knock out health and magic. If you have maxed out your Blades of Chaos, you'll have unlimited magic when you activate Rage of the Gods. When his health meter runs out, the mini-game starts. Win the shoving match and Kratos will jump on his head to continue the mini-game.

Next, you'll fight an army of clones while protecting Kratos' family. Press ○ while near his wife and child and he'll transfer his health to them. Stick to using Army of Hades while using Rage of the Gods. Keep up the regular attacks also. This fight takes a long time. At the halfway mark, the clones switch to using the Blade of Artemis. Stay near your family, because the edges of the platform will fall off near the beginning. Try to knock or throw a lot of clones off the edges.

In the third part of the boss battle, your old weapons and magic are gone; all you have is the Blade of the Gods. This is a 3-D fight with you and Ares sharing a health meter. When he takes damage, your health is refilled, and vice versa. You can only attack him right after he roars, which usually happens right after he performs a combo. It's a pretty short window of opportunity, so forgo the combo attacks (they're too slow) and hit him with regular and strong attacks. When you parry an attack, you'll play a mini-game where you can stun Ares and take off a lot of his energy if you win.

CHALLENGE OF THE GODS

This set of challenges is unlocked after you beat the game. Get through all of them and you'll unlock special costumes. It isn't possible to save during the challenges, so once you get started, you shouldn't stop (or at least you shouldn't turn off the PS2).

1. Force the soldiers near the pit by trying to grab them. You can't get hold because of their shields, but you can force them backward, and they'll eventually fall in.

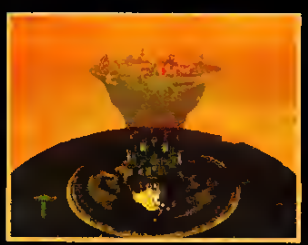

2. Kill all the enemies before the time runs out. On the small platforms, use Hermes' Rush (R1) to plow over the archers so you don't waste time with them. When you get to the larger ones, the soldiers should get close enough for you to take out a lot of them using a midair Lance of the Furies (L1 + ○.)

3. This is an easy challenge where you have to break all the pots in a limited amount of time.

4. Kill the minotaurs at your leisure. There's no time limit in this challenge.

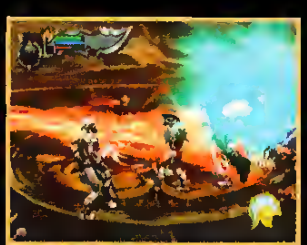

5. The undead soldiers and humans are all walking in a circle. As you pull back on the crossbow, the arrow will release automatically when it's completely taut. Wait until a soldier is at the one o'clock mark before you start to pull back.

6. Try to jump to the platforms so it's easy to make it to the next moving one without needing to wait. Also, get rid of the early archers by using ○ + △ to rip them in half quickly. The end platforms are moving a bit faster than the others.

7. Use various long-reaching Hercules combos (Spirit of Hercules, Valor of Hercules or Might of Hercules).

8. A large number of soldiers and gorgons continually respawn in this arena. Use the fully-charged midair Lance of the Furies (L1 + ○) repeatedly. The gorgons can stone both you and the soldiers, so while evading, try to roll through a group of enemies and get them all stoned. Once all the soldiers are dead, it'll be easier to eliminate the gorgons.

9. Kill all the cyclopes before time runs out. Some satyrs are also attacking you, but you can ignore them. Block or evade their attacks and concentrate on the cyclopes. This level is much easier than the previous one; if you passed Challenge 8, this one should be a breeze.

10. Two satyrs and three cerberus puppies continually respawn on this small platform. Every time you kill an enemy, the platform rises. The idea is to kill enough enemies so that the platform rises high enough for you to double-jump to the next platform above it. Use Apollo's Ascension (L1 + ✕) to knock the satyrs off the edges, and Lance of the Furies (L1 + ○) to do the same to the puppies. Activate Rage of the Gods early on in the challenge to kill a large chunk of enemies. When the final platform is within double-jump range, grab the edge and pull yourself up. This is an incredibly frustrating challenge that will probably take you many tries to pass

DESIGNER Q&A

Q: What are some of your recommended strategies for getting through the harder challenges, like numbers 8 and 10?

A: For Challenge of the Gods 8, kill the Medusas first. The skeletons sometimes release health when they die, so keep them around as long as possible. Throw whenever you can. Kratos cannot be frozen during the throw animations, and skeletons can be thrown into other baddies. Knock guys out of the ring. Charge and use the Lance of the Furies (L1 +) special often. Remember to block. Medusas sometimes dodge your attacks and then immediately counterattack. Block/parry this and counter. Roll like crazy. When Medusas put that beam on you, turn into a somersaulting machine to avoid getting frozen. This challenge is mainly a test of endurance. Don't rush it.

To clear Challenge of the Gods 10, throw the puppies all day long. As counter-intuitive as it seems, try to not block the Satyr attacks; when blocked, they push you back really far. It is better to either get hit or parry. Try to build up Rage of the Gods either during the end of Challenge 8 or 9 so you can use it here.

SPECIAL COSTUMES

When you pass the Challenge of the Gods, you unlock five costumes with special features. (Unfortunately, none of them can be used while playing in God Mode.) Each costume can increase or decrease your power and armor as well as altering the worth of the orbs that you pick up. The following chart shows the multipliers that are applied when you wear each of these costumes

Costume	Power	Armor	Health Orb	Magic Orb	Exp. Orb
Kratos (default)	1.00	1.00	1.00	1.00	1.00
Chef of War	1.00	1.00	1.50	3.00	1.00
Bubbles	0.50	1.00	3.00	1.50	1.00
Tycoonius	2.00	4.00	1.00	1.00	4.00
Dairy Bastard	0.50	1.00	2.00	2.00	2.00
Ares Armor	2.00	0.25	2.00	1.00	2.00

For example. While wearing the Tycoonius costume, your attack power is doubled, you will be four times as resistant to damage and the value of any Experience orbs you pick up will be quadrupled. Note: Dairy Bastard has unlimited Magic!

DESIGNER Q&A

Q: What are some of the team members' favorite special costumes, and why?

A: Everyone on the team really liked the cow costume. The first day he was modeled, we spent 20 or 30 minutes running him through various animations, making him look like he was dancing. He was one of the last characters modeled, so this was about a month before we finished, and it was just the right amount of humor that the team needed. When we were coming up with the various poses for the characters to stand in, a lot of the artists did some fun joke stuff, such as having a Cerberus puppy attached to the udders!

DIFFICULTY MODES

There are four different modes of difficulty: Mortal (Easy), Hero (Normal), Spartan (Hard) and God (Very Hard). God Mode isn't unlocked until you beat the game in one of the easier modes. There are several secrets in the Treasures of Olympus that do not unlock unless you beat the game in God Mode

DESIGNER Q&A

Q: What strategies do you recommend for beating the game in God Mode?

A: Blocking will save your life. Enemies take more damage and have quicker reaction times. Almost every enemy attack can be blocked or parried, and those that can't have a long visual cue so you can roll and dodge. If you see an enemy dodge your attack, then block right away because they will usually follow up with a counter.

Juggling is your friend. When enemies are airborne they cannot attack, so send them to the air when you can. Many air throws can also be juggled, so mix those in your air attacks because they will take more damage.

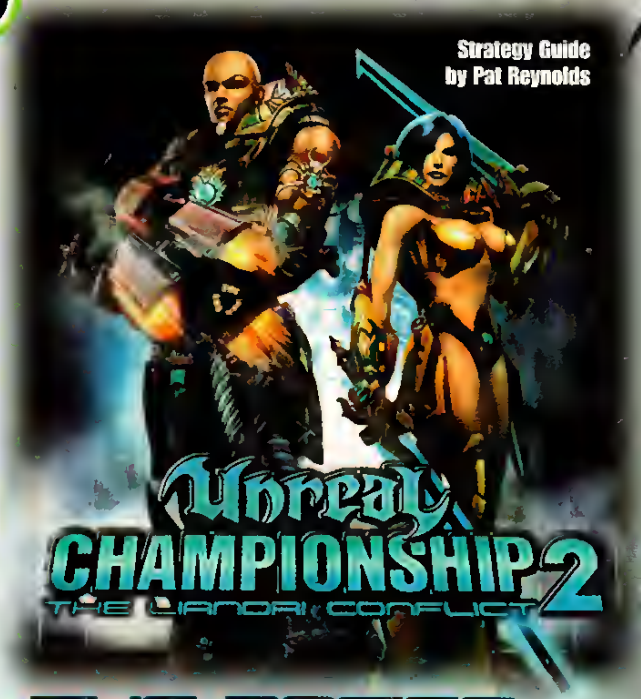

Throw the smaller enemies into other enemies whenever you can. You can clear a room quickly this way, and Kratos is invincible during the throw animation. Also, most enemies don't attack from off-screen. If you are feeling overwhelmed, run away! Get fewer enemies on the screen at once and concentrate on them to improve your chances of success.

Regarding the decision to limit the costumes, we wanted to keep God Mode hard and the costumes give some unfair advantages, such as unlimited magic. God Mode, from the beginning, was always intended and meant for only the hardest of the hardcore!

SECRET MESSAGES (SPOILER AHEAD!)

There are two secret messages in *God of War* which can only be seen by the best players. Secret Message 1 will appear if you beat the game in God Mode. In order to see Secret Message 2, you have to destroy the statues of the Giant Minotaur and Ares that are on either side of the throne that you sit on after you beat the game. It takes a long time to break them, but once you do, some numbers will appear on the screen. It's a telephone number you can call to hear how cool (or how lame) you are.

Unreal Championship 2 brings traditional run-and-gun first-person shooter (FPS) gameplay to the table, but ups the ante with robust melee combat, characters with individual strengths and weaknesses and innovative "adrenaline" abilities that will change the way you think about FPS games. In addition, Midway has stripped the gameplay to the core elements—you won't need to search for weapons during battle; you pick the ones you'll use beforehand and need only find enough ammo to keep them firing. This guide will give you tips for using each of the weapons in the game and getting the most out of the different game types. We'll also give you a look at all of the characters, including their statistics and abilities, which will help you find one that fits your play style, whether it's aggressive or defensive.

THE BASICS

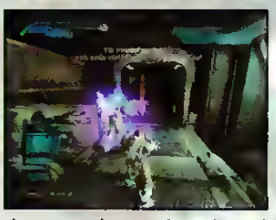

MELEE COMBAT

The biggest addition to standard shooter gameplay in *UC2* is melee weapons. Every character has one, and you don't need to search each stage to figure out how to collect it—you'll have access to your melee weapon from the start of the match. You've got two basic attacks: a fast, combo-based flurry and a slower but more powerful single strike. Use the targeting lock to keep your opponent in your sights and swing away. In addition to the standard strikes, melee weapons can create a shield (by holding both triggers) that will lower damage for a short amount of time. You can also deflect most projectiles back at opponents with expert timing. Slower, larger projectiles like rockets are easier to deflect than quick ones like sniper shots, but with practice you'll be able to send many attacks back to the sender, which will make your opponents think twice about shooting at you.

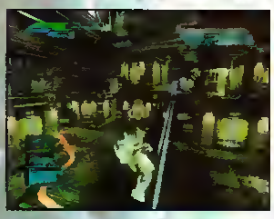

FREEZE AND COUP DE GRACE FINISHERS

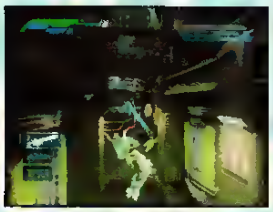

Freezing opponents and then performing a "coup de grace" finishing move is a quick and surefire way to score a kill in *UC2*. To freeze your opponents, hit them with several fast melee strikes...or in the case of most characters, charge up your pistols and stun them briefly with the powered-up shot. A few characters have adrenaline abilities that can freeze opponents as well. Once you have an opponent frozen, you'll need to act quickly. Switch to your melee weapon, target the frozen opponent and an on-screen button combination will appear. Press the sequence of buttons and/or D-pad directions in the correct order and you'll perform an instant kill attack on the target. If you should find yourself on the receiving end of a freeze attack, rotate the analog stick and press buttons to quickly shake it off before your enemy can perform a finisher against you!

JUMPING AND WALL JUMPS

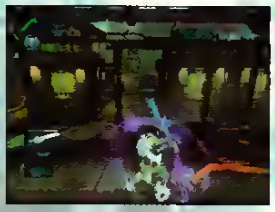

In *UC2*, jumping is a big part of staying alive. Double jumps are standard, and you can change the direction of your second jump to keep opponents guessing. Staying on the ground and running in the same direction is an easy way to get yourself killed quickly. Even if your objective is in a straight line ahead of you, you should always approach it in a zig-zagging, jumping pattern to throw off the aim of anyone who might have you in their sights. In addition to the default double jump, you can also use walls to push off for an additional jump. If two walls are close enough to each other, you can continuously jump between them to reach high platforms or quickly escape from pursuing enemies.

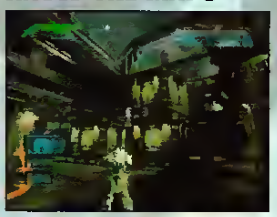

ADRENALINE ABILITIES

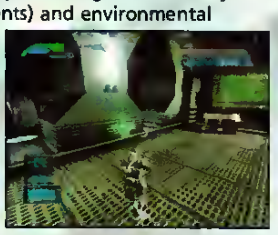

Every character has access to six adrenaline abilities. All characters share two basic adrenaline moves—Nimble and Speed—but also have at least one unique ability as well. Two adrenaline meters below your health bar dictate which abilities you'll be able to access. The more powerful abilities use both meters while the basic ones only require one full meter. Adrenaline fills automatically over time, and you can find pickups in each stage to quickly add to your meters. You'll find more information about each adrenaline ability and its effects in the character section of this guide.

KNOW THE MAPS

The key to doing well against any kind of opponent in a shooter game is to learn each map and be able to quickly get to the pickups you need. Success in shooters is a combination of pure skill (which you'll pick up only with much practice in various game types and against a variety of opponents) and environmental knowledge. If you don't know where to find ammo supplies or health pickups, the best spot for sniper camping or the fastest route between bases in a CTF match, and your opponent does, then you're likely to lose the match no matter how skilled you are. Practice by playing Instant Action games on empty maps; run through the maps, checking each area for pickups and hidden paths. When you play against opponents, you'll be armed with this knowledge and be able to make good use of it to stay one step ahead of those who don't know the battlefield.

WEAPONS

Weapons are broken into three categories—racial, explosive and energy. Each character automatically has his or her own racial weapons (generally twin handgun-types) equipped and loaded up with infinite ammunition, although there's a lengthy reload time between clips. In addition to these weapons, you can choose one explosive and one energy weapon before entering the arena. You'll have these weapons for the duration of combat, but unless the particular matchup you're playing says otherwise, you begin without ammo for these two weapons. You'll need to collect ammunition for them before you can actually start using them.

EXPLOSIVE AMMO-TYPE

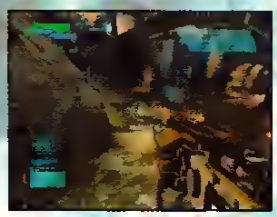

Weapons that fire explosive ammo tend to cause much more damage per shot than energy-based weapons, but they also suffer from slower rate of fire and longer load times.

ROCKET LAUNCHER

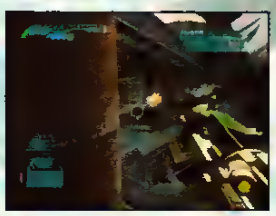

Primary Fire: Single Rocket
Alt-Fire: Multiple Rockets
This weapon packs the most damage per projectile of any gun in the game, but you'll also have to wait the longest time between reloads, and the rocket itself is pretty slow. Rockets cause splash damage, which means that even if your intended target manages to jump out of the direct path of your shot, they might still take some damage if the rocket impacts on a nearby wall or other obstacle. The secondary fire mode, which launches up to three rockets simultaneously, will instantly kill any opponent on a direct hit, but be careful when using this option—whether you're ready to fire or not, all three rockets will launch automatically after loading up the third rocket. Make sure you're not aiming at the ground when that happens. The rocket launcher has a trick shot called Drunken Rockets: After firing three rockets with the alt-fire trigger, keep holding the trigger and pull the primary fire trigger to split each rocket into two "drunken rockets" that spin crazily out of control. The drunken rockets spread damage over a wider field, great for areas with multiple opponents!

FLAK CANNON

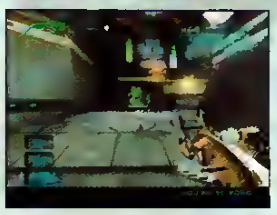

Primary Fire: Spread Shot
Alt-Fire: Explosive Shell
A variation on the standard shotgun in most shooters, the flak cannon's primary fire shoots a spread of super-heated metal fragments at your opponent(s). Be wary, however—although it's slightly faster than a rocket, skillful opponents can send all of the flak back at you with a single well-timed melee weapon deflection. When faced with such an adversary, use the secondary option, which launches a single packed shell that explodes on contact and inflicts a good amount of splash damage. Aim for the ground near your target rather than directly at him, and he'll have a hard time deflecting it.

GRENADE LAUNCHER

Primary Fire: Proximity Grenade
Alt-Fire: Mine
Grenades are solid projectiles that can ricochet off of obstacles; they are capable of bouncing around corners and catching opponents off-guard. They explode when near an opponent, or automatically after a short amount of time. You can lay down mines with the alt-fire trigger. They'll detonate when a nearby explosion occurs, or if you keep the alt-fire trigger held down and pull the primary fire trigger. It's possible to set some very elaborate and devious traps by building a minefield around a blind corner, and then detonating them when an opponent runs into view.

RIPJACK

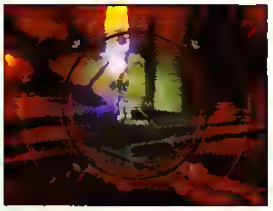

Primary Fire: Saw Blade
Alt-Fire: Exploding Blade
The Ripjack fires a spinning saw blade that ricochets off of obstacles and can take the head clean off an opponent if it connects with the neck area. You can launch several of them quickly to fill a corridor with spinning death. Holding the alt-fire trigger charges up a blade so that it explodes on contact. Alternatively, if you pull the primary fire trigger while charging a blade, it will launch a proximity blade, which explodes when it gets near an opponent. The latter is useful for taking out enemies who like to bat projectiles back at you with their melee weapons.

ENERGY AMMO-TYPE

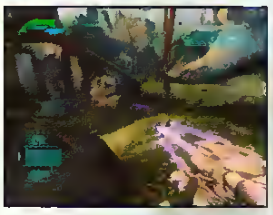

Energy weapons tend to fire faster than explosive-based guns, but they don't have the benefit of splash damage and so tend to require better aiming skills to cause reasonable amounts of damage to their targets.

SNIPER RIFLE

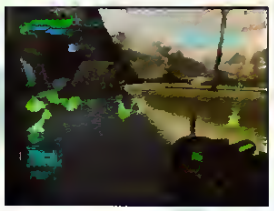

Primary Fire: Sniper Shot
Alt-Fire: Scope
The sniper rifle offered here is very standard—which is surprising, considering the range of other weapons available. It fires a very powerful bullet that is almost a guaranteed kill on a head shot, and offers a zoomed view with the alt-fire scope. It's actually easier in many cases to use the sniper rifle without the zoomed view, since opponents are quick and tend to jump and dodge a lot. You'll need to really fine-tune your aiming ability to make good use of the sniper rifle.

SHOCK RIFLE

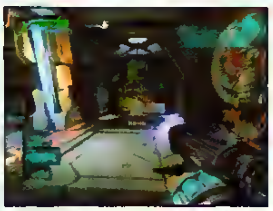

Primary Fire: Laser Beam
Alt-Fire: Shock Core
The shock rifle is one of the more intriguing weapons in *UC2*. Its primary fire is a solid laser attack, but the secondary ability to launch a shock core—an unstable, slow-moving ball of energy—is where this gun gets interesting. You can hit a shock core with a laser blast to detonate it, causing decent damage to anything caught in the explosion, or you can freeze it by holding the alt-fire trigger and then pulling the primary trigger. Using this technique, you can boost the power of a frozen shock core by hitting it with multiple additional shock cores, or you can set up several frozen shock cores in an area and set off a chain reaction of explosions. You'll want to experiment with this weapon to finesse its range of possibilities; in the right hands, it's extremely deadly.

BIO RIFLE

Primary Fire: Small Biotoxic Blob
Alt-Fire: Large Biotoxic Blob
Using the primary fire option with this "sludge gun" lets you lay down a field of bouncing, dangerous green globs that will halfheartedly pursue nearby enemies and damage them on contact. The alt-fire option launches a larger blob that is more aggressive in its pursuit of your opponents. With the alt-fire option, you can also charge up a large blob, then pull the primary trigger to launch it. When you release the trigger, it will explode into a biotoxic cloud that hangs in the air, damaging anyone who walks through it.

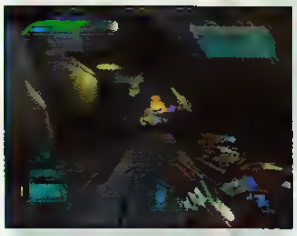

STINGER

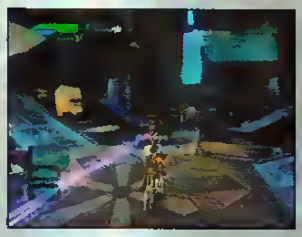

Primary Fire: Rapid Fire Shards
Alt-Fire: Homing Shards
The Stinger is as close as *UC2* gets to offering a standard machine gun option for shooter fans. Its primary fire unloads crystal shards at a high rate; in fact, the damage potential increases with sustained fire. The rate of fire makes deflecting this attack difficult, even if some shards are deflected, others will still get through. Secondary fire for the Stinger uses larger, slightly slower projectiles that have slight homing capabilities and will adjust their trajectories to follow targeted opponents

MATCH TYPES

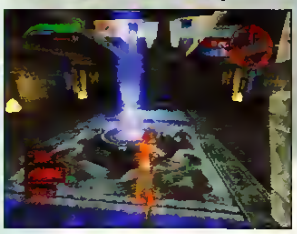

DEATHMATCH, TEAM DEATHMATCH & SURVIVAL

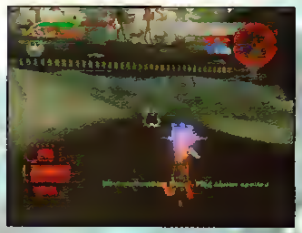

This is the standard arena mode that's familiar to all fans of shooters. Pick your character, choose your weapons and try to get as many kills as possible before someone takes you out. Pull the trigger to respawn and jump back into the thick of things. Team Deathmatch pits you and a group of allies against a team of adversaries; the only difference here is you'll want to check your target to make sure he's not on your team before you pull the trigger. Survival mode is a one-on-one deathmatch setting where multiple players can line up for a chance to challenge the current winner. If you lose a match, you'll wait in line for your turn to come back around.

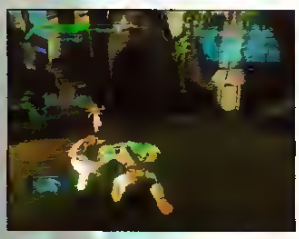

CAPTURE THE FLAG

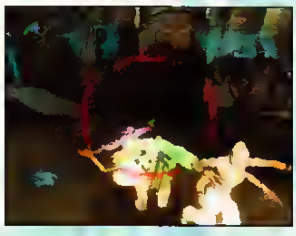

Unreal Championship 2 doesn't mess with the tried-and-true Capture the Flag mode too much. You'll join a team of other players (or computer-controlled bots) and attempt to infiltrate the enemy base and steal their flag while defending your own base from the opponents. Unlike CTF modes in some other shooters, you'll still be able to attack while toting the enemy flag, so the action never stops and you won't need to rely so much on teammates covering you as you run back to your base. When playing with other people via system link or online, you'll want to have a good plan of attack and make sure everyone knows their role (protect the flag, capture the flag and so on). If you're playing with (and against) the computer, be sure to make use of the command menu to order your teammates to take up whatever roles you need filled. On their own, they'll freelance as they see fit, but you'll be more effective if you know exactly what everyone on your team is doing at all times.

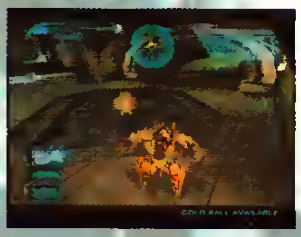

NALI SLAUGHTER

The peaceful, ethereal Nali are set loose in the arenas for Nali Slaughter matches. All warriors compete to find and kill the Nali as quickly as possible to score points. Of course, you can still target and eliminate other players as well, but you won't score as many points and you'll waste a lot of time if you concentrate too much on this tactic. Keep an eye out for the translucent Nali—they're hard to see and you can't target them, but they're worth the extra effort to hunt down, since you'll score more points.

OVERDOSE

Overdose mode is as close to a sporting event as *UC2* can deliver while still maintaining its over-the-top levels of combat violence. Players battle to be the one to grab the ball and then attempt to deliver it to the goal before they overdose on radiation. If you're the ball carrier, everyone else will be trying to stop you from scoring points by reaching the goal. If someone else has the ball, try to be the one to kill him and score a few points for the effort.

CHARACTERS

ARCLITE

Race	Human (Juggernaut)
Pistols	Dual Enforcers
Melee Weapon	Juggernaut Fists
Health	3 meters
Agility	1 meter

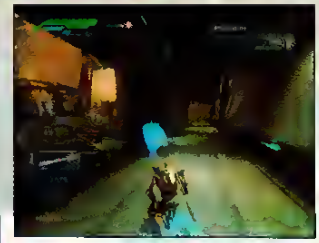

ADRENALINE ABILITIES

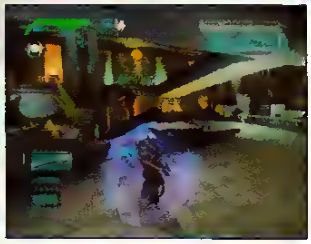

Ability	Button Command	Adrenaline Required	Description
Unstoppable	X, L	2 meters	Grants invulnerability at the cost of slow health loss
Nimble	X, A	1 meter	Allows you to jump three additional times and reduces the effects of gravity
Concussion	X, R	1 meter	Dazes nearby enemies
Heal	X, X, L	2 meters	Instantly recovers a small amount of health
Speed	X, X, A	1 meter	Increases movement speed for a short time
Berserk	X, X, R	2 meters	Increases toughness, strength and speed for a short time

Big and tough, Arclite benefits from a long health bar but is hampered by his extremely slow rate of movement. Although his ability with ranged weapons is as good as any other warrior, you'll want to take advantage of his extremely powerful melee weapons whenever possible. Use Unstoppable to keep yourself healthy as you approach your targets, then hit them with the Juggernaut Fists as soon as you come into range. The Concussion ability is also excellent for setting opponents up for some massive damage; it's especially useful against the highly agile ones that the slow-moving Arclite can have trouble locking down.

ANUBIS

Race	Nakhti
Pistols	Nakhti Scorpions
Melee Weapon	Nakhti Staff
Health	2 meters
Agility	2 meters

ADRENALINE ABILITIES

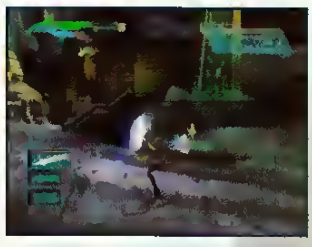

Ability	Button Command	Adrenaline Required	Description
Repulse	X, L	1 meter	Creates a shield that repels explosive projectiles
Nimble	X, A	1 meter	Allows you to jump three additional times and reduces the effects of gravity
Energy Burst	X, R	1 meter	Energy explosion causes damage to nearby enemies
Heal	X, X, L	1 meter	Instantly recovers a small amount of health
Speed	X, X, A	1 meter	Increases movement speed for a short time
Warrior Spirit	X, X, R	1 meter	Increases damage and speed for a short time

Anubis has balanced attributes; he's the closest thing to a "main character" in *UC2*. Both his health and agility are average, and his adrenaline abilities give him a solid mix of options in combat. The fact that all of his abilities require just a single adrenaline meter means that Anubis can use any combination of two abilities when his adrenaline is full, giving him more options than most other characters. The Repulse/Heal combo is great for keeping Anubis safe and regaining health, while Warrior Spirit/Energy Burst turns him into a nearly unstoppable crowd-killing machine.

SAPPHIRE

Race	Human
Pistols	Dual Enforcers
Melee Weapon	Cryo Swords
Health	1 meter
Agility	3 meters

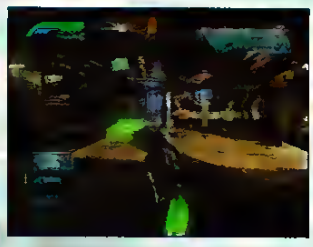

ADRENALINE ABILITIES

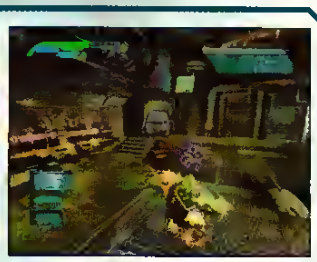

Ability	Button Command	Adrenaline Required	Description
Iron Spirit	X, L	1 meter	Creates an armored shell that reduces damage
Nimble	X, A	1 meter	Allows you to jump three additional times and reduces the effects of gravity
Ice Burst	X, R	2 meters	Instantly freezes nearby enemies
Heal	X, X, L	1 meters	Instantly recovers a small amount of health
Speed	X, X, A	2 meters	Increases movement speed for a short time
Homing	X, X, R	2 meters	All projectiles have homing effect against targeted opponents

Speed is Sapphire's main strength—and she needs it, since she's got very little health to keep her alive. Use Iron Spirit to reduce damage, and Ice Burst to set opponents up for a quick kill. Sapphire benefits from the quick-acting Heal ability, and her Homing skill can be a nightmare for opponents caught in wide-open spaces. The key to playing Sapphire is to stay on the move, use Nimble often and run circles around slower opponents.

SZALOR

Race	Skaarj
Pistols	Skaarj Razik
Melee Weapon	Skaarj Blades
Health	3 meters
Agility	1 meter

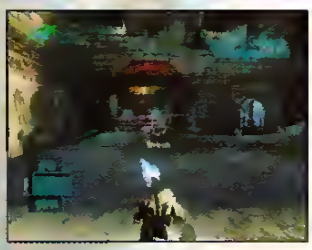

ADRENALINE ABILITIES

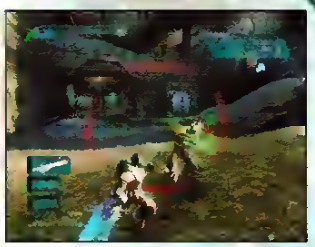

Ability	Button Command	Adrenaline Required	Description
Blade Shield	X, L	1 meter	Creates a shield of blades that blocks explosive projectiles
Nimble	X, A	1 meter	Allows you to jump three additional times and reduces the effects of gravity
Blade Burst	X, R	2 meters	Orbiting blades injure nearby enemies
Regenerate	X, X, L	2 meters	Slowly regains health
Speed	X, X, A	1 meter	Increases movement speed for a short time
Predator	X, X, R	1 meter	Increases speed and damage of blade attacks

Slow but very strong, Szalor can outlive many opponents simply by virtue of his long health bar. In close, he's nigh-unstoppable—Blade Burst causes heavy damage to opponents caught inside the whirling saw blades, while Predator increases Szalor's already powerful melee attacks. You can keep Szalor in the fight long after lesser warriors would hit the ground by using Regenerate at regular intervals to keep his health full.

SOBEK

Race	Nakhti
Pistols	Nakhti Scorpions
Melee Weapon	Nakhti Staff
Health	2 meters
Agility	2 meters

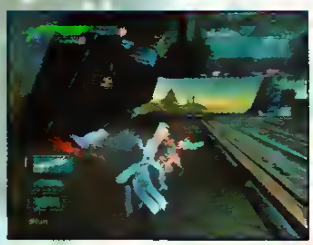

ADRENALINE ABILITIES

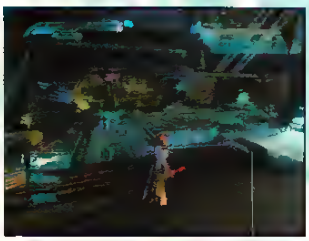

Ability	Button Command	Adrenaline Required	Description
Repulse	X, L	1 meter	Creates a shield that repels explosive projectiles
Nimble	X, A	1 meter	Allows you to jump three additional times and reduces the effects of gravity
EMP	X, R	1 meter	Creates an electromagnetic pulse that detonates projectiles
Heal	X, X, L	1 meter	Instantly recovers a small amount of health
Speed	X, X, A	1 meter	Increases movement speed for a short time
Warrior Spirit	X, X, R	1 meter	Increases damage and speed for a short time

Similar to Anubis in his base stats, Sobek is also a well-balanced warrior. However, his adrenaline abilities are skewed more toward defense than offense—Repulse, EMP and Heal all help to keep Sobek safe from harm. Kick on Warrior Spirit when you need to break out the Legion Sword and leap into close combat.

LAUREN

Race	Nakhti
Pistols	Dual Enforcers
Melee Weapon	Necris Swords
Health	1 meter
Agility	3 meters

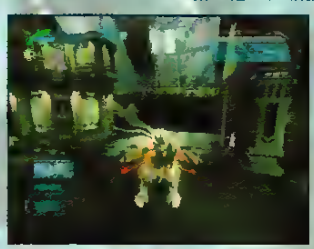

ADRENALINE ABILITIES

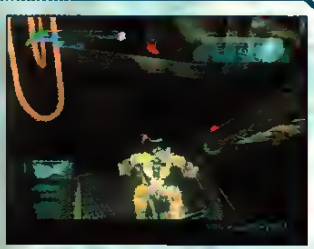

Ability	Button Command	Adrenaline Required	Description
Ethereal	X, L	1 meter	Enemies see you slightly out of position
Nimble	X, A	1 meter	Allows you to jump three additional times and reduces the effects of gravity
Siphon	X, R	1 meter	Creates orbs that drain health from opponents and deliver it to you
Vampire	X, X, L	1 meter	Recovers health by damaging opponents
Speed	X, X, A	1 meter	Increases movement speed for a short time
Wraith	X, X, R	1 meter	Ghostlike form reduces damage

Lauren is incredibly agile and fast-moving, although she can be tough to use effectively. She has no independent healing ability—both Siphon and Vampire require nearby enemies to regain health, which can make them difficult to use if Lauren is about to die. However, her defensive abilities (Wraith and Ethereal) keep her out of harm's way by confusing opponents and tricking them into attacking the wrong target.

RAPTOR

Race	Liandri
Pistols	Liandri Rivet Guns
Melee Weapon	Liandri Hammers
Health	3 meters
Agility	1 meter

ADRENALINE ABILITIES

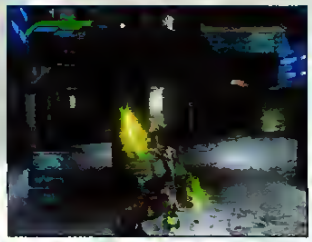

Ability	Button Command	Adrenaline Required	Description
Cannibalize	X, L	1 meter	Sacrifices some health to create ammunition
Nimble	X, A	1 meter	Allows you to jump three additional times and reduces the effects of gravity
Self-Destruct	X, R	1 meter	Sacrifices yourself to cause severe damage to nearby enemies
Upgrade	X, X, L	2 meters	Gradually restores some health
Speed	X, X, A	2 meters	Increases movement speed for a short time
Radar	X, X, R	1 meter	Indicates location of nearby enemies, even through obstacles

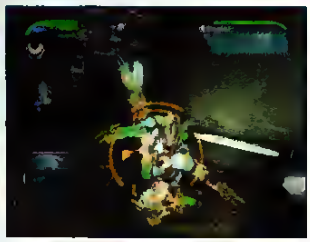

The robotic Liandri can create their own ammunition by sacrificing health with the Cannibalize ability, which potentially gives them the upper hand early in a match. Raptor is powerful but slow, although his Radar skill lets him seek out enemy positions and maneuver to intercept them before they know he's there. Self-Destruct is powerful, especially when used with multiple nearby opponents, and especially if Raptor is about to be destroyed anyway. Upgrade is a regenerative healing ability that slowly restores health and can keep Raptor in the fight for a long time.

TORGR

How to Unlock	
Complete the Ascension campaign	

Race	Skaarj
Pistols	Skaarj Razik
Melee Weapon	Skaarj Blades
Health	2 meters
Agility	2 meters

ADRENALINE ABILITIES

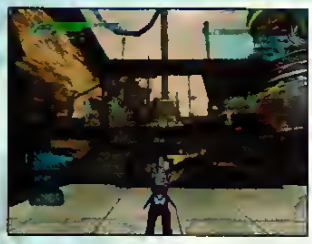

Ability	Button Command	Adrenaline Required	Description
Blade Shield	X, L	1 meter	A shield of blades that blocks explosive projectiles
Nimble	X, A	1 meter	Allows you to jump three additional times and reduces the effects of gravity
Primal Scream	X, R	1 meter	Drains adrenaline from nearby enemies
Regenerate	X, X, L	2 meters	Slowly regains health
Speed	X, X, A	1 meter	Increases movement speed for a short time
Predator	X, X, R	1 meter	Increases speed and damage of blade attacks

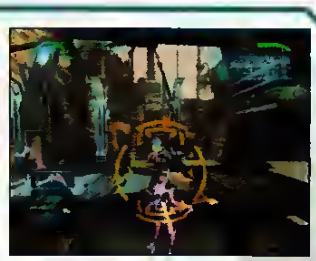

A more well-balanced Skaarj than Szalor, Torgr lacks some of his bulkier brother's strength and offensive capability, but makes up for this with better speed. The ability to deny opponents their adrenaline moves is also powerful in its own right.

DEVASTATION

How to Unlock	
Defeat Devastation in the Ascension campaign	

Race	Liandri
Pistols	Liandri Rivet Guns
Melee Weapon	Molten Kama
Health	1 meter
Agility	3 meters

ADRENALINE ABILITIES

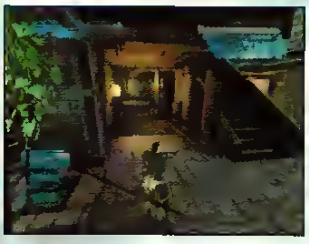

Ability	Button Command	Adrenaline Required	Description
Cannibalize	X, L	1 meter	Sacrifices some health to create ammunition
Nimble	X, A	1 meter	Allows you to jump three additional times and reduces the effects of gravity
Head Turret	X, R	1 meter	Head-mounted turret attacks nearby enemies
Upgrade	X, X, L	2 meters	Gradually restores some health
Speed	X, X, A	2 meters	Increases movement speed for a short time
Radar	X, X, R	1 meter	Indicates location of nearby enemies, even through obstacles

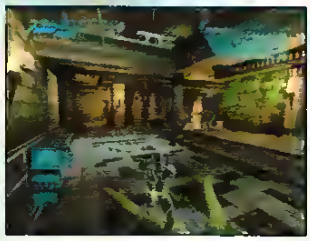

The reverse of Raptor, Devastation is fast and agile but lacks health. However, her Head Turret adds an additional weapon that tracks and automatically fires on any nearby opponents. In combination with another weapon, it can quickly wear through the defenses of even the toughest target.

MALCOLM

How to Unlock	
Complete Szalor's tournament ladder	

Race	Liandri
Pistols	Dual Enforcers
Melee Weapon	Cryo Staff
Health	3 meters
Agility	1 meter

ADRENALINE ABILITIES

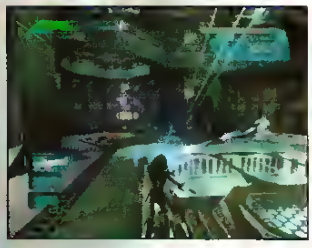

Ability	Button Command	Adrenaline Required	Description
Iron Spirit	X, L	1 meter	Creates an armored shell that reduces damage
Nimble	X, A	1 meter	Allows you to jump three additional times and reduces the effects of gravity
Sentinel	X, R	2 meters	Autocannons fire on nearby enemies
Heal	X, X, L	1 meter	Instantly recover a small amount of health
Speed	X, X, A	2 meters	Increases movement speed for a short time
Homing	X, X, R	2 meters	All projectiles have homing effect against targeted opponents

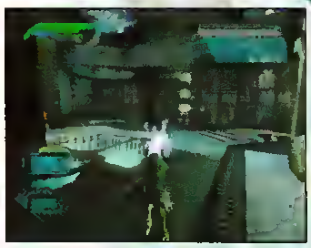

Malcolm is nearly identical to Sapphire in terms of adrenaline abilities; only his Sentinel attack is different. He's balanced better with average health and agility compared to Sapphire's dominant agility but frail health. He's also armed with a powerful staff for close combat. With his balance of defensive and offensive abilities, Malcolm is a good choice for new players.

SELKET

How to Unlock	
Win a match against human opponents in each game type	

Race	Liandri
Pistols	Nakhti Scorpions
Melee Weapon	Nakhti Swords
Health	1 meter
Agility	3 meters

ADRENALINE ABILITIES

Ability	Button Command	Adrenaline Required	Description
Repulse	X, L	1 meter	Creates a shield that repulses projectiles
Nimble	X, A	1 meter	Allows you to jump three additional times and reduces the effects of gravity
Flash	X, R	1 meter	Blinds nearby enemies for a short time
Heal	X, X, L	1 meter	Instantly recovers a small amount of health
Speed	X, X, A	2 meters	Increases movement speed for a short time
Warrior Spirit	X, X, R	2 meters	Increases speed and attack damage for a short time

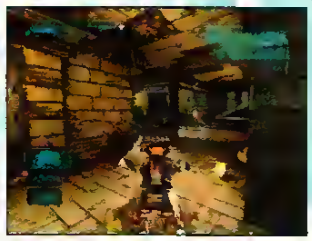

With no predominant offensive adrenaline abilities, Selket must rely on her speed, guile and agility to avoid enemy attacks. Use Flash to blind nearby enemies and attack them with melee strikes. Repulse will keep damaging projectiles from harming you, while Warrior Spirit will pump Selket up for combat if you find yourself engaged against a tough opponent.

GORGE

How to Unlock	
Complete Malcolm's tournament ladder	

Race	Human (Juggernaut)
Pistols	Dual Enforcers
Melee Weapon	Juggernaut Fists
Health	3 meters
Agility	1 meter

ADRENALINE ABILITIES

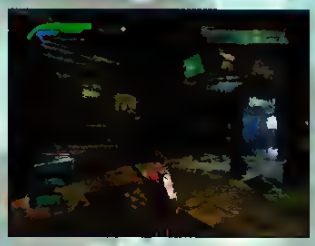

Ability	Button Command	Adrenaline Required	Description
Unstoppable	X, L	2 meters	Grants invulnerability at the cost of slow health loss
Nimble	X, A	1 meter	Allows you to jump three additional times and reduces the effects of gravity
Smash	X, R	1 meter	Ground-pounding attack that damages nearby opponents
Heal	X, X, L	2 meters	Instantly recovers a small amount of health
Speed	X, X, A	1 meter	Increases movement speed for a short time
Berserk	X, X, R	2 meters	Increases toughness, strength and speed for a short time

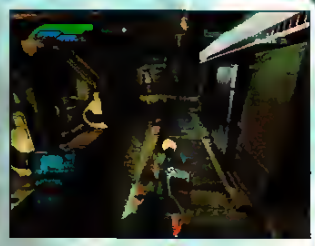

Gorge is all but identical to Arclite, the other prominent Juggernaut character in the game. The only notable difference is that instead of the concussion wave Arclite uses to daze nearby opponents, Gorge can slam his massive fists into the ground to directly damage all nearby enemies.

BROCK

How to Unlock	
Complete Lauren's tournament ladder	

Race	Necris
Pistols	Dual Enforcers
Melee Weapon	Necris Staff
Health	2 meters
Agility	2 meters

ADRENALINE ABILITIES

Ability	Button Command	Adrenaline Required	Description
Ethereal	X, L	1 meter	Enemies see you slightly out of position
Nimble	X, A	1 meter	Allows you to jump three additional times and reduces the effects of gravity
Fear	X, R	1 meter	Steals adrenaline from nearby opponents
Vampire	X, X, L	1 meter	Recovers health by damaging opponents
Speed	X, X, A	1 meter	Increases movement speed for a short time
Wraith	X, X, R	1 meter	Ghostlike form reduces damage

Brock is similar to Lauren in his abilities, although not quite as fast on his feet. His melee weapon is more powerful, and he can keep opponents from using adrenaline abilities around him with Fear—which is a very powerful skill to have, especially in crowded arenas.

UNREAL KOMBATP

Midway has been slipping characters from its *Mortal Kombat* franchise into other games for some time now, including the *MLB SlugFest* series and *Psi-Ops: The Mindgate Conspiracy*. *Unreal Championship 2* continues this trend: If you can battle your way through the extremely tough Challenge series of matches, you'll unlock Raiden the thunder god for play in the arena.

His name is Gojiro Kiryu... and he's bringing justice back to the old west...

Be a samurai or a Gunman! Unique 2 player mode allows you to play as both!

"Bushido Sense" allows you to dodge and deflect bullets with superhuman skill!

Over 100 unlockables including over 25 playable characters, 70 accessories and 20 weapons!

AREA-51

Strategy Guide by Geoff Arnold

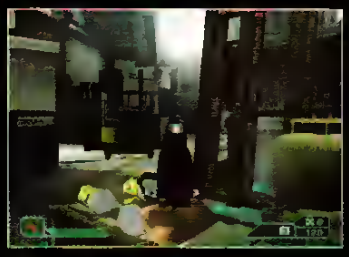

Deep inside the military's secret weapons and research testing facility, commonly known as Area 51, a viral outbreak has occurred. The virus has been found to have mutagenic side effects, turning the infected into mindless slaves. The entire base has been quarantined, and as a precautionary measure an elite HAZMAT team, led by Ethan Cole, has been called in to assist with the situation. As Ethan moves further into the base, he makes a frightening discovery—more frightening than the mutated soldiers and scientists who have been trying to kill him....

Inside Area 51

A complete walkthrough for *Area 51* isn't necessary, since the game is rather linear. Instead, we have provided information to help you get through the "sticky spots" in each stage (i.e. the places where people tend to get "stuck"), along with a complete list of the lore items and their locations. As an added bonus, we've also included some gameplay tips from our helpful alien friend, Mr. Gray.

STAGE 1: WELCOME TO DREAMLAND

How to Take Out the Saboteur

Start by taking potshots at the saboteur, which will cause him to retreat, then follow him around the right side of the firing range. When he holes himself up in the next area, move in and out behind the bulletproof glass, firing a few shots to scare him off. Wait for him to back up to the loading dock, then carefully aim and fire at the barrel on his right. The barrel will explode, killing him instantly.

Lore Items

1. Unknown Skin Type—After picking up your scanner, use it on the corpse's arm on the gurney inside the room.
2. XM-88 Turret Specs—After leaving the scanning room, head back to the storage room. Wait for the wooden pallet containing the tires to fall and use the pallet to jump over the fence to the right; the document is on the floor in the corner.
3. Canister Specifications—On your way back to the shooting range, scan the large blue canister near the truck loading zone.
4. Health Syringe—While in the area next to the firing range, head behind the portable building (labeled 9S 2-SG4) opposite the armory by crawling under a hose on the left side. Scan the syringe sticking out of the corpse behind the building.
5. Decoded Laptop Information—While chasing down the saboteur, you will come to a small area filled with supplies. Look for the laptop on a crate near the right side of the room.

Ask Mr. Gray

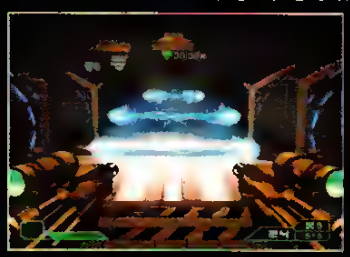

Q: Mr. Gray, all I have is this dumb handgun. Isn't there a way to get a more powerful weapon early on in the game?

A: How typical—humans always looking for new and more grotesque ways to destroy each other. Before infiltrating your ranks, I believe the mutant soldier you have been chasing acquired a weapon. Perhaps you can "persuade" him to give it to you.

STAGE 2: THE HOT ZONE

How to Access the Power Generator

Just before reaching the ladder leading up to the upper floor, you will encounter a trio of deadly electricity beams that arc between two generators on the ground level. The mid- and high-level beams travel away from you, while the lower-level beam travels toward you. Wait until the high- and mid-level beams arc, then quickly run behind them and follow them down the path. When the lower-level beam gets close, jump over it to avoid getting shocked.

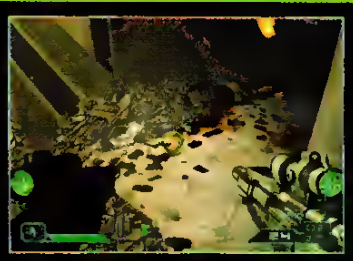

Lore Items

1. Alien Propaganda Sites—In the first large room you come to, check the table opposite the Area 51 arcade machine for the document.
2. Super Contagious Body—In the workers' area, look for the large burning body on top of the table near the exit.
3. New Employee Name Policy—Follow the staircase up from the workers' area to the second floor and into a small room. Check the left couch in this area to locate the document.
4. Employee Reprimand—In the mainframe room, head down the ramp and check underneath the walkway. The document is in a small cubbyhole behind the stacked canisters.
5. Unknown Artifacts Discovery—In the generator room, look for the small room with the ladder leading to the upper floor. The document is on the floor next to the corpse.

STAGE 3: THE SEARCH

How to Locate the L1 Security Card

When Crispy reaches the security room, he won't be able to hack the console without the L1 security access card. Head to the room across the hallway and look for a severed arm that's holding the card. Pick up the arm and go to the room directly behind you. Use the arm on one of the security devices outside and quickly place your hand on the other to unlock the door. Collect the card from inside and return it to Crispy.

©2005 Midway Games West Inc. All Rights Reserved.

STAGE 3: THE SEARCH continued

Lore Items

1. Alien Autopsy Pictures—Collect the two ID Cards to gain access to the room containing the shotgun. Jump onto the crates on the left and look for the document on top of the large metal box.
2. Pictures of Human Oddities—Enter the room on the bottom floor after Crispy picks the lock. Head through the room and look for a fire extinguisher near the door; shoot the extinguisher to put out the flames in the room and collect the document from the table.
3. Mite Jar—In the room with the canisters of glowing green liquid, scan the canister on the floor near the broken electrical wire.
4. Unknown Life-form—In the second large part of the building, head up the right ramp to the second floor. Locate the severed arm and the L1 security card and enter the room just beyond, then scan the pile of ooze inside.
5. Vechtol Word Order—In the room with the L1 security card, check the nearby desk for a document.

Ask Mr. Gray

Q: Mr. Gray, I found a locked door in the comm room and I can't open it. How do I get in?

A: Obviously, human, you have not completely explored your surroundings. You will need two ID Cards to get inside—one is in the comm room by the computer that you scan. You might try searching one of the rooms at the end of each catwalk for the other.

STAGE 4: THEY GET BIGGER

How to Kill Mutant Crispy

There is an easy trick to defeating Crispy. As soon as he runs toward you, head for the broken wall near the back of the room (you'll see a large fire burning behind the wall). Turn to your right and look for an SMP sitting on a box. Quickly jump onto the box, then jump again onto the next crate just above. From here you can fire at Crispy without fear of getting attacked and can easily destroy him.

Lore Items

1. Star Chart and Pyramid Alignment—In the main room, take the ramp up to the second floor and check near the left wall; the document is lying on the ground in plain sight.
2. Atlantis Map—After moving the crane, walk along the steel girders attached to the ceiling. The document is on a girder opposite the hangar control room.
3. Saucer Ship Schematics—In the room with mutant Crispy, climb on top of the crate where you find the SMP and jump behind the nearby crates. The document is on a shelf in the back.
4. Experiment Volunteer Request—In the main room, head into the small office near the right wall and check the desk near the soda machine.
5. Crop Circle Documents—In the main room, head up the ramp leading to the upper floor and enter the room on the left. The document is on a crate in the far corner.

Ask Mr. Gray

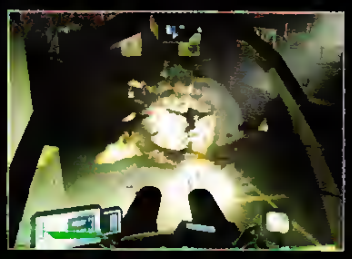

Q: While walking around, I sometimes get this weird status bar on the right side of the screen. Do you know why this happens?

A: I believe this is an indicator light from that archaic scanning device you use from time to time. Apparently the device has an inactive search mode, allowing you to judge your distance from certain artifacts that you are able to collect.

STAGE 5: THE LAST STAND

How to Defend the Bunker

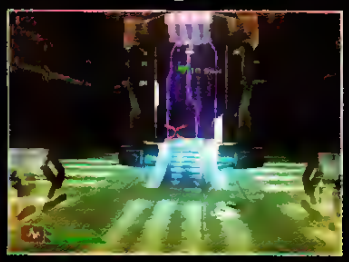

After Chew plants the explosives and you detonate them, you must fight off several droves of mutants. Since they are fairly accurate with their weapons, you need to destroy them as quickly as possible to keep from taking a lot of damage. Instead of trying to shoot each mutant individually, aim your turret toward the center of the large area and use the splash damage from the gun to kill groups of them at once.

Lore Items

1. Groom Lake Weapons Testing Facility—Scan the large sign in the center hallway near the starting point.
2. Unidentified Metallic Substance—In the room with the explosives, make your way through the area until you reach the second set of planks leading up to some crates. Jump up to the right to reach some more crates, then turn right and walk along the small edge of the wall back toward the planks. Jump from the edge of the wall over the planks and onto a larger crate on the opposite side, then jump over the air duct and onto another set of crates to locate the CDs.
3. Public Ebola Test—After loading the second turret, check the wall near the left side of the bunker for a grate. After killing the mutants nearby, crawl through the hole and into the access tunnel to locate the document.
4. KGB Research Information—In the armory, look for the fallen bookcase near the turret ammo; jump over the bookcase and check the shelves for the document.
5. Congressional Disinformation—Follow Chew down the hallway after defending the bunker and enter the first room on your right; the document is on a shelf on the left.

STAGE 6: ONE OF THEM

How to Stop the Mutation!

To revert back to human form, you must locate and activate the demute chamber, which is in the lab. From the start, head up the stairs and down the hallway to the right. Go through the door and follow the hallway the right to reach the lab; the chamber is inside.

How to Access the Elevator

You'll need the L2 access keycard to progress. From the lab, follow the hallway down to the opposite end and look for the card near a corpse on the left side of the room.

Lore Items

1. **Green River Launch Project**—After exiting the demute chamber in the lab, turn right and look on the ground near the chamber for the document.
2. **Project Blue Book**—Also in the lab, look on the ground near the right side of the door leading out for this document.
3. **Demute Chamber Warning**—You'll find this document on the floor next to the garbage dumpsters near the starting point.
4. **Gray Experiment Chat Log**—In the long hallway where you find the elevator, look for the log on the floor at the end of the hallway opposite the lab.
5. **Cray Assassination**—In the room with the L2 access keycard, check the floor near the right side of the room.

Ask Mr. Gray

Q: Mr. Gray, I am having a hard time killing mutants. Do you have any suggestions?

A: Much like you humans, mutants are frail creatures indeed. Point your weapon toward their cerebral core to end their lives quickly, or embrace your inner mutant and kill them with one swift swipe.

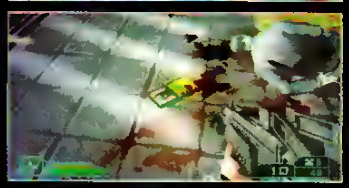

STAGE 7: INTERNAL CHANGES

How to Stop the C4 From Detonating

When the timer starts ticking, you will only have less than a minute to defuse the C4. Quickly run down the hallway to the right into the C4 room and toss a couple of grenades after opening the door (there are several Black Ops soldiers inside the room, and you need to soften them up). Take out the first few guards between you and the C4 (look for the yellow circle on the left pipe inside the room), then quickly retreat from the hallway. Pick off the Black Ops soldiers one by one at this point until the area is clear.

How to Find Dr. Cray

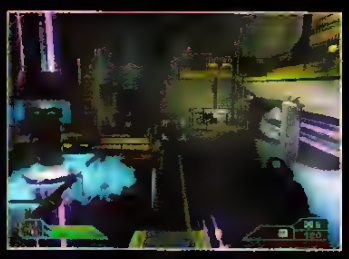

Pick up the Security Level 3 keycard from the room with the C4. Next, head back to the elevator and take it to the next floor to progress

Lore Items

1. **Death Request Form Letter**—From the start, follow the hallway down to the right to reach a restricted area access door; the document is on the ground near the left side of the door.
2. **Leaper Vivisection**—Scan the mutant leaper on the table in the experimentation room.
3. **Report on Mutant Vision**—Use the electronic lock release to unlock the door on the far side of the experimentation room; the document is on the floor.
4. **Destruction Orders**—In the room with the leaper cages, check the floor near the staircase leading up for the orders.
5. **Red Ops Information**—Check the floor in the room with the C4, just past the entry door.

STAGE 8: LIFE OR DEATH

How to Cross the Arm Room

When you reach the arm room, you'll need to find a way to reach the other side. Drop to the bottom floor and take the elevator up on the far side of the room. Climb the ladder and grab the keycard, then head back to the opposite side of the room. Use the keycard to activate the arm servo, then head back to the opposite side of the room. Take the ladder back up to the top floor to reach the maintenance access gate, open the gate and jump onto the arm servo when it gets close. You can then use the arm to reach the far side of the room.

How to Shut Down the Hydraulic Controls

The hydraulic controls are at the bottom of the room. Shutting them down is not a problem, but it can be difficult to make it down there alive. Carefully work your way through the room, taking cover behind the pillars and walls, and kill Black Ops soldiers as they begin to fire. If you have the SR-1256 sniper rifle, use it to take out soldiers both below you and on the other side of the room before moving. There are several health power-ups along the way if you need them. When you reach the bottom of the room, shut down all four controls

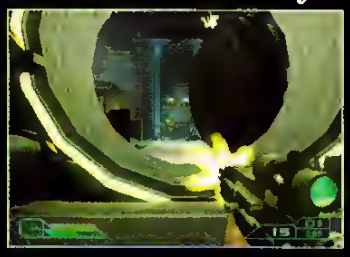

STAGE 8: LIFE OR DEATH continued

Lore Items

1. **Illuminati Dollar Bill**—From the starting elevator, head right and down the hallway; the bill is on a table on the left side of the hall.
2. **Capecity Overload Orders**—In the room with the capacity overload tubes, jump to the bottom of the area and scan the control panel near one of the tubes.
3. **Alien Implosion Technology**—Collect the small key from the dead soldier in the elevator near the starting point (the elevator near the large fire), then head to the room with the capacity overload tubes.
4. **Servo-Arm Manual**—In the arm room, drop down to the second level and scan the blueprints on the wall.
5. **Bigfoot Canister**—In the second room with the capacity overload tubes, scan the creature in the canister on the upper floor.

STAGE 9: DR. CRAY

How to Defend Cray's Lab

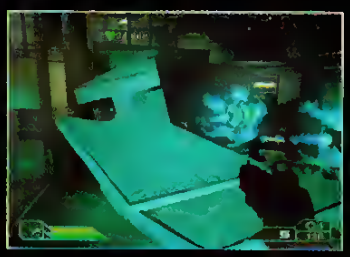

After you speak to Dr. Cray, Black Ops soldiers will attempt to enter the lab and kill you both. Stay inside the vault area and duck down, killing the Black Ops soldiers one at a time while the turrets keep them occupied. The SMP rifle is useful here, along with a combination of JB grenades if you have them. If you take too many hits, you can venture out into the turret room to collect some health, but be sure that there are only a few enemies left before doing so.

Lore Items

1. **Dr. Cray Experiments**—When you reach the turret room outside of Dr. Cray's lab, take the right stairwell leading up. Jump over the railing and onto the neerby building to locate the document.
2. **Victor Weisbrod Cloning**—Check the upper level of Dr. Cray's lab, on e table near the elevator.
3. **Mr. White Cloning**—In the room just past Cray's lab, look on the shelving unit on the right side of the room near the entrance.
4. **Mutation Extraction Subject**—Inside the lab, scan the mutant soldier on top of the gurney.
5. **Decontamination Chember Specs**—In the lab, head to the upper floor. Look on the floor near the body in the control center.

STAGE 10: HATCHING PARASITES

How to Unlock the Door to the Turret Test Lab

Follow the path through the level to reach the lab and head left when you reech the locked door. In the next room, use the center computer console to turn on the anti-grav machine, then take the elevator to the upper floor. Jump across the floating metal pieces to reech the upper office and collect the keycard, which allows you to enter the leb.

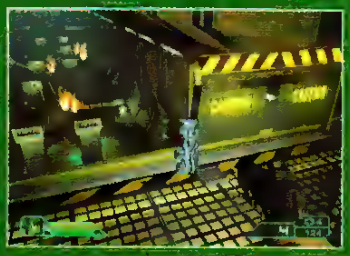

Lore Items

1. **Alien Grenade Specifications**—Look on the floor next to the corpse at the starting point.
2. **Grays' JFK Assassination Involvement**—After using the laser to blow open the door, check the table in the next room near the sniper rifle
3. **Alien Parasitic Creature**—In the room with the two large spheres, scan the blueprints on the wall between the spheres.
4. **Anti Grav Report**—After collecting the keycard for the Turret Test Lab, head to the back wall of the office end look near the floor; there's en open grate that leads to en access tunnel. Follow the tunnel to reach a catwalk and look for the document on the ground.
5. **Laser Progress Report**—In the Turret Test Lab area, take the stairs to the upper floor and follow the catwalk down to the left. There's a small room et the end of the cetwalk; check the floor for the document.

Ask Mr. Gray

Q: Some of the Black Ops soldiers were shooting at me with a strange and powerful weapon. Cen I use this weapon egeinst them somehow?

A: I'm surprised the humans were ectually capable of producing something so...advanced. Even with your primitive intellect, wielding this weapon should be easy. Look for it on the cetwelk where you pick up the Anti Grav report.

STAGE 11: PROJECT BLUE BOOK

How to Leave the Hangar

Getting out of the hangar can be tricky, especially since you'll have to fight random waves of Black Ops soldiers. Start by activeting the computer neer the UFO; this will give you access to the inside. Head into the UFO next and charge the weapon system by using the computer inside. Once you're back outside of the UFO, use the opposite computer panel to fire the UFO's weapon; the debris will create a bridge to the upper floor.

Lore Items

1. **Roswell Communicetion**—In the room with the large steel door, check the floor near the right side of the area.
2. **Bermuda Triengle Singularity**—Activate the computer in the hangar to gain access to the UFO end scan the blueprint inside the craft.
3. **SETI Redirection**—Just before you reach the steel door leading to the second hangar, look on the floor near the overturned bookcase.
4. **HyperX Technology Report**—In the second hangar area, check the right side of the catwalk; the document is lying in plein sight on the floor.
5. **Public Alien Technology Device Report**—In the second hangar near the exit, scan the computer panel on the right wall opposite the door.

STAGE 12: LIES OF THE PAST

How to Eliminate the Sources of Interference

There are four separate jamming devices that you must destroy, and each one is located on a different level. Simply ignore the jamming devices at first; if you try to destroy them on the way up, you'll probably take a lot of hits. Instead, concentrate your fire on the mobs of Black Ops soldiers that descend on your position. Slowly work your way up the catwalk, killing soldiers along the way, and start with the jamming device at the top. You'll have to use the computer on the upper level to activate a ladder leading up there.

How to Reach the Upper Level of the Lunar Landing Set

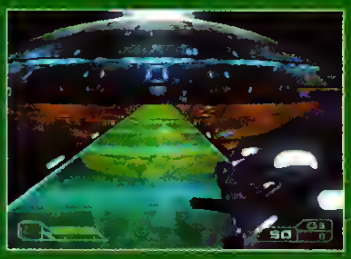

You'll need to activate the LEM launch computer. Grab the batteries from the forklift and the land rover nearby, then place them onto the lift near the LEM. Walk over to the control panel near the office and flip the switch to raise the LEM and gain access to the catwalks above.

Lore Items

1. **Echelon Network**—Near the starting point, look on the floor near the right side of the area.
2. **Film Reel and Documents**—In the comm. room, pick up this item just past the central computer on the right side of the floor.
3. **Animal Experimentation Notes**—In the tunnel system under the lunar landing set, there's a set of pipes on the opposite side of the small office. Duck down under the pipes and you'll see the document on the floor.
4. **Witness Elimination Methods**—On the lunar landing set, check on top of some stacked crates inside the nearby office.
5. **Future Mars Landing Information**—After leaving the lunar landing scene, you'll come to a small office with several computers. Check the floor near the right wall.

Ask Mr. Gray

Q: Help, Mr. Gray! I seem to be getting attacked by invisible soldiers. What gives?

A: The "invisible soldiers" you speak of are nothing more than elite Black Ops soldiers equipped with advanced light-bending cloaking devices. To detect them more easily, look for the shimmering effect that their cloaking device gives off when staring at them. I could try to explain the cloaking technology to you, but I'm afraid your tiny human mind would explode while trying to comprehend the information.

STAGE 13: BURIED SECRETS

How to Open the Locked Gate

After destroying the turrets, head over to the area near the right turret. Walk around the left side of the large rock opposite the turret and you'll see a ladder leading up to the catwalk above. Follow the catwalk over to the left side of the area and jump over the fence to reach a small room. Press the button on the security console to unlock the gate.

How to Disable the Security Lockdown

When you reach the security bunker, proceed with caution—there are several Black Ops soldiers here, and they are stationed at various firing points (both on your level and above you) around the bunker. Take them out one at a time and carefully walk over to the right side of the area near the magma pit. Look for a ladder near the large pipe on the ground and take it down to the walkway. Look for a piece of railing that is bent. Drop down to the pipe below and crawl to reach the security bunker

Lore Items

1. **Alien Skeletal System**—As soon as you enter the turret area, head right toward the open pit and look for a small pipe leading underneath the floor. Hop down onto the pipe and follow it until it ends to find the document.
2. **BBG Spec Sheet**—After exiting the elevator, jump over the machinery to your right and look on the ground behind the elevator.
3. **Alien Metallurgy**—In the turret area, climb the ladder up to the top of the catwalk and scan the lighting system to your left.
4. **Cloaking Device Report**—Inside the security bunker, take the ladder leading to the sniper point on top of the roof; the document is on the floor.
5. **Population Control Documentation**—Cross the bridge just after the turret area and you'll see some stacked crates on your left. Climb the crates and look for the document behind them

STAGE 14: NOW BOARDING

How to Hold Off Enemy Forces

When the scientist tries to override the security system, you'll have to buy him some time by killing the Black Ops soldiers who attempt to stop him. Hop into one of the turrets and defend him by killing everything in sight. As with the last turret scenario, try to aim for the ground in the center of the cavern where the soldiers spawn; the splash damage will kill multiple soldiers at one time.

STAGE 14: NOW BOARDING continued

BOSS BATTLE: Theta

The battle with the Theta takes place almost immediately after you enter the large circular area. Use the BBG here; you won't run out of ammo and it will inflict a good amount of damage. To beat the Theta you must keep your distance; letting the creature get close is not a good idea. Stay on the opposite side of the area and circle-strafe while firing. Since the Theta is so large, the bullets from the BBG will attach themselves to the creature if they get close, so accuracy isn't crucial. If the creature squats, it may jump toward you and attack you, so be ready to quickly run to the other side of the area if you see this. Throughout the battle, the Theta will also "call" leapers in for assistance. Equip your shotgun or switch to mutant mode and deal with them, then continue fighting the Theta. If you take too many hits, look for the health power-ups scattered throughout the area.

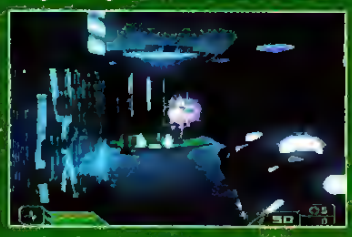

Lore Items

1. Alien Language Leak Closure—In the first area with the large pit, you'll see a jackhammer on the opposite side; the document is on top of the jackhammer.
2. Alien Artifact Storage List—In the room with the giant turrets, follow the tunnel around to the right and into a small room; the document is on top of the computer that controls the bridge.
3. Water Fluoridation Plan—In the room with the giant turrets, there's a small area just to the left of the bridge; scan the laptop at this location.
4. Personal Diary Recording—After you have cleared out the turret area and extended the bridge, climb the ladder to the catwalk above the turrets; the document is on top of one of the pylons nearby.
5. Safety Report—After blowing up the cave wall with dynamite, you'll come to a small enclosed area. Check the light cart on the left for the document.

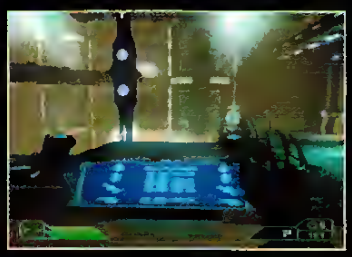

Ask Mr. Gray

Q: Mr. Gray, I keep running out of ammo. Am I doing something wrong?

A: Embrace the infection and use your mutated form to destroy without conscience and simultaneously conserve ammunition. Also remember, human, that the BBG contains a limitless recharging energy cell, providing an unlimited supply of projectiles.

STAGE 15: THE GRAYS

How to Advance Deeper into the Alien Base

To progress, you'll need to find a specific computer and activate the lift. When you reach the room with the Cattle Mutilations lore item, walk over to the computer near the window (where you first saw the Grays) and activate the console here—the lift will elevate your MagLev up to a higher level.

How to Destroy the Shield and Kill the Gray

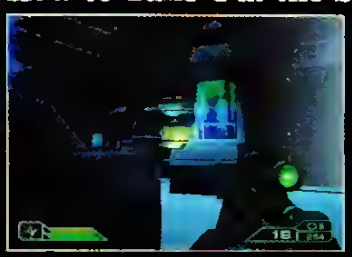

Killing the Gray isn't too tough, but dealing with the Black Ops soldiers he brings into battle can be downright frustrating. Use "hit and run" tactics. As the battle starts, take cover behind the stacked crates in front of the Gray. Take out the Black Ops soldiers first, then immediately switch to your shotgun or BBG. Move up to the Gray and continuously fire on the shield with either weapon. When you need to reload, jump through one of the small windows leading to the semi-circular area behind the Gray (you can also collect health power-ups here) and take cover. By this time, the Gray will have summoned additional Black Ops soldiers. Move from one end of the area to another, eliminating as many as you can, then jump back out into the open and continue firing on the Gray's shield.

Lore Items

1. Suicide Note—After you first enter the alien base, unlock the door to your left and head into the room; the document is on the floor between the item dispensers.
2. Theta Scan—Just after the room with alien turret guns, you will reach a "T" junction. Take the left path and head past the enclosed bridge to reach a small room. Scan the monitor to collect the lore item.
3. Cattle Mutations—From the aforementioned "T" junction, head right and into the next room. Activate the item dispenser from the center console, then scan the exposed datapad.
4. Human Autopsy—In the room with the second set of alien turret guns, you will be able to take the upper or lower exit doors after destroying the turrets. Take the upper door to reach a small room; the document is on the ground inside.
5. Alien Shield Memo—In the room with the Gray near the far right corner. Try to defeat the Gray before you pick up the memo if you want to stay alive.

STAGE 16: DESCENT

How to Take Out the Shielded Gray

After taking the elevator to the bottom level, you'll have to fight another Gray. Use the alien pods to the right of the Gray for cover and fire at the creature from a distance, using whatever weapons and grenades you have in your arsenal. If the Black Ops soldiers get too close, mow a few of them down and retreat behind the nearby pods.

How to Take Out More Shielded Grays

Near the bottom of the same large room, you'll have to fight two more shielded Grays, back to back. Use the same tactics as before—shoot at the Gray from the cover of one of the pods, killing the Black Ops soldiers when they get close. Concentrate on the Gray to your right first, as it poses the highest threat due to the nearby spawning of Black Ops soldiers. Once you have destroyed it, carefully advance down the platform and take out the Gray to your left.

STAGE 16: DESCENT continued

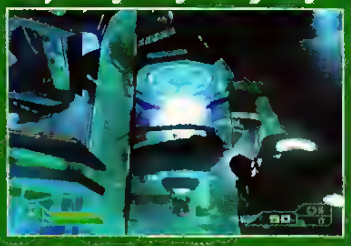

Lore Items

1. **Alien Base**—Collect this item from the left side of the landing platform just before the door.
2. **Lower Level Map**—In the first room you enter, activate the item dispenser from the computer on the right; the exposed lore item will appear near the glass.
3. **Hover and Propulsion Technology**—After taking the elevator down to the next area, look to your right after the elevator stops.
4. **Canister Cargo Orders**—After killing the first shielded Gray and crossing the bridge, look on the ground to the left of the next elevator before taking it down.
5. **MagLev Memo**—Look near the right side of the exit door after killing both shielded Grays.

Ask Mr. Gray

Q: Mr. Gray, I'm really having a tough time getting by those shielded aliens. Is there anything I can do to make things easier?

A: Our shield technology is far superior to any of your primitive weaponry. However, the shields may have a weakness to Meson projectiles.

STAGE 17: THE ASCENSION

How to Lower the Force Field

To lower the force field and progress through the level, you'll need to destroy the generators. The first generator is in the same room, just opposite the force field; look for the large, pulsating energy ball. To reach the second generator, head left from the force field room, up the ramp and down the other ramp beneath the Super Theta. In this next room, use the computer near the left wall to deactivate the force shield, then head into the room on the right to locate the generator.

BOSS BATTLE: Super Theta

The Super Theta is an "upgraded" version of the Theta creature; it's significantly stronger and more powerful than its smaller cousin. The BBG is the only weapon that can damage the creature enough to kill it. Once again, distance is your friend. Stay on the opposite side of the room and keep the creature away from you at all costs. Activate the weapon's targeting function and circle-strafe around the room, firing whenever possible. The Super Theta doesn't jump around like its cousin, but instead will charge intermittently and try to run you down. Keep your distance to avoid this, and quickly run to the other side of the room and continue firing. The Super Theta does not bring leapers into the battle, but instead will break the glass cases in the room, releasing alien life-forms to attack. When this happens, equip your shotgun and quickly kill the creatures, then switch back to the BBG to continue firing at the Theta.

Lore Items

1. **Alien Power Generators**—In the first room you come to, head straight between the item dispensers and into the sub-room. Scan the device on the wall to collect the lore item.
2. **The Super Theta Project**—In the room with the Super Theta, look to the right of the ramp leading underneath the encapsulated beast; the item is on the floor nearby.
3. **Crop Circle Origins**—In the room just past the contained Super Theta, check the center computer; using the computer activates an item dispenser containing the item.
4. **Scalar Teleportation Notes**—In the room after collecting the Crop Circle Origins lore item, check the right wall near the back.
5. **Meson Cannon Documentation**—After destroying the generators and lowering the force field, take the ramp leading to the upper level of the force field room. At the top of the ramp, head left and look on the ground.

STAGE 18: THE LAST EXIT

How to Destroy the Core

To take out the core, you must breach it first. Do this by destroying the six square doors that surround it. Once a door has been destroyed, a deadly stream of energy will leak out; take cover behind one of the rotating energy shields. Repeat the process until the core has been breached. The core will then tilt on its axis and two alien turrets will pop out of it. Continue to use the energy shields as cover while firing at each turret until it is destroyed.

Lore Items

1. **Stolen Technology**—Just after exiting the MagLev, check the landing platform on your left.
2. **Alien Turret Life-form**—In the room with the alien turret guns, look for this item on left side of the room near the door.
3. **Model of Satellite Ship**—After taking the elevator up to the core level and exiting the MagLev, look on the left side of the landing platform near the door.
4. **Core Specifications**—On the platform with the controls that extend the bridge leading to the core, look near the left side of the platform by the door.
5. **Galaxy Portal**—Just before exiting the alien base, look on the ground near the left side of the exit portal. Be careful when scanning this item; if you don't have at least eight or nine seconds left when you reach this area, you might not have enough time to scan it and make it out alive.

Strategy Guide by Wataru Maruyama

TimeSplitters™ Future Perfect

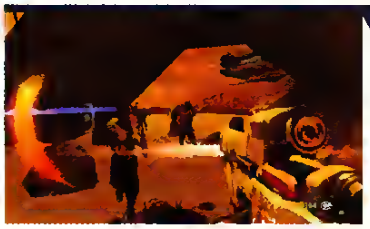

Future Perfect is the third game in the *TimeSplitters* series by developer Free Radical. Two of the biggest improvements this time are the deeper (and funnier) story and the massive amounts of unlockable features. You don't have to be familiar with the previous games to follow this latest plot, but there are plenty of little jokes and familiar faces for those who are. This guide covers the story mode and reveals all the unlockable characters and cheats, so stick around.

GENERAL TIPS

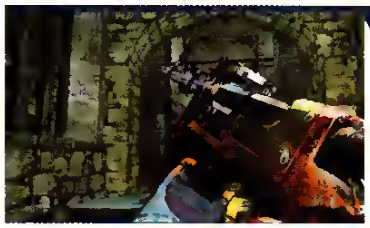

Rushing headlong into combat will earn you a one-way ticket to the "game over" screen. *Future Perfect* controls like most first-person shooters, but it has its own particular quirks which you'll need to get a handle on in order to be successful.

Tactics/Enemy A.I.

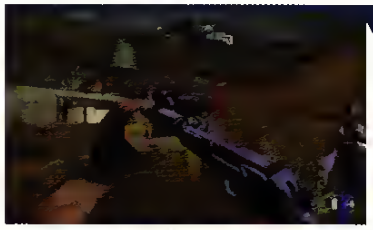

For the most part, the enemies aren't particularly smart. If they see you, they usually rush at you and become easy targets. There are exceptions, though, and I have pointed them out in the "Story Mode" portion of this guide. What they lack in smarts, they make up for with their aim. They know how to shoot and can punch plenty of holes in you in short order. Any bad guy with an automatic weapon or equivalent can bring down your health nearly 75% in just one encounter if you're not careful. All you need to do is to use cover—the old dodge-and-shoot is the key to staying alive. Simple strafing works OK, but is not nearly as effective. It sounds simple, but good cover is not always available in many missions, so you'll have to improvise.

Firing and Reloading

Headshots are the best way to dispatch foes, so focus on easily controlled, short bursts. The general time it takes to reload any weapon in the game is much longer than in most first-person shooters, so it's doubly important to not get too trigger-happy. Reload whenever there is a slight break in the action or use cover to buy some time.

Silencer Scope

There are only a few instances where you get to use an actual sniper rifle, but many missions feature the silencer with scope add-on for the handgun. Even when you don't need to be quiet, the scope feature is a great way to get the drop on waiting enemies, like those in the Khallos Express mission. Just remember that the handgun by itself won't give you the extra zoom feature that the silencer provides.

Explosive Elements

Exploding barrels are definitely a cliché, but you might as well take advantage of the ones in the game. They come in three flavors: the ones that explode immediately from gunfire, the kind that have a delayed explosive charge and those that leak fluid and can be ignited by a flare pistol or grenade projectile. Keep an eye out for these at all times.

Melee Attack

The gun-based melee attack is your last means of offense when you either run out of bullets or come face-to-face with an enemy and have no time to reload. "The Russian Connection" and "Breaking and Entering" are the main missions where this attack comes in handy as a means of silent enemy disposal. It's not very strong when directly facing an enemy, but it can knock them out from behind if you hit them in the head. The type of weapon you hold in your hand determines the animation and range of your melee attack.

In the Mansion of Madness mission, you get a baseball bat that is far more potent than the weapon-based melee attack. If only you could have the bat in any mission you liked...

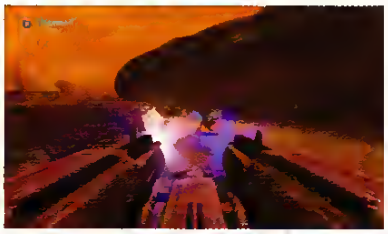

STORY MODE

So you're ready to take on the TimeSplitters, eh? Each mission has three difficulty settings, but the only real difference is that the enemies can take a lot more damage in Normal and Hard modes. Only the toughest portions of each mission will be highlighted here, since progression is very linear. Note: Spoilers have been avoided as much as possible, but a smattering of minor unavoidable ones are included for the sake of clarity.

2401: Time to Split

In most games, the first mission is nothing more than a dressed-up tutorial. Not in this case. Advance a little slower than you normally would and take out the initial group of Time Assassins. Next up will be some actual TimeSplitters who have the ability to cloak themselves and shoot lightning-like projectiles. Get a bead on their shimmering outline or the origin of the energy strike and you'll be good.

The last two sections of this area can be challenging. The first has you manning a stationary machine gun to take out advancing Splitters. Save the extra health kit behind the machine gun for later and concentrate on the onslaught. If you're having a hard time spotting them, slowly swing the gun from side to side and you'll have a good chance of hitting anything in your path. After that portion, you'll have another area that's in need of protecting from Splitters. This is a good time to throw out any grenades you have left, since you'll have a supply of them behind the barricade.

1924: Scotland the Brave

First, hang a left to the stranded boat to pick up a flare gun. Then make your way up the mountain until you reach a warehouse on the lower right side. Take out

all the barrels you see before closing in on the enemies inside. After picking up some items from within, get behind the wheel of the truck and motor your way to the castle. When you get to the castle door to plant the explosives, make sure Warrant Officer Cain has taken cover or he'll die in the blast.

Once inside, you can explore the various nooks if you like, although there is only one way out. Continue on until you're

needed to free the Jungle Queen from her cell. Go to the room on the other side of her cell and shoot a hole in the barrel. Ignite the leaking oil with either the flare gun or a grenade and she'll be free. The last tough obstacle in the mission is the tank in the courtyard. Fresh supplies of the K-SMG grenades are scattered all around, so hide behind the columns while going from place to place. Hitting the tank with a grenade stuns it long enough for you to plant the TNT on its back. The TNT is located in the corner enclosure and will reappear there after each use.

1969: The Russian Connection

This is the first mission where being stealthy comes in handy. Use your silencer and scope to get headshots of the patrolling guards. Hits to any other part of their body at this time will result in an alarm unless you speedily plug them with a few more rounds. Don't forget to head to the basement of the house where you'll find some armor. Two guards are also there, but you won't have to worry about them setting off any alerts, so take them out loud and messy. Keep advancing quietly and meet up with Tipper for a little sniper action. Save the exploding barrels until more than one soldier is next to it—and take care not to hit any that are near Tipper.

Once inside the facility, locate the main generator. The nearby engineer has the access card you need, so either knock him out

from behind or follow him as he does his rounds. If you want less resistance after powering up the blast doors, knock out all the engineers you see beforehand. Make sure they don't hear or see you knocking out their friends. Once the door is active, the facility automatically goes into high alert. Don't rush out to the main area, as you'll be exposed to fire from soldiers on the scaffolding and on the ground. Duck in and out of the door and use your scope when possible for faraway enemies. Tipper will be taking out his fair share too, so this shouldn't take that long.

1969: The Khallas Express

Take it slow as you traverse the train and make full use of your silencer scope. The enemies are clumped up in groups that will take off lots of your health if you don't thin them out from afar. When you get to the first helicopter encounter, blast through the boxes as quickly as you can and activate the rocket system at the far end. The second chopper appears after you clear the area that's littered with barrels and soldiers. From the roof, blow up and ignite all the barrels to clear out the enemy, then make your way down. A friend from the

future appears to help take out the chopper, leaving you free to give him cover fire. Your third encounter with the chopper is technically your second one. Isn't time hopping fun? Wait for a "lock on" before firing the rocket at the chopper. Make your way through the remaining sections of the train until you reach a gas-filled chamber. Use your gravity glove on the female statue through the glass to escape. Make sure you keep well stocked with machine gun ammo as it comes in handy toward the end of this mission. Further train navigation will lead you to an encounter with Khallos. He flies around with a jetpack, but he goes down extremely quickly from double machine gun fire. You can use your shotgun or handgun, but it will take a lot longer to disable his jetpack this way.

1994: Mansion of Madness

Pick up the flamethrower and baseball bat and you'll be ready to take on some undead. Don't waste your flamethrower on the zombies; just whack them in the head with your bat until their skulls fly off. Continue through the mansion until you get to the backyard, where some scientists are being held captive by ground worms. Walk around the garden to lure the worms to you and hit them with your flamethrower while backpedaling away from danger. Make sure you don't back right into another worm, though.

Head to the attic where you'll have a showdown with a pesky, fire-throwing ghost and more zombies—some of which are armed with shotguns! You should have a shotgun of your own by now,

and you'll need it to blow off some heads while you keep moving. You can't harm the ghost yet, so don't waste your time. As you make your way toward the catacombs, make sure you don't squander your shotgun ammo—you're going to need all of it soon. Approaching the fountain in the mini-courtyard awakens a giant worm. Circle around the worm and avoid its attacks as best you can. Some of his strikes move way faster than you can, making it impossible to escape completely unscathed. Keep blasting it with your shotgun until she's toast (yes, it's a "she").

1994: What Lies Below

You start off with just a revolver here, so I hope you've had enough practice getting headshots. Zombies move erratically, so tagging them can be quiet challenging. Find Jo-Beth and protect her from zombies until she can free herself. Grab the nearby shotgun and continue on. Jo-Beth is also packing now, so make sure you don't waste bullets on the same target. She has a tendency to hit the zombies in the gut just as you line up a good headshot. Electricity-shooting zombies will join the fray, so watch out for them. You'll get to a door that needs to be opened via computer hacking. Cover Jo-Beth while she works; you can probably get away with using your revolver rounds, as the zombies won't come down the tubes too quickly.

It's time once again to meet up with your future self—and he's got a crazy ghost-killing gun. Take out the zombies while he gets the ghosts. A little while later, you'll play through the same

section and will then be able to see and kill all of the weird, supernatural creeps that were threatening you before. Hopefully you haven't wasted the harpoon ammo, since it's the best weapon to take on the worm, a.k.a. Princess (I told you it was female). There is a barrel lodged in her mouth, just like the climactic scene in *Jaws*. Circle around until you get a clear shot at the barrel and ignore the bats flying at you. Circling should create a decent amount of distance from them anyway. Going at it with the shotgun is quite difficult, but not impossible. You'll then have to make your way out of the lab before it self-destructs. Rush past enemies and only take shots at them if they are totally blocking your path. You've got to boogie!

2052: Breaking and Entering

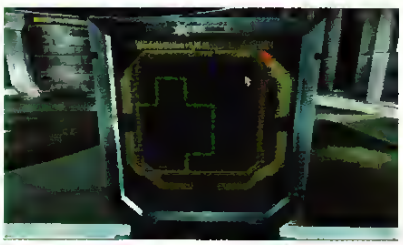

After observing a fellow intruder, go toward the back of the roof, take out the guard near the ramp with a quiet melee attack and grab his stash. Now go down the ramp and head left while keeping an eye out for patrolling robots and security cameras. Disable the laser trip wires by blasting the nearby wall panel and take out any cameras before heading into the security control room. Disable the security system and head back to the other area. Once inside the building, you'll still have to be alert for security cameras. Along the way, you'll pick up one of the coolest weapons in the game: the time grenades. Save them for later. You'll eventually find a room with a surveillance monitor that shows your potential ally, Amy Chen, pinned down by soldiers. If you take control of the remote gun and clear out the room for her, she'll deactivate some security measures for you.

To continue on through the office area, activate the cleaning robot so it can unlock a crucial door for you. Set off the fire alarm by blowing up the barrels in the next room. You'll hit a room that gets its windows blown out by an attack chopper, followed by a wave of soldiers. Take them out and use the time grenade as soon as the robot sentry enters the mix. Snooping around the women's bathroom will reveal some health and armor. Meet up with Amy and take out a robot waiting in a room on your left side. If you don't get him now, he attacks with a wave of soldiers later, and you don't want that. Once again you'll have to keep the enemies at bay while your buddy hacks the computer. The soldiers come through the doors and windows, so keep your sights on both. Once in Crow's office, a deadly mix of soldiers and robots will attack, which is the perfect situation for some time grenades. After all that, head down to the basement.

2052: You Genius, U-Genix

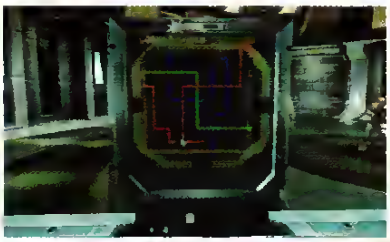

Obtain the security pass and go get sterilized. The place is in lockdown, so you'll eventually have to force the issue to make it through. Both you and Amy will be disguised at this point, so play it cool and follow her lead. After that, proceed to the area where some mutants are causing a ruckus and use your injector gun filled with darts on them. It takes just one hit and the mutants sort of destruct, causing damage to anyone nearby. You can often take out the soldiers and mutants at the same time if you hit the latter with the tranq darts.

Next up is a series of three puzzles that involve making connections between the same colored wires. The nature of the puzzle makes it confusing to lay out exact directions visually, so I've provided screen shots of the completed connections so you'll have a good idea of what you need to do. This may seem tough at first and you'll probably fail a few times, but once you grasp the concept it becomes easier. The first puzzle has green and blue wires, so start manipulating the tiles closest to the outside connectors of each color. After you reach the second tile away from the edge, you'll start to get a good idea of which way the tiles will need to flow in order for a connection to be made.

The second puzzle has three colors now, but the approach is the same.

Before tackling the third puzzle, you'll have to deal with railguns on the walls and spider-bots. After completing the last puzzle, finish off Crow's flying bots and you're done.

2243: Machine Wors

As soon as the mission starts, head back to the dead end to pick up a second pistol. Your foes are all metallic this time, but they still go down hard when capped in the dome. Continue on until you reach the tank and then get inside. Your future self will meet up with you to man the anti-aircraft guns while you handle steering and the main cannon. Blast through obstacles and enemy tanks. Once you're back on your feet again, take your time advancing through the legion of bots.

You'll find your way to the control panel that manipulates the giant Goliath battle mech. Have at the enemy jet fighters and lay waste to anything that gets in your way.

2243: Something to Crow About

The second part of this time period has some new surprises in store. The robot guards now have a side step that makes them much harder to nail with headshots. Fortunately, you will obtain the electrotool, which is super effective against robots and shields of all kinds. It's a tough battle to deactivate the power core: You need to shut down two shields first, then throw a grenade into the core itself. Accomplishing this will really stir them up; some droids and another giant Goliath mech will attack you. Keep moving and take out the droids first, then the Goliath. Despite its size, it doesn't take much to bring it down.

You'll meet tough resistance destroying the TimeSplitters' pods, but go easy on the electrotool as you'll need plenty of juice to make it to the palace. There's a bridge that you can cross, provided you have enough power left in the electrotool to temporarily activate it as you pass. Inside the palace awaits a four-legged robot, armed to the teeth. You need to methodically take out the weaponry on its body until it's completely helpless. Don't be afraid to unload everything you have, since you can't take these weapons to the next mission.

1924: You Take the High Road

Even though you're going back to the past, the soldiers are getting smarter. Surely this is a time paradox. They are less likely to rush you now and will wait behind walls and columns to ambush you. Very tricky. Also watch for steam pipes that spout damaging heat when hit by bullets. Things will get hairy once you reach the multi-level street area. There's not much cover and it's hard to spot guards who easily blend in with the background. Keep moving until you see the enemy, but don't travel too far ahead or more of his friends will join the fray.

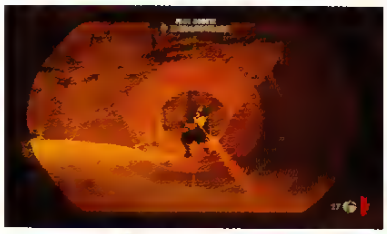

After surviving the mean streets, head to the control room and

activate the four engines needed to power the drill. Again, the open areas near the engines are prime areas for the enemy to gang up on you and land a few bullets before you know what happened. Once the drill has power, get in and enjoy the brief ride.

2401: The Hooded Man

This is a very short and relatively easy mission. Protect your past self by taking out the baddies from afar. The first major hurdle is manning the gun placement to bring down the mothership. Any missiles destined to hit you will be close to the center of the screen, so keep your radius of fire in that area. This should give you time to make adjustments and tag missiles that are off-center.

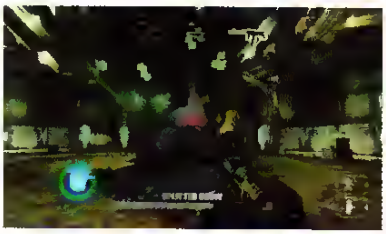

After the bridge blows, the next challenge is dealing with some TimeSplitters up close and personal in the hallway. You can

either take them out or rush past them to get to the elevator. This last part is the toughest section by far, as you need to use the sniper rifle to keep your past self safe. Keep your sights near Cortez and protect him as best you can. The Splitters who will inflict the most damage on Cortez tend to do it closer to him rather than hitting him from across the canyon.

1924: Future Perfect

Take care of the remaining Time Assassins and grab yourself the time crystals in the lower cavern. Making your way back up to the main area triggers the final boss fight with Crow. Plenty of K-SMG grenades and ammo will respawn on the surrounding boxes, so grab them whenever you need them. Try to save the armor until the boss fight is underway, and leave the heath pack on the outer ring for your second go at Crow if at all possible. You need to disable three of four weak points in order to make his backside vulnerable. Take out the legs first so you can safely destroy one of the guns from the side, then grenade his rear until his parts reactivate.

Repeat the process until a third of his health has been depleted. At this point, you need backup from yourself again to prepare for round two...er, round one, again. With Crow distracted by more targets, he's easy pickings now.

UNLOCKABLE CHARACTERS

67 characters are available from the start to use in the Arcade modes, but you'll have to put some effort into it if you want to unlock the remaining 83 (that's a total of 150 characters for the mathematically-challenged out there). We've divided up the methods for unlocking them by modes for easy reference. In Story mode, beating a level at the Normal or Hard difficulty setting will unlock both the Easy and the Normal/Hard characters at the same time.

grand theft auto™ The San Andreas Chronicle

Vol. 6

Pat Reynolds, Editor

Welcome to *The San Andreas Chronicle*, a monthly column that follows Carl "CJ" Johnson's path through *Grand Theft Auto: San Andreas*. Last month, CJ laid the groundwork for a daring robbery. This month, we'll take you through those missions and give you some new cheat codes to try out. Note: The walkthrough for this month assumes that you've already completed all of the other missions in Las Venturas. If you haven't done so, you'll need to complete them before you can finish the Caligula's Palace Heist in its entirety.

the Caligula's Palace Heist

Unlock Method: Complete the Explosive Situation mission
Mission HQ: The Four Dragons casino in Las Venturas

Architectural Espionage

Mission Reward: Respect

You'll need a camera to accomplish this mission. (If you already have one, you can skip this step.) Head north from the casino to find a camera-toting tourist. Acquire the camera, then follow the map to the City Planning building. Talk to the receptionist and then head upstairs, where you'll discover that the room you need to access is securely guarded. Go back downstairs and follow the marker on the map to find the air conditioning units. Destroy them to set off an alarm and evacuate the building. Now go back upstairs and photograph the blueprint of Caligula's Palace. The security forces will be looking for you, so you'll need to shoot your way out of the building. Return to the Four Dragons to complete the mission.

Key to Her Heart

Mission Reward: Respect + $5,000

To get a key to Caligula's Palace, CJ needs to follow one of the workers, Millie, as she heads home. Stay back and keep an eye on the Spook-O-Meter—if you get too close, you'll alert her to your presence and fail the mission. When she parks outside of the adult toy store, follow her inside. Walk into the red circle to trigger a short scene, then hit the changing room to get into a gimp suit. Leave the store and continue to tail Millie as she drives home. Once there, wait outside of Millie's house until her "master" arrives. Beat him down and then enter the house. Congratulations—you have a new girlfriend! You'll need to show Millie a good time before she'll let you near the keycard, though. Get your relationship bar to the 1/3 mark and you'll get a phone call from Millie. She's not home, but you can go to her house and steal the keycard. Mission accomplished.

Mission Note

• If you don't want to spend the time necessary to take Millie out on several dates, you can take her out of the equation by killing her when she comes out to meet you at her house for a date. Then you can simply go into her house and take the keycard.

Dam and Blast

Mission Reward: Respect

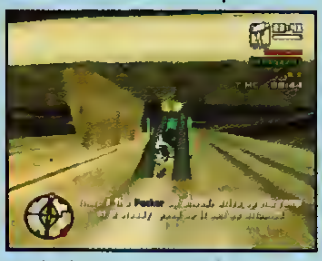

Drive to the airport and take the plane that's sitting on the runway. Head west to the marker. There's a red ring in the air, and you must fly through it before you can jump from the plane. If you miss the marker (by flying either too high or too low) just circle around in a wide loop, adjusting your altitude as you fly. Once through the ring, jump from the plane and parachute down into the red landing zone on the dam.

Move silently up the walkway (be sure to stay crouched) and take the knife. Use it to silently dispatch the patrolling guards and enter the dam. Inside, sneak to each of the large generators and plant explosives. Exit through the door at the far end (the one with the red marker). With the mission complete, swim to the nearby dock where you'll find a plane and a helicopter waiting for you. Pick one and use it to return to Las Venturas.

Cop Wheels

Mission Reward: Respect

For this timed mission, you must collect four police motorcycles and deliver them to the Packer truck cruising the highway that encircles Las Venturas. Although the city is usually teeming with police bikes, during this mission there are exactly four of them to be found, and they're all marked on your map with green dots. It's also all but impossible to find any other motorcycles, which makes it difficult to get around the city quickly. To further complicate things, you'll pick up a Wanted level of two stars pretty quickly. Go to each motorcycle location, quickly steal each bike and drive to the packer (identified on the map by a blue dot). After delivering each motorcycle, you'll need to quickly find another vehicle with which to travel to the next bike location. This is a tough mission; the only way to get through it is to memorize the location of each motorcycle and chart out the best routes for getting to each of them.

Up, Up and Away

Mission Reward: Respect

You can only activate this mission between the hours of 20.00 and 06:00. If you arrive too early, you can always head back outside to the save point and speed up the game clock by saving your game.

To begin this mission, drive to the military facility in the Northeast corner of the city. As soon as you go through the gates, the guards will sound the alert and you'll have to shoot your way through to the landing pad on the rooftop. If you don't already have an assault rifle, you can get one from any of the guards. Enter the warehouse through the open door to the left, and fight your way through until you reach the stairs leading up to the roof. On the roof, a pair of gunships will attack. Quickly man the machine gun there and shoot them both down, then steal the transport chopper and fly out of there.

Head to the location of the armored truck and pick it up with the helicopter's magnet. Now fly out to the abandoned airfield in the desert. Be sure to get enough height to clear the buildings of the city with both the chopper and the dangling truck. Carefully set the truck down in the red marker and then land the helicopter in the indicated area. With the mission accomplished, you can use the handy jetpack that's always located near the airfield office building to quickly fly back to the Four Dragons in Las Venturas.

Breaking the Bank at Caligula's

Mission Reward: Respect + $100,000

Drive to Caligula's and enter the casino. Make sure that you don't have any weapons out—if you alert the security, you'll fail the mission. Make your way to the security room to the far right of the building. Your keycard will get you through the door. Head to the generator room and lob a gas grenade into the open vent shaft to knock out the guards in the room below.

Zero detonates the charges you planted at the dam and kills the power to the casino. Activate your night vision goggles and head for the next security door. You'll come to the service area where the rest of your gang is waiting on the other side of a heavy garage door.

Locate the parked forklift and drive it over to the door. Use the right analog stick to raise the forklift and force the door open. The crew will bring in the armored car and police motorcycles as everyone readies themselves for a fight.

new cheat codes

Here are some new cheat codes for *Grand Theft Auto: San Andreas*. Enter the codes at any time during gameplay (not while paused). Use caution when activating any cheat codes, as they could corrupt your save file. Do not save your game after activating cheat codes.

Invulnerable to melee attacks and some types of weapons—Down, ×, Right, Left, Right, R1, Right, Down, Up, ○

grand theft auto San Andreas GIVEAWAY

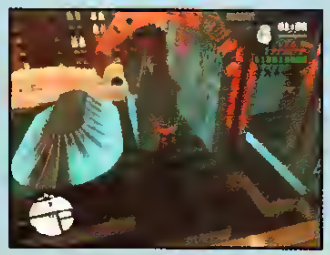

We're looking for ideas on how to improve *The San Andreas Chronicle*. Think about what you'd like to see in this column and send your suggestions to *The San Andreas Chronicle*, c/o *Tips & Tricks*, 8484 Wilshire Blvd., Suite 900, Beverly Hills, CA 90211. We'll choose the best suggestion and send the winner a prize package of *GTA: San Andreas* promotional merchandise that's not available in any store. All entries become the property of *Tips & Tricks*, so you can't sue us when we use your idea. Think hard!

The guards are out in full force now. Follow the team to the vault and keep them safe along the way. Move slowly and stay crouched, taking out each guard as he appears. Don't get too far ahead of the team, but stay far enough ahead so that you can clear each area completely of enemy threats before moving on.

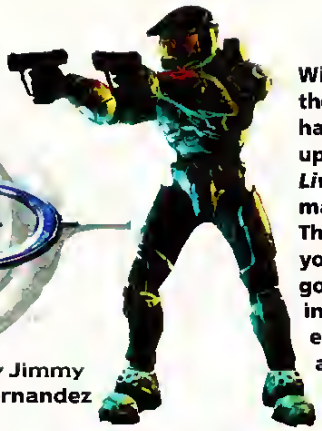

Once you reach the vault room, your team will prepare to blow the door to the safe while mafia tries to restore power to the generators on the floor above. Take the satchel charges near the door and head up there. Clear the room of thugs, throw a satchel charge into the room and detonate it from the hallway. With the generators destroyed, head back to the vault. Lead your crew back to the waiting van (the red blips on the map will lead you there.) The rest of the team exits in the van and on police motorcycles, leaving CJ behind as a diversion. Follow Zero's directions and the marker on your map to reach the elevator to the rooftop.

Once on the roof, make your way to the far edge and take the parachute. Jump from the rooftop and paraglide to the opposite rooftop with the waiting helicopter. If you miss the roof, don't worry: You can grab any land vehicle and use it to head out to the abandoned airfield and the end of the mission.

HALO INSIDER

by Jimmy Hernandez

With the release of *Halo 2*, the most popular Xbox game has been given a massive upgrade, incorporating *Xbox Live* support for online multiplayer matches among other refinements. This new monthly column will keep you informed with the latest goings-on in the *Halo 2* community, including trends, strategies, tricks, exploits and new discoveries... and of course, we'll also show you how to become a more lethal online combatant.

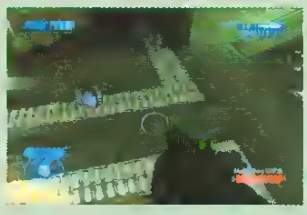

Vol. 6

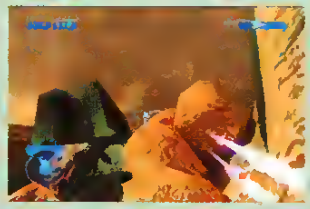

VERSION 1.1 AUTO UPDATE

On April 18, *Halo 2* developer Bungie released "version 1.1" of the game via an *Xbox Live* Auto Update. *Halo 2* users who logged into *XBL* on or after that date were immediately notified of the revision. Initially, Bungie's reason for the Auto Update was to fix some serious cheats and glitches; most notably, the dreaded "Standby" glitch (see *Halo 2 Insider* Vol. 4). Here's an official list of other glitches that have been fixed by the v.1.1 Auto Update:

Geometry Glitches

During Capture the Flag matches on the Colossus map, the bridge above the conveyor belts is removed to ensure that the Flags must be carried around the entire map. Previously, players found that if you throw the flag onto the conveyor belts below, it will bounce up to the other side where a teammate is usually waiting to intercept it and carry it to the nearby opponent's base.

Before the Auto Update, a player could basically "store" a super Sword lunge that could travel great distances (especially toward the sky) and reach some unintended areas like the top of a level. Not any more!

Often times, a player would enter the teleporter only to bounce back to where he started—usually getting killed in the process. Now the player cleanly passes through.

Other Changes

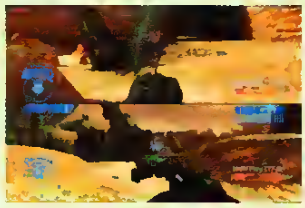

The two most noticeable changes are the shortened fuse timers of both the Frag and Plasma grenades and the increased damage caused by frontal melee attacks. Before the Auto Update, the Plasma grenade just didn't do much splash damage unless you stuck it to an opponent directly. This is no longer the case, as a Plasma grenade exploding near your feet can now kill you instantly (or deplete all of your shields at the very least). Similarly, melee attacks were previously only effective if your opponent's shields were almost depleted or if you assassinated an opponent (i.e. performed a melee attack from behind). Now, two frontal melee attacks will deplete your opponents' shields completely. Additionally, a jumping melee attack will now usually result in an instant kill.

Notable Glitches Not Fixed

While the most notorious glitches were fixed, there are a number of gameplay quirks that remain. Fortunately, most of the remaining glitches are relatively harmless and do not contribute to serious gameplay imbalance.

Burial Mounds: Reach the Top of the Level

You'll need a Warthog and a second player to do this trick. Make your way to this tall wooden support structure and position yourself against the beam. Now you'll need a second player to position the Warthog about one vehicle length away from your current position. The driver of the Warthog should place the reticule near the center of your body. While walking backwards, have the second player drive full speed into you. Yes, full speed! If done correctly, you'll be shot straight up, onto the rocks above where you can explore an area that you are clearly not supposed to be able to reach.

Zanzibar: Reach the Top of the Level

Make your way to the base and proceed to the top section where the gate controls are located. Just inside the base where you enter from the outside hill, break the second glass to the right. Next, stand in the window structure and position yourself as close to the edge as you can without falling. Now, crouch-walk forward until you can't move any further. Now turn your gun sights to the right, just off the window structure. Release the crouch button, and then walk forward. Once the screen begins to shake, press and hold the Jump button. You'll jump and land on the floor below, then immediately spring up through the ceiling.

Ascension: Secret Hiding Spot

Make your way to the Sniper gun located near the green teleporter. Stand on the ledge as pictured in the screen shot, then point your gun down and to the right, toward the foundation column below. Walk off the ledge by holding the analog stick in the **Up/Left** position, then release it approximately one second later. If done correctly, you'll land on the area below. Be careful, however; once you're at the bottom, you won't be able to move and you'll collide with the "death plane" very easily. Use this hiding spot in Head-to-Head or Oddball matches.

How to Stay Connected to *Halo 2*

One of the vital elements of a thriving community is the accessibility of all important information. For a community to grow and prosper, all of its members must be able to stay in touch with the latest goings-on, including new members, major events and all other important news. Like any other community, whether virtual or real, *Halo 2* is no exception. There are many free resources

provided for the player to stay abreast of all relative *Halo 2* information, including new Friend requests, game updates and even your own library of game stats.

Here's what you'll need to get started:

1) A computer with an Internet connection

2) A hotmail.com or msn.com e-mail address

Go to www.msn.com and download the free MSN Messenger. Once you've installed the program, sign in using your hotmail or MSN e-mail address.

On the left side of the MSN Messenger, click on the Xbox tab to bring up the Xbox/*Xbox Live* page. Next, click on the *Xbox Live* tab at the top of the page. Now you'll be able to view your *XBL* Friends list in real time, as well as the current featured article and the most popular *XBL* titles.

Here's where the real fun begins: Click on the "Add *Xbox Live* Alerts" button located at the bottom right of the messenger. With the Microsoft Alerts feature, you'll be able to receive information about new game releases, content downloads, *XBL* events, game invitations from your friends and more. You can have the information sent to you via MSN Messenger, personal e-mail, mobile phone or all three!

Once you've signed up for Microsoft Alerts on Xbox and linked your Gamertag, click on the "Change my Microsoft Alerts delivery" link. Here, you can choose to have all pertinent information delivered to the MSN Messenger, personal e-mail or mobile phone. The entire process is very straightforward. You can also choose *when* you want information delivered to you.

WHAT'S ON BUNGIE.NET?

Bungie.net is not your typical developer Web site where you merely browse various forums and post your thoughts. Well, you *can* do that, but there's so much more available for the *Halo*/*Halo 2* player. Most notably, gamers have the ability to view an illustrated recap of any previous match using the "Game Viewer."

Using a virtual layout of the specific game map, this remarkable feature details the exact spot where every single kill took place during the match. The individual player profile icons (selected when creating your player profile) appear at the exact spots where you were killed or where you killed an opponent. The arrow pointing to the corresponding player icon indicates which opponent you killed. Even more amazing, an icon of the weapon used to make the kill appears below the player icon! Just as an NBA player studies game film to learn his opponents' tendencies and moves, the *Halo 2* player who wishes to take his game to the next level can study the Game Viewer to identify various patterns and tendencies of his opponent ..as well as his very own. Equally important is being able to understand *why* you are always being killed in a certain area or by a certain weapon—the idea being that you will eventually learn from your mistakes. In short, the Game Viewer provides the player with a virtual replay of each match.

Here's how to access this feature at the Bungie.net Web site:

1. Set your Web browser to www.bungie.net. If you have a hotmail com or msn.com e-mail, click the "Sign In" button at the top of the page; otherwise, you'll be prompted to sign up for one of these e-mail accounts after you sign in. After this, you'll be taken back to the main page. At the top of the page, click on "My Stats," then go to "Games" and you'll be presented with a list of your most recent matches.

2. Select one of the matches and you'll be taken to a stat screen similar to the post-game results screen. From here, you can view your Kills, Player versus Player stats (who killed who), Medals earned, Hits (Shots Hit, Shots Fired, etc.) and lastly, the Game Viewer.

Note: Once you're in the Game Viewer, you have the option of e-mailing the specific web link of the Game Viewer for that match to a friend.

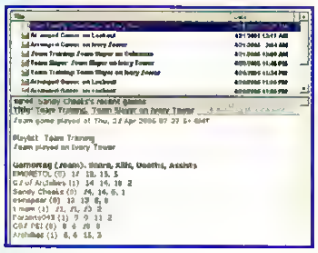

BUNGIE LOGO

Want to be the coolest kid on your block and truly represent Bungie.net? As a Bungie.net member, you have the option of having a special "Bungie net" logo appear next to your name in the pre-game lobby screens on *Xbox Live*. All you need is a hotmail.com or msn.com e-mail address. Once you sign in at the main page, click on "My Settings" at the top of the page. Next, choose "Web Settings" and turn on the "Show Bungie.net User Status" option.

HALO 2 RSS FEEDS

RSS is a Web content syndication format, the abbreviation stands for "Really Simple Syndication." In layman's terms, Web pages and all of the information therein can be designed to convert headlines or statistical information into an easily readable document, such as a brief e-mail. So how does this relate to *Halo 2*, and what is all this technical mumbo-jumbo?" Simply put, you can download a RSS-aware program and have all of your stats sent to you by e-mail almost immediately. Thanks to Bungie, you can subscribe to your very own RSS feed that gives you an up-to-date listing of the *Halo 2* games you've played on *Xbox Live* in the past week. The *Halo 2* RSS feed is the fastest way to access a quick summary of your most recent statistics—just like receiving an e-mail.

Setting up the RSS feed is a relatively straightforward process First, download a RSS-aware program; I recommend the one at www.sharpreader.net for its user-friendly interface. Once fully installed, simply sign in at Bungie net and select "My Stats." Click on the orange XML link, then copy and paste your unique stats Web address to your RSS program. Next, bookmark your XML Web address in your RSS program and you're ready to receive your most recent game summaries (number of kills, names of players, etc.) in a convenient e-mail format at the touch of a button.

SELECT GAME PREVIEWS

The purpose of *Select Game Previews* is to show you a select group of new and upcoming games so YOU can influence the contents of *Tips & Tricks*. Take a look and see what interests you, then write down the names of the games you plan to buy or rent and mail them to *Tips & Tricks Select Game Previews*, 8484 Wilshire Blvd., Suite 900, Beverly Hills, CA 90211. We'll total up your votes and use the results to determine which strategy guides we'll be featuring in upcoming issues of *Tips & Tricks*.

SOUL CALIBUR III

Publisher: Namco **In Stores: 4th Quarter 2005**

The two swords, Soul Calibur and Soul Edge, clash again in the epic battle between good and evil in *Soul Calibur III*. Soul Edge was sealed away and became nothing more than ancient lore. Soul Calibur was passed down between generations, its whereabouts unknown. It's the end of the 16th Century and the swords have reappeared, more powerful than ever. Unfortunately for Xbox and GameCube owners, *Soul Calibur III* is exclusive to the PS2 and will not feature "guest" characters like the previous game. It's also the first *Soul Calibur* title to be released on a home console before hitting the arcades. Three new fighters join the fray. Zasalamel, Tira and Setsuka. Zasalamel has lived many lives and fights with a scythe. Tira, the birdlike girl, travels with a flock of "watchers." Setsuka, in traditional Japanese garb, hides a katana in her umbrella. There are more stages than ever before, from breathtaking vistas we've come to know from the series to classic floating platform matches dating back to *Soul Blade* for the PlayStation. A character-creation option is being introduced, where players choose the sex, occupation and look of their character, as well as the type of weapon to wield. A created character can be taken into The Chronicles of the Sword mode and become a star! In Museum mode, you view the history of the franchise as well as any unlocked bonuses. Could Namco be including past games in the series like it did with *Tekken 5*'s Museum mode? We can only speculate at this point. More details on *Soul Calibur III* will follow as we get closer to its launch date

187: RIDE OR DIE

Publisher: Ubisoft **In Stores: August**

Also on PS2

Remember the first time you drove a bumper car, delighting in fender benders as your bloodstream flooded with adrenaline and sugar (from all the cotton candy and soda), filling you with road rage? Imagine that feeling and ramp it up tenfold. Add automatic weapons, an arena the size of Los Angeles and combat-worthy sports cars, and you get *187: Ride or Die*. Protagonist Buck (played by Larenz Tate from *Menace II Society* and *Ray*) is defending the streets of his mentor Dupree (Guerilla Black) against the territory-encroaching Cortez (Noel Gugliemi from *Training Day*). High-speed gunfights are depicted with blur and filter effects, and in slow motion. As if L.A. didn't have enough traffic problems...

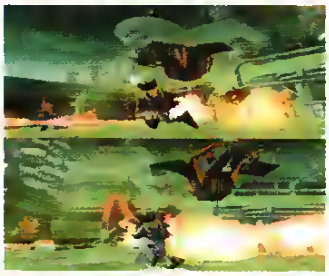

RATCHET: DEADLOCKED

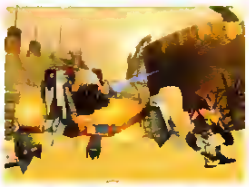

Publisher: Sony **In Stores: November**

Tips & Tricks Pick!

With every *Ratchet & Clank* sequel, Ratchet gets edgier and more intimidating. In *Ratchet: Deadlocked*, he's clad in a full metal suit, looking more like a ruthless cyborg than a cuddly platform-game hero. The game takes its cue from the popular on-

line portion of *Ratchet & Clank: Up Your Arsenal*; it will have online play as well as cooperative play. In a series of made-for-TV gladiator games called Dreadzone, Ratchet takes on wave after wave of enemies in massive, grimy arenas with the help of a squad of combat bots. Vehicles are scattered about to give you extra firepower in certain areas. Clank has been reduced to an advisory role and communicates through Ratchet's earpiece.

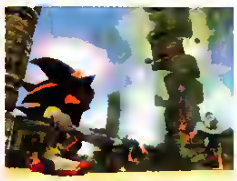

SHADOW THE HEDGEHOG

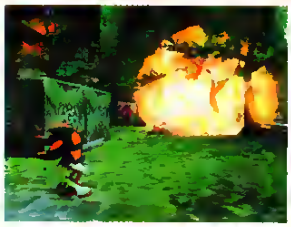

Publisher: Sega **In Stores: 4th Quarter 2005**

Also on GAMECUBE XBOX

Sonic takes a back seat while his former nemesis, Shadow, grabs the spotlight. In *Shadow the Hedgehog*, we learn more about this darker version of Sonic as he tries to uncover his past. Caught in a three-way battle between aliens, the G.U.N. army and Dr. Eggman, Shadow is forced to question his allegiance as he realizes he could be the one to tip the scales between good and evil. Multiple endings will reflect key decisions you made earlier in the game. The most alarming news can be clearly seen in these pictures—Shadow carries a gun! Sega hopes to establish Shadow as a regular franchise just like Sonic, so you may hear more about him in the future.

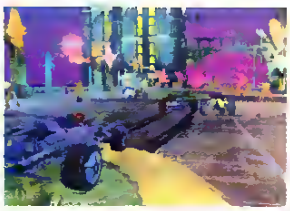

JAK X

Publisher: Sony **In Stores: 4th Quarter 2005**

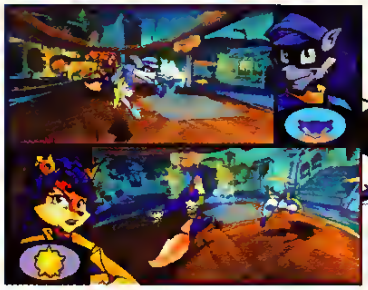

In *Jak X*, fans choose a character from the *Jak & Daxter* series and race on the streets of Kras City. Big-headed kart racing games like *Crash Nitro Kart* may come to mind, but *Jak X* is actually a hardcore combat racing game. Eco power-ups are scattered along each track, creating an intense war zone as you make your way to the finish line. Each of the 12 different vehicle categories can be upgraded after winning races. Your souped-up vehicle can then be taken online where you'll race against other players from around the world. Also in the works is a PSP game featuring Jak's furry sidekick, Daxter. The two games will connect to unlock special bonuses.

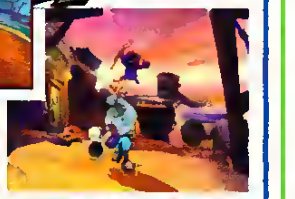

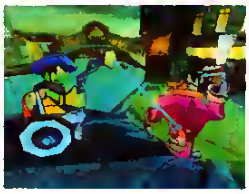

SLY 3

Publisher: Sony **In Stores: November**

In Sly Cooper's third game, Bentley is confined to a wheelchair, but he's outfitted it with deadly gadgets, making it officially "Bentlified." Murray, guilt-ridden by Bentley's condition, goes on a soul-searching voyage around the world. Sly learns of the location of the Cooper family fortune, a place where his thieving ancestors kept their loot. He also learns that the vault's been compromised, so he tracks down his friends. Joining his gang is the Shaman, a spiritual healer. Dimitri, the lounge lizard from *Sly 2*, has a change of heart and also joins Sly's crew. The new adventure takes them through some wild tangents including biplane dogfights, opera singing and even a drinking contest—with lemonade, of course!

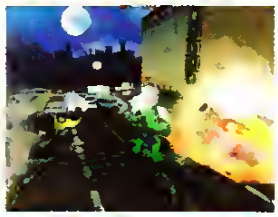

THE INCREDIBLE HULK: ULTIMATE DESTRUCTION

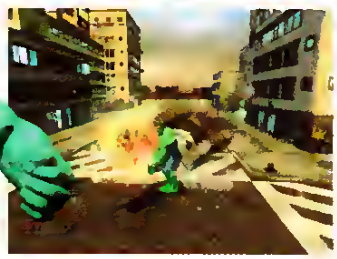

Publisher: Vivendi Universal **In Stores: 3rd Quarter 2005**

Also on PS2 GAMECUBE

Hi! Dr. Bruce Banner here. I'd like to tell you about the new video game, *The Incredible Hulk: Ultimate Destruction*. In it, you roam freely in a world where...where HULK WANT TO SMASH BUILDINGS AND YOUR FACE! Sorry. Award-winning writer Paul Jenkins (*Hulk*, *Spider-Man*) and artist Bryan Hitch (*The Ultimates*) collaborated to bring to life this authentic slice of the Marvel universe. Practically everything is destructible, and anything Hulk destroys, he can use as a weapon. In addition to the main story, there are optional quests, in non-linear gameplay similar to *Grand Theft Auto*'s "sandbox" format. .BUT HULK DOESN'T NEED CAR OR GUN TO CRUSH ENEMIES! HULK ASKS MOB TO BRING IT! Whew ..I'd better go lie down.

FANTASTIC FOUR

Publisher: Activision **In Stores: June**

Also on PS2 GAMECUBE

In *Fantastic Four*, you control the members of Marvel Comics' superhero team, instantly switching between characters depending on which super powers you need. Mr. Fantastic can stretch his limbs and use brain power to heal, hack computers and control enemy weapons. The Invisible Woman, aside from the obvious, is quick on her feet and can move objects or create force fields with telekinesis. The Human Torch is often on fire and can fly, while the Thing has rocky skin and super strength. Multiplayer modes include a two-player cooperative option and head-to-head battles. *Fantastic Four* is based on the 20th Century Fox film of the same name; it features an expansion of the story written by Zak Penn (*X2: X-Men United*).

SPARTAN: TOTAL WARRIOR

Publisher: Sega **In Stores: September**

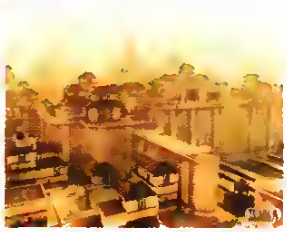

Also on GAMECUBE XBOX

As part of Sega's strategy to create more games for the western audience, it has teamed with an outside developer, The Creative Assembly (best known for the successful *Total War* real-time strategy games for the PC, like *Rome: Total War*). In *Spartan: Total Warrior*, you play as a warrior who experiences the brutality of ancient hand-to-hand combat on epic-scale battlefields. Mythical beasts and monsters also enter the slaughter-fest, adding some fantasy elements. The hero has a complex set of moves, like countering, combos, finishing moves and projectile weapons. The team's goal is to blow away *Dynasty Warriors* with hundreds of soldiers fighting on screen at one time.

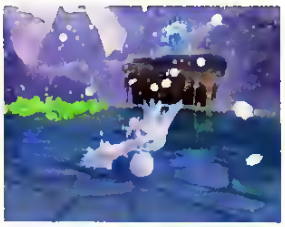

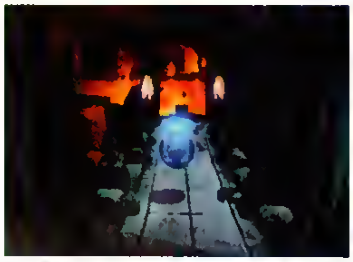

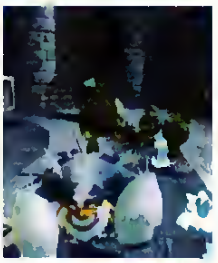

KAMEO: ELEMENTS OF POWER

Publisher: Microsoft **In Stores: August**

Getting shuttled between publishers and platforms like a ping-pong ball can have dire effects on the quality of a game. Luckily, developer Rare is an exception to that rule. *Kameo* uses an innovative transformation gameplay mechanic that allows the title character, a tiny elfin princess, to instantaneously take on stronger forms, sometimes while in midair. Kameo's varied personas include an icicle-throwing gorilla, a pummeling plant, a rolling armadillo and a fire-spitting dragon, along with many other forms. As Chilla the gorilla, she can even spike enemies on her back to save them for later! The bosses and levels are huge; fans of Rare's N64 adventures like *Banjo-Kazooie* will feel right at home in Kameo's universe.

BATMAN BEGINS

Publisher: EA Games **In Stores: June**

Also on GAMECUBE XBOX

After campy one-liners and ridiculously convenient repellent cans made Adam West's TV Batman a cultural punch line, Frank Miller entered the comics scene and pulled the Dark Knight back to his roots. Playing as the psychologically-scarred vigilante, you stalk your enemies and use fear as a weapon. Turn them against each other, interrogate them or beat them, using exclusive finishing moves that were created for the film of the same name. Drive the Batmobile across rooftops, dig in your Bat Utility Belt for the Batgrapple, Batarangs and other tools as you experience the high-flying lifestyle both literally and figuratively, moving back and forth between Batman and his alter-ego, millionaire Bruce Wayne.

MEOAL OF HONOR: EUROPEAN ASSAULT

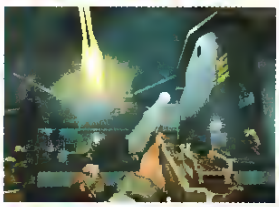

Publisher: EA Games **In Stores: June**

Also on GAMECUBE XBOX

MEDAL OF HONOR EUROPEAN ASSAULT

The *Medal of Honor* series is critically acclaimed for its authenticity, thanks to the assistance of the Congressional Medal of Honor Society and military technical advisor Capt. Dale Dye, who also worked as a consultant on previous titles in the franchise. In *European Assault*, you play William Holt, the first field agent for the OSS (Office of Strategic Services, precursor to the modern-day CIA) while fighting in the European theater during the turning point of World War II. Gathering intelligence gives your squad the advantage in upcoming battles, and the choices you make help to personalize your game experience. Real locations and more than 35 real-life weapons are featured. Multiplayer options include Tug of War and at least eight other modes.

ONIMUSHA 4

Publisher: Capcom **In Stores: 4th Quarter 2005**

15 years have passed since the evil warlord Oda Nobunaga met his fate at Honno Temple. But the evil force of the Genma merely grabs hold of his successor, Hideyoshi Toyotomi. The new "chosen one" for this era will be Hideyasu Yuki, a young warrior with a massive broadsword. Joining him are several selectable sidekicks, including Akane Jubei, a descendant of Yagyu Jubei from *Onimusha 2: Samurai's Destiny*. Hideyasu can choose a partner to join him at any time using the new Allies System; you'll be able to give commands to the other character and freely switch between them. You can also return to cleared stages with different partners and discover new enemies and items. *Onimusha 4* is currently the working title for the game.

TIPS & TRICKS PICK!

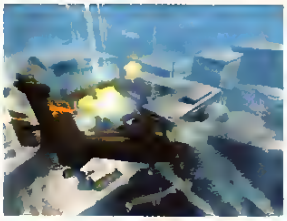

BATTLEFIELD 2: MODERN COMBAT

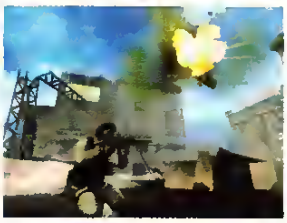

Publisher: EA Games **In Stores: November**

Also on XBOX

Battlefield 2: Modern Combat is an online war game where you choose to play as U.S., European Union, Chinese or Middle East Coalition troops. The maps are giant sandboxes with wide-open battlefields; you can hop in tanks, helicopters, planes, jeeps...basically anything you see. You can even call an air strike and demolish an entire area. The game also has a robust single-player story to cater to the console crowd. Two different development teams are working on the single-player and online portions of the game, ensuring that both modes will be finely tuned and polished. You heard it here first: *Battlefield 2: Modern Combat* will be one of the most popular online games on the PS2 and Xbox!

BATTLEFIELD 2 MODERN COMBAT

50 CENT: BULLETPROOF

Publisher: Vivendi Universal **In Stores: 4th Quarter 2005**

Also on PS2

After his debut album (*Get Rich or Die Tryin'*) went multi-platinum, 50 Cent continued to roll over his competition. A successful and ambitious man involved with cars, watches, clothes and movies, it was inevitable that his roving eye would eventually settle on video games. The game starts off when 50 Cent is ambushed and shot with nine bullets—yet he survives. Set in New York's corrupt drug underworld, he must untangle the truth while dealing with double-crosses, and go to war against several notorious crime families. Terry Winter, Emmy-award winning executive producer of *The Sopranos*, wrote both the game script and the script for 50 Cent's upcoming movie, also titled *Get Rich or Die Tryin'*.

50 CENT Bulletproof

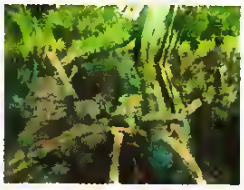

THE LEGEND OF ZELDA

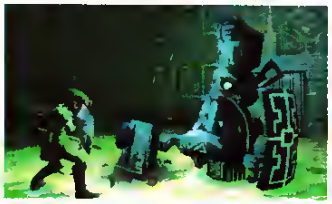

Publisher: Nintendo **In Stores: Possible in 2005**

Link's newest adventure abandons the cartoonish style of *Wind Waker* and returns to a more mature design sense. Footage revealed during the recent Game Developer's Conference showed him swimming through a school of fish, rescuing kittens, battling a Goron, fighting while mounted on his trusty steed, barreling through a group of enemies while riding a gigantic boar and resheathing his sword with the type of flair usually reserved for spiky-haired heroes in *Final Fantasy* games. A variety of enemies were shown, including boar-riding creatures that shot flaming arrows. There is even a disturbing scene where an empty landscape is suddenly filled with the appearance of hideous specters. We'll keep you posted as more details (like the full title) are announced.

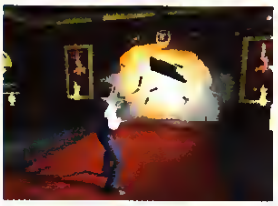

SCARFACE

Publisher: Vivendi Universal **In Stores: September**

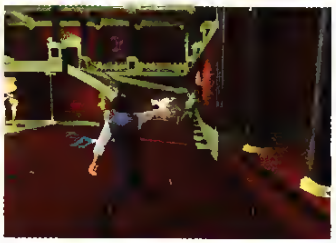

Also on XBOX

You wanna play rough? One of the movies' most notorious gangsters, Tony Montana, is finally coming to the video-game world. Developed by Radical Games, *Scarface* is based on the 1983 movie by Brian De Palma, but it features an original storyline written by David McKenna, known for his gritty screenplays like *Blow*, *Get Carter* and *American History X*. Players take Tony from a lowly street thug to a ruthless drug kingpin, traveling through the dangerous streets of Miami to the vacation islands of the Florida Keys and Bahamas. Tony has different methods of getting what he wants: he can negotiate, intimidate or simply break out into a gun battle. Tony also has a moral code—he won't harm women or children, just like in the movie.

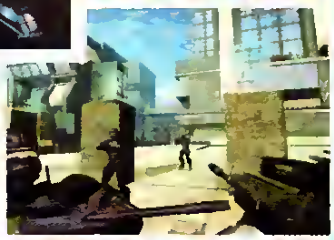

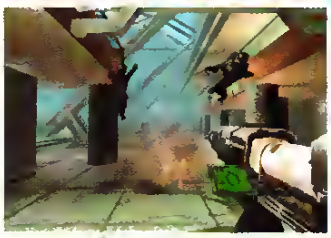

GEIST

Publisher: Nintendo **In Stores: 3rd Quarter 2005**

Geist stars John Raimi, a disease-control agent who is having the mother of all out-of-body experiences. After an investigation into the Volks Corporation goes wrong, his spirit is ripped from his body and he must rely on psychological terrorism and possession to rejoin the two. Living things can only be possessed after you terrify them by controlling objects around them, like lights and fire extinguishers. As an incorporeal ghost, you can move through barriers. When you possess different animals or people, you gain their skills, for example, mice can skitter through small spaces, while soldiers and engineers have access to restricted areas. In this creative twist on the survival-horror genre, *you* create the horror.

SAMURAI WESTERN

Publisher: Atlus **In Stores: June**

Samurai Gojiro Kiryu enters America's Old West, his lightning-quick blade slicing bullets like butter, eviscerating his enemies by the dozen while using his "Bushido Sense" to dodge and/or deflect a hail of ammunition. Like the bastard child of Akira Kurosawa and Sergio Leone, *Samurai Western* maintains a deadly serious aspect in the face of the patently absurd. The two-player option lets you play both a swordmaster and a pistol-packing gunslinger. There are many unlockables, including up to 25 playable characters, 20 weapons, 70 accessories and even customized poses for your hero to strike after administering a particularly satisfying butt-kicking.

BURNOUT: REVENGE

Publisher: EA Games **In Stores: September**

Also on XBOX

Not much is known at the present time about Criterion's latest installment in the *Burnout* series, *Burnout: Revenge*, but we did manage to score some information to tide you over for a bit. The gameplay is similar to last year's award-winning *Burnout 3: Takedown*; expect to cruise through rush hour traffic and leave a trail of destruction in your wake whenever possible. The Race, Crash and Road Rage modes have been upgraded, and there's an all-new Revenge mode where gamers will have to race against the clock while being forced to take out their frustrations on other vehicles. Look for updated info on *Burnout: Revenge* after the Electronic Entertainment Expo in May.

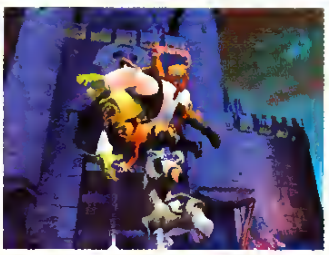

SHREK SUPERSLAM

Publisher: Activision **In Stores: Possible in 2005**

Also on PS2 GAMECUBE

Shrek SuperSlam is a four-person melee game set in fully-destructible 3-D environments. 20 characters from the *Shrek* universe duke it out, including Shrek, Donkey, Princess Fiona, Puss in Boots, Gingerbread Man and Prince Charming. Locations include sets from the movies, such as Dragon's Castle (where Shrek first rescued Princess Fiona), the Poison Apple bar and Friar Tuck's. Shrek uses the "silent-but-deadly" Green Storm attack, Donkey can juggle-punch opponents on his hooves, Puss brandishes his sword and Princess Fiona knocks out the competition using her fists of fury. The popularity of the *Shrek* movies and their clever parodies of classic fairy tales has made them favorites of both critics and fans. Who says it's not easy being green?

GUMBY VS. THE ASTROBOTS

GAME BOY ADVANCE

Publisher: Namco **In Stores: August**

To celebrate Gumby's 50th anniversary, Namco and Torus Games have teamed up to bring your favorite green bendable hero to the GBA with *Gumby vs. the Astrobots*. The Blockheads have kidnapped Gumby's friends and have hidden them throughout Toyland, and Gumby must battle his way through a variety of book worlds such as the North Pole and the Old West to save them. Players will be able to command Gumby's powers of stretching and morphing, while battling baddies in traditional side-scrolling platform action. Voices, visuals and even sound effects have been taken from the television series to give it that authentic Gumby feel.

NANOSTRAY

DS

Publisher: Majesco **In Stores: July**

TIPS & TRICKS PICK!

Nanostray is a 3-D shooter that employs all of the elements that fans of 2-D shooters like: fast-paced action, bullet-riddled screens, a varied arsenal of weapons, ridiculously huge bosses and gameplay that requires pattern recognition, fast reaction time and grace under pressure. Each of your ship's four weapons has a super-charged upgrade, great for annihilating entire fleets of enemy squadrons. Some weapons blanket the entire screen with hellfire! As your skill increases, you can compare stats with other *Nanostray* players across the globe by posting your numbers on the online Worldranking System, which will open when the game launches. This is the first DS game from Shin'en, developer of the smokin' hot *Iridion* games for Game Boy Advance.

TIPS & TRICKS PICK!

Nintendo's new virtual pet simulator allows gamers to raise, train and play with virtual puppies, from toy dogs (like the ones you see trembling in the designer bags of overhyped pseudo celebrities) to heartier canines like beagles, Labrador retrievers and German shepherds. By using voice commands to name and train your puppy, it will respond only to you—even if a different player calls its name during multiplayer. As your puppy's skills grow, you'll be able to take it out for longer walks, unlock new accessories and puppy breeds and compete in exhibitions. When you take your virtual puppy out for a stroll, the DS will "bark" to alert you when someone else's virtual puppy is in range.

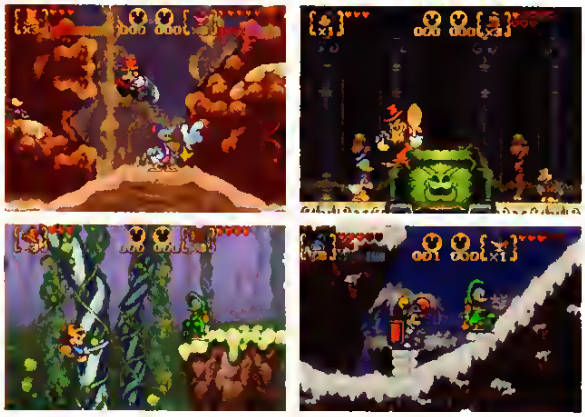

DISNEY'S MAGICAL QUEST 3 STARRING MICKEY & DONALD

GAME BOY ADVANCE

Publisher: Capcom **In Stores: June**

Magical Quest 3 is an enhanced, portable version of *Mickey to Donald: Magical Adventure 3*, a Super Famicom (SNES) game which was released in Japan only. When Huey, Dewey, and Louie are kidnapped by evil King Pete of Storybook Land, it's Mickey and Donald to the rescue. Playing as either character, you jump on top of King Pete's henchmen, pick them up and fling them or wear different costumes to perform special abilities, like shielding or casting spells. In a nice touch, the costumes also look and perform differently depending on which character you're using. The multiplayer feature includes cooperative gameplay, and there are some fun mini-games to unlock as well.

CALCULATING CHEATS

I'm writing in regard to a letter that Mike "Famicoman" Dankanich wrote in issue #117 about the Texas Instruments graphing calculators. Turns out, there are games and cheats for them. First, there are several types of game setups for these calculators; they have large screens and are basically like small, handheld computers, only cheaper. These types range from the puzzle pack to the MirageOS, and even independent running software that requires certain downloads to play. Second, there actually are cheats that the programmers use for testing these games that they decided to leave in. What they do is slow down the program, allowing easier play for certain situations. These can be used for almost all of the games, except for *Asteroids* and others in which the **ON** button can't be used for temporary pausing. The cheats can be activated by holding down the **ON** button (so it pauses), and pressing one of the function buttons as follows:

F1—Normal speed while no buttons are pressed, slow while they are

F2/F3—Normal speed (in some games, F2 or F3 can fast-forward)

F4—2x slow, 1x slow while buttons are pressed

F5—1.5x slow the whole time it is activated

GREAT mag; I love the *Halo 2* monthly column. Keep up the good work and I hope that you print my letter.

—Caleb Smith
Crestview, FL

Thanks for the scoop, Caleb. As it happens, the only calculator in the TIPS & TRICKS office is the one that's built into Chris B.'s N-Gage. Like Barbie says, "Math is hard!"

A TINY FLAW

I picked up a copy of your magazine a couple of weeks ago. Immediately I flipped to the section with all the cheat codes and passwords. I was mainly interested in the Game Boy Advance and GameCube cheats. Which brings me to the point of this letter.

I would like to point out a tiny flaw in the "infinite health/missiles/all upgrades" code for *Metroid* for the GBA. While it is true you start out with infinite health, you cannot play through the game more than twice. After you beat the game twice, you start taking damage from enemies. I'm probably not the first to point this out, but I thought you should know.

—Jason Rice
Evansville, IN

As a matter of fact, you are indeed the first to point this out to us. Nice catch.

MOLDY OLDIES

I have an idea for an article in *TIPS & TRICKS*. Every month (or every other month), take an old game from an old system (because everything is not about the newest systems) and do a strategy guide and show the cheats again. I even have a title for it: *Oldie Comebacks*, but it doesn't have to be that title. Stay cool!

—Michael Hodges
Fresno, CA

P.S. If you decide to use my idea please do the first one on *Grand Theft Auto: Vice City*.

That's a very interesting idea, and it's something we've discussed several times during the past few years. So let's pose the question to everybody: Should TIPS & TRICKS present strategy guides for older games? Keep in mind that we'd probably have to cut one strategy guide for a new game in order to make room. Please write to us and let us know what you think. And if the answer is "yes," tell us what vintage games you're interested in.

By the way, we agree that "everything is not about the newest systems." But are you so caught up in the hype about the next generation of consoles that you already consider the PlayStation 2 an "oldie"? When we started reading your letter, we thought you were gonna hit us up for strategy guides on Faceball 2000, Battletoads, Crusader of Centy, stuff like that. But Vice City*?!?*

WE'LL TAKE THAT BET

I've got some questions that I need answered.

1) How are screen shots of games taken? Are special machines used, and if so, are they available to the public?

2) Who checks your magazine for errors once it is finished?

3) Why were the *Pencil Puzzles* taken out of the magazine? I miss them!

Thanks a lot, I bet there's a 200th issue of *TIPS & TRICKS* one day.

—Mike Dallmeyer
Newport News, VA

1) We have our game systems hooked up to ordinary Macintosh computers, and we usually use a slightly outdated version of a program called Adobe Premiere to capture screens. It's nothing fancy, but hey—we're proud of the fact that we still take the majority of our own screen shots. Most of the other game magazines use screens that are provided by the games' publishers, and those are usually taken with the use of special development systems which are not available to the public. You'll often see publisher screens (like the Jak X *image below) in our* Select Game Previews *section.*

2) Our peerless copy chief, Philip, has that honor; he's the unsung hero of TIPS & TRICKS. Everybody say, "Hi, Philip!"

3) We had to remove the Pencil Puzzles *because the magazine's paper stock was changed, and the new stuff is not conducive to pencil markings. The* Pencil Puzzles *may come back in another form, though; we'll let you know if we can make it work.*

TIME MACHINE

Why in the world do you publish your magazine before the month starts? Like, I got the February issue on January 27th.

—Eric Nichols
Hersey, MI

That's a weird tradition in the publishing industry; magazines have been

doing that for as long as anybody can remember. If you walked up to a newsstand in June and saw the May issue sitting there, you'd say, "Man, that's old," and you might not buy it. We don't have complete control over the amount of time it takes for the magazine to get from the printer to the distributor to the retailer, so we work on each issue ahead of time and send them out early, just to make sure that all of the dealers get them in a timely manner.

Besides, you have to admit that it's kind of cool to get the new issue before the start of the month listed on the cover. You can hold it up above your head in front of all your friends and shout, "These cheat codes are from the FUTURE!"

IT'S ABOUT *TIME*

First, I would like to state the fact that *Tips & Tricks* is by far the best magazine ever created. You have the best qualities of *game magazine* history. Your magazine is like the *Time* magazine of the video-game industry. All of my friends and family love your magazine and believe that it's going to become a dynasty. Anyway, I would like to ask you an important question. I understand that you do cheats, previews, walkthroughs and some other things, but I don't understand why you don't do reviews and ratings. I think that if you rate your games, you could really help your readers by rating and telling us which games are worth the money and which aren't.

I believe that if you did this to your magazine, it would be the most ultimate and complete magazine established in the history of the United States of America. This new quality would bring in more customers and make your magazine better (not that it's not already the best).

—Casey Fannell
Tobyhanna, PA

That's a tough question. Undoubtedly, some of our readers would enjoy seeing game reviews and ratings in Tips & Tricks. To understand why we don't include them, you first have to consider what makes Tips & Tricks different from every other video-game magazine out there. It's not a magazine of opinions; it's all about facts. If a review-based magazine tells you that Spy vs Spy *for the Xbox is a bad game, you might not agree; in fact, you won't know if it's true until you check out the game for yourself, assuming the negative review doesn't discourage you from even picking it up. Now, if Tips & Tricks tells you that you can unlock all of the weapons in* Spy vs. Spy *by entering the password "WRKBENCH" at the Cheats menu, that's not a matter of opinion, it's a verifiable fact! It's very difficult to earn that kind of credibility by writing reviews, 'cause there's always going to be some nut job who disagrees with your opinions. And if we started reviewing games* **now**, *it would be very difficult for us to build a reputation as an authoritative source for reviews, especially when there are larger magazines that have been reviewing games since the late 1980s. We'd just prefer to stick to what we do best. But thanks for the compliments.*

BENEFIT OF THE DOUBT

I am having trouble with *Ninja Gaiden* for the NES because I don't know how to save my game. Can you please tell me how to save?

—Scott Anderson
Gonzales, CA

There are three possible explanations for this:

1) It's an old letter that fell behind a file cabinet in 1991 and was recently discovered.

2) Somebody's playing a practical joke on us

3) At least one of our readers never played the original Ninja Gaiden *until recently.*

We're going to assume that your letter is sincere, so here's a sincere answer: You can't save! Back in the NES days, players were tough as nails and didn't have the luxury of memory cards and built-in hard drives for saving games. Some games had battery-backed memory, but this almost always drove up the cost of a game by $10 or so. If you want the true retro-gaming experience, try leaving the game paused while you sleep or eat.

ALL IN DUE TIME

Are there going to be any cheats for Nintendo DS or Sony PSP games in your magazine anytime soon?

—David Rosenblum
Cordova, TN

Yes, sir—as a matter of fact, we've been working feverishly to play all of the DS and PSP games that we can get our hands on so we can find out what secrets they hold. As with any new system, it takes a while for us to get familiar with the new hardware and the type of cheats that developers like to implement. For example, we expect a lot of weird DS codes that involve tapping various parts of the touch screen or speaking specific words into the microphone. And the PSP is brand new; a lot of programmers are still figuring out what the machine is capable of.

Check back next month; we should have our PSP Tips *and* Nintendo DS Tips *sections up and running by then.*

WE ARE STUPID

This is the third time I've written to you, and you didn't write me back on my other two letters. I put a lot of thought into those letters, and all you do is just probably sit down and don't even bother to read them 'cause I'm from Arizona or I don't have proper writing or just because you're a jerk magazine or you're just lazy and don't care and I hope that your magazine is a failure and sucks and that Pelican Products stump you 'cause you suck. You're a stupid magazine and I hope you get crushed by every other magazine because you're stupid. I can't say you're stupid enough because you're too stupid, stupid, stupid, stupid. Write me back. Oh, by the way, the name's Jason Klaas. Let's see what type of insults you have, stupid.

—Jason Klaas
Phoenix, AZ

P.S. You're stupid.

Guilty as charged; those Pelican Products stump us every time. (?)

P.S. Tips & Tricks Associate Editor Geoff Arnold is from Arizona, and he ***goes out of his way*** *to read all of the letters that come from his home state.*

TOKEN OF THE MONTH

This month's token was sent in by Ben and Stanley Siems of Pocatello, Idaho; it comes from their "favorite place to go," a restaurant/arcade called Leo's Place in Idaho Falls.

Arcade players and operators: Send us a token from your favorite arcade. If we choose it as our "Token of the Month," we'll print your name right here. Tape the token to a piece of cardboard (so it doesn't come loose in the envelope) and send it to:

Mobile Games and Cellular Entertainment

gaming 2go

by Andy Eddy

So you've got a few minutes to kill, but you're nowhere near a console or handheld game system. If you've got a wireless phone, you might have a way out of that predicament....

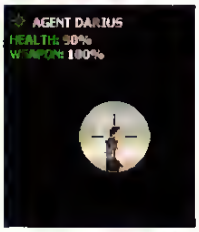

Hands-On With Sorrent

Sorrent invited *Gaming 2 Go* to its Northern California HQ to show some of its current and upcoming lineup. The first release is a game based on a Ridley Scott movie, *Kingdom of Heaven*, which stars Orlando Bloom and Liam Neeson, due to hit theaters on May 6. The mobile version has ten levels of action in which you alternate between the characters Balian (Bloom) or Sybilla (played by Eva Green). As you wend your way through dangerous terrain, you must sidle up to townspeople, who will flock to you and be led to safety. In the early levels, it's not too hard to navigate them through the hazards, but as the game goes on, the path to your goal is less direct, there are more hazards and in some cases you have to use the flock to get past an obstacle—such as having enough people to pick up a battering ram that can be used to knock down a door. In other cases, a large flock might actually hinder your progress.

Another movie-based game, *Mr. and Mrs. Smith*, picks up on the film's wild premise. A seemingly ordinary husband and wife are surprised to find out that they're both professional assassins—and that they've been hired to kill each other. Though the game's characters don't share a close resemblance to the flick's stars, Brad Pitt and Angelina Jolie, the action is fast-paced and retains the movie's conflict and comedy. The job at hand is to scan the neighborhood to separate the normal citizens from the undercover agents, then take out the agents. The game's night levels make it harder to accomplish the mission, and your choice of Mr. or Mrs. gives you different capabilities. He has more body armor, but she's better at stealth and has more ammo. Both the movie and game are due out in June.

YOUR PHONE IS DOOMED

If anything will get a mobile gamer excited, it has to be the news that id Software's John Carmack (co-creator of the *Doom* series) is starting to dabble in phone-based Java games. Carmack recently revealed that "a bunch of bad Java game demos" on a cell phone that was given to him by his wife were the impetus that convinced him to try his hand at some mobile-game programming. If you consider what this guy can milk out of a PC or console with a game like *Quake* or *Doom*, you have to have hope that he can do some magic on a phone.

John Carmack

After determining what was possible (Carmack ruled out multiplayer games due to network latency and fast-paced action games because of the difficulty in using a phone's keypad for game control), he started working—"about a day a week"—on a game he called *DoomRPG* or "*Bard's Tale* meets *Doom*." Among other things, Carmack is learning that Java's claim of "write once, run anywhere" isn't coming close to reality; he's tested his code on four platforms and found that no two run the same way.

It sounds like an interesting experiment—one that could bring some incredible results, if Carmack's previous efforts are any indicator.

N-GAGE: Less Green, More Racing

Nokia made some dramatic price cuts in hopes of making the N-Gage QD and its accompanying software that much more compelling. In March, the company reduced the price of its handheld device to $100, though the Finnish phone giant also acknowledged that service contracts with mobile-phone carriers might reduce the cost even more. It also cut the prices for games to a range of $15 to $25, with *Tom Clancy's Splinter Cell: Chaos Theory* being the first title to have a smaller price tag.

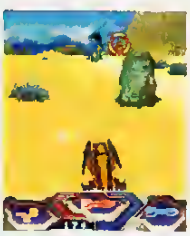

As for upcoming titles, Nokia showed a couple of cool racing games. *System Rush* is a futuristic racer in the style of *F-Zero*. The deep comic-like story features hackers trying to break into corporate Web sites to steal logic code. These networks appear like racetracks, and by successfully navigating the tracks, network security is broken down. There are 55 races in total, giving you plenty of competition—and with two-player Bluetooth racing added to the package, you'll have a lot to do.

Perhaps the most fun aspect of *System Rush* is that Nokia, as part of its marketing campaign, will have actual URLs with sites that appear to get hacked. Those sites will in essence feed into the storyline, but also serve as sites for players to update themselves on news and leaderboards. *System Rush* is targeted for a June release.

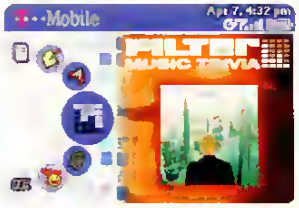

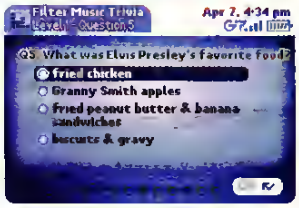

The other new N-Gage racer is *Payload*. As the game starts, your character finds himself caught trying to sneak onto a planet with a false ID. In an attempt to work his way back, he takes a job piloting a "skin" and delivering Itherium, a blue energy source that's abundant in the world. The racing is accompanied by more combat than *System Rush*, but the races had a similar futuristic feel. Multiplayer is promised for up to four players via Bluetooth, with a high degree of customization options. *Payload* is scheduled to come out in August.

FILTER MAG'S MUSIC TRIVIA

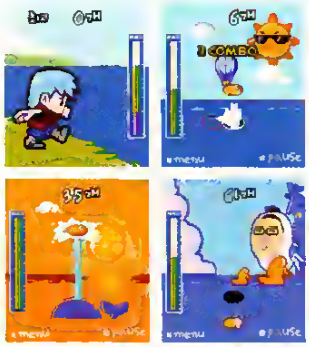

Filter magazine has joined forces with Danger—the maker of mobile devices such as the hiptop 2 and the Sidekick 2 for T-Mobile—to create the Filter Music Trivia Game, which launched during the recent South by Southwest music festival in Austin, Texas. Winners of the trivia game can get a free Moby ringtone from his *Raining Again* song off his latest album, "Hotel."

I-play: On a Mission

Global publisher Digital Bridges put on a new coat of paint in April, changing its name to I-play as well as rebranding its company with a mission to "make mobile gaming the world's most popular form of electronic gaming."

The company started by launching its iplay.com Web site as a easy-to-use e-commerce store. And it stocked that site with a higher number of casual games than it had previously released—billing some of the games as "one-thumb play" titles, intended to appeal to gamers and nongamers alike. The first new game in that plan is *Skipping Stone*, which comes by way of Korea, where it's already a hit. The title is billed as a "highly compulsive" game that requires the player to skip a stone across a lake as many times as possible using a power gauge and a timed release of the stone, as well as subsequent button presses upon each skip to make it travel farther.

I-play also formally announced the planned releases in North America of *Nate Adams Freestyle Motocross* and *Maria Sharapova Tennis* (see Gaming 2 Go, April 2005). The motocross challenge was slated to be released in May, while the tennis title is due to hit the market in July—not long after Sharapova goes back to Wimbledon to defend her 2004 championship.

Alienware, Kyocera Share a Pad

Powerful PC maker Alienware has jumped into the mobile-game market by announcing that it's partnering with handset maker Kyocera to create gaming accessories designed for use with mobile phones. The first device revealed: the Kyocera K500 Gamepad, which connects to Kyocera's KXS "Slider Remix" phone. Both the phone and gamepad are expected to be available this fall.

MOBILE GAMING NEWS

• In-Fusio Pairs Partnerships— In-Fusio has agreed to a multi-year pact to bring "the characters, stories and activities from the virtual world of Neopets.com" to mobile devices. Plans call for the Neopets owners to be able to access and interact with their Web-based creations and the unique persistent universe from their handsets. In-Fusio expects to have the application available internationally in the third quarter, and it will also create additional Neopets content (wallpapers, ringtones and animated clips). The publisher separately announced a licensing deal with Universal Studios Consumer Products Group that will enable it to offer mobile games, ringtones and logos based on Universal's *Battlestar Galactica* and *The Munsters* TV series. The first products under this partnership are also targeted for a third-quarter release.

• PSP Catches Some Flicks— In another Hollywood connection, several film studios committed to releasing UMD (Universal Media Disc) versions of their movies, giving owners of Sony's PSP handheld an opportunity to watch feature-length flicks. In addition to the *Spider-Man 2* film that came with the PSP's Value Pack bundle, Sony Pictures Home Entertainment announced availability of such films as *Hellboy*, *Once Upon a Time in Mexico* and *Resident Evil 2*, with more titles to be announced later. Disney's Buena Vista Home Entertainment offered five movies—*Hero*, *Kill Bill Vol. 1*, *National Treasure*, *Pirates of the Caribbean: The Curse of the Black Pearl* and *Reign of Fire*—with other UMD film releases to be announced later. And Lions Gate Home Entertainment announced that it would ship a dozen movie titles on UMD (including *The Punisher*, *National Lampoon's Van Wilder*, *Saw* and *Total Recall*) that it hoped would help the PSP "go well beyond the standard gaming environment."

• LG, ATI Chip Away Together— LG Electronics has tapped chipmaker ATI Technologies to provide its SV360 phone with advanced graphics capabilities. When the SV360 comes out later this year, ATI's Imageon 2300 media processor will be at its foundation. The chip enables high-resolution graphics of over 10,000 triangles per frame, support for hardware-based 3-D acceleration under the OpenGL ES 1.0 API, MPEG 4 playback at 30 frames per second, low power consumption and more. The phone is due out in Korea later this year, but no date has been set for a North American release.

• It's Not Just About Kiddie Games— While the mobile market has more casual games, arcade-style titles and ringtones than you shake a phone at, it's obvious that there are some companies looking to cater to more mature interests. For example, with the boom in online poker for money, it was just a matter of time before someone offered up the cards for those with a little idle time and a mobile phone. While PokerRoom.com's *Texas Hold 'Em* game has an offline "play money" side for practice, the true gamblers will want to take on the world in real-money games. Three different views enable the player to be comfortable with the game on their screen, and with a claimed user base of 3.5 million, you'll never lack competition.

BROWSE THE WEB ON PSP

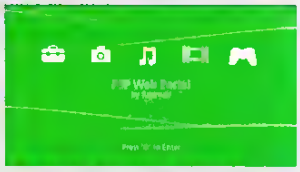

One of the most amazing features of the PSP (aside from its huge, crystal-clear display) is the unit's online capability. For some reason, Sony has been slow to roll out the full functions of the PSP's online capabilities in this country. Currently in North America, Sony first-party titles like *Twisted Metal: Head-On* and *Gretzky NHL* can be played online through the Infrastructure mode if you have access to a Wi-Fi connection. Sony is expected to roll out a web browser for the PSP, but some clever users have already found ways to tap into the PSP's Internet functions thanks to a special feature in Sony's *Wipeout Pure*. As of press time, connecting to the "Download" option in the *Wipeout Pure* main menu will only show a "Coming Soon" message. The message is actually a webpage on the Sony server, so in a sense you are already browsing the Internet. Some crafty web designers have managed to create web portals that can be viewed on the PSP through *Wipeout*'s Download option. By re-mapping the DNS protocol in the PSP's Network Settings menu, you can "trick" the PSP into displaying a "homebrew" Web portal instead of the *Wipeout* page. The following instructions assume that A) you can already get online with your PSP using a nearby Wi-Fi access point and B) you have a copy of *Wipeout Pure*.

Enter the Network Settings option in the PSP's main menu. Select Infrastructure Mode and press △ to edit the settings. Enter a new name for your connection if you wish. Scroll to the right and leave the WLAN Settings alone, since you have probably established the SSID already. Under Address Settings, select "Custom." The IP Address Setting is usually "Automatic" for most Internet providers. Set the DNS Setting to "Manual." We know of two web portals to choose from: GameTab's PSP Portal or the PSP Portal created by Jonathan Terleski (a.k.a. fugimax), a student at Carnegie Mellon University. New PSP web portals are popping up on the web on almost a daily basis, so these aren't the only ones. Enter one of the numbers shown here as your Primary DNS.

GameTab's PSP Portal: 66.98.192.68

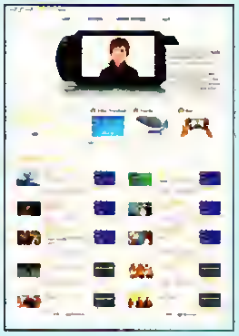

PSP Web Portal by fugimax: 67.171.70.72

Select "Do Not Use" for the Proxy Server setting and save the new Network Setting. Now start up *Wipeout Pure*, select "Download" from the main menu and connect with your new connection settings. *Voila!* You can now surf the Web! Press ✕ to bring up the PSP keyboard screen if you want to type. Granted, Web surfing is rather limited on the PSP, especially with the clunky keyboard interface. You will also need to use the D-pad to scroll around to view most Web pages, since they are too large for the PSP screen. Not all Web sites will work, especially if they use Flash. Of course, downloading anything from the Web is impossible.

It's actually possible to increase the speed of your PSP's Wi-Fi connection if you're having trouble loading up web pages. Select the "Settings" menu in the PSP's main menu. Go to "Power Save Settings," scroll down to "WLAN Power Save" and switch it to "Off." This can increase the stability of your Wi-Fi connection—but it will also drain your battery faster, so you may want to switch it back on when you're done surfing the Web.

PSP CONNECT

After hearing for months about how the PSP can play music, movies and pictures, many PSP owners are still scratching their heads trying to figure out how to do those cool things. Oddly enough, the PSP manual offers very little when it comes to explaining all the capabilities of your PSP. Stranger still is the fact that there is an official PSP online tutorial which isn't mentioned anywhere in the packaging! The official PSP page can be found at psp.connect.com and it offers an excellent beginner's tutorial on how to put music, pictures and videos into your PSP. Also available on the site is a selection of small sample video clips to put in your PSP, including an episode of *Speed Racer*! Sony's video conversion software for the PSP, *Image Converter 2*, is also available for download at the site for a $20 fee. The software lets you easily convert videos on your computer to a PSP compatible format.

PSP ONLINE IN KOREA

The PSP was launched on May 2nd in Korea, and unlike the Japanese and North American launch, the Korean PSP is Internet-ready right out of the box. The Korean PSP serves as a pretty good example of what we should expect to see when Sony kicks off the online functions of the PSP here in the U.S. The PSP Value Pack in Korea comes with a Network Utility UMD Disc that lets you sign up for the NESPOT wireless service by KT Corporation, an Internet service provider in Korea. In addition to surfing the Web, users can access Sony Computer Entertainment Korea's PSP Club and enjoy various streaming content, including movies, music, trailers and online games. There is a monthly fee (approximately $5) for using the PSP online service, but early adopters of the PSP in Korea can enjoy the service for free until August.

Nyko's Theater Experience offers the same charge capacity as the Charger Case (see below) but adds speakers and a pivoting stand so you can enjoy your PSP like a miniature home theater. Available for $79.99.

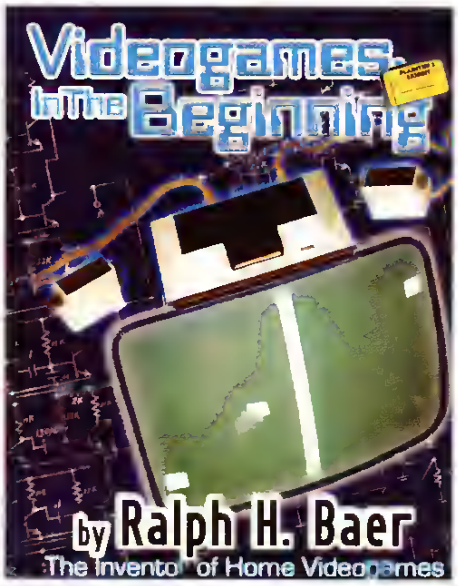

Everyone who has a PSP will tell you that the screen is a magnet for fingerprints and smudges. Nyko's new Screen Armor device folds over the screen to protect the most important part of the PSP when it's not in use. The metal screen will also protect it from any scratches. Get one for $9.99.

If you've been holding out for different-colored versions of the Nintendo DS hardware, you'll finally have a choice in June, when Nintendo releases this "Electric Blue" DS model. It's not a limited-edition unit, just an alternate option for those who want something different from the original "Titanium" (silver/black) model.

Gamester's Xbox Phoenix Plus controller is officially licensed by Microsoft. It's the ideal controller for the first-person shooter fanatic; it has a unique tension dial that lets you adjust the stiffness of the analog stick. You can also invert the right thumbstick on the fly with a push of a button. Available in three different colors for $24.99.

Videogames: In the Beginning is a fascinating new book by Ralph H. Baer, the "Father of Video Games." With a mountain of meticulous documentation, vintage photos and original schematic drawings, Baer explains how he not only invented the home video game (way back in 1966), but also successfully brought it to market and continued to develop innovative electronic entertainment products right through the end of the 20th century. A companion CD-ROM is also available with high-resolution scans of Baer's schematic designs as well as video footage of the pioneering game console he created. Visit the book's publisher online at www.rolantapress.com for additional information.

Nyko's Charger Case for the PSP not only protects your most prized possession from bumps and scratches but also gives you 200% more battery life. Inside the case is an extra rechargeable battery that keeps your PSP charged and give you extra playing time. The sleek aluminum case is also water resistant, although we don't recommend dunking your PSP underwater! Available for $69.99.

Madden NFL 06: First Look

We still have a little ways to go for the release of the most anticipated sports game of the year—*Madden NFL 06*. Some early information and pictures have trickled out for the next *Madden* and immediately we can see that the Madden logo has gone through some changes. The game will also be called by the new "06" numbering system instead of "2006". Last year's Madden ramped up the defensive side of the ball with more intricate defensive audibles and the new favorite Hit Stick. In *Madden NFL 06*, the passing game will see significant changes and improvements. QB Vision Control and QB Precision Placement are the new catch-phrases for this year's Madden. Until now, football games never really paid attention to quarterback vision, when in real life defenders are always trying to read the eyes of the quarterback to anticipate where the ball will be thrown. For example, NFL players will tell you that Tom Brady, star quarterback of the New England Patriots, is the best at looking off a defender and delivering the ball. QB Vision Control is represented by a conical projection emitting from the quarterback (see the photo with McNabb moving to the right). Your throwing accuracy will be higher if you pass to a receiver in your field of vision. Naturally, great quarterbacks—like Peyton Manning—will have a wider field of vision, while myopic quarterbacks—like "The Bachelor" star Jesse Palmer—will show a narrow strip. QB Precision Placement lets you determine exactly where the ball will be placed when throwing to a receiver—even down to which shoulder the ball will be tossed over. Although the new features give more control to the passing game, it is also meant to help the defense be more aware of what's happening on the field. All too often, *Madden* games turn into high-scoring bomb-fests with hapless cornerbacks getting burned by off-screen receivers. In fact, the game's developer, EA Tiburon, gets wise to a lot of *Madden* players' cheap tricks by watching the national *Madden Challenge* competition each year and making changes to the game in order to discourage unfair play. Hopefully, these refinements will level the playing field a bit. That's all we know so far about *Madden NFL 06*, but more info will be sure to follow. With the new features, the exclusive NFL license and new ESPN presentation, the expectations for *Madden* are higher than ever before!

In *Madden NFL 06*, players' heads will turn to track the ball in flight

POKÉPARK OPENS

Children all over Japan have started pestering their parents to take them to the newly opened Pokemon the Park 2005 (a k.a. "PokePark") in Nagoya, Japan. Like a dream come true for Pokemon fans, PokePark is the first-ever amusement park based on Pokémon characters. The park has 12 main attractions and more than 380 Pokémon characters, as well as a few arcades, shops and Pokémon-themed restaurants. Some of the attractions include the Pokémon Giant Ferris Wheel, Lugia's Spinning Ship, Pikachu Forest, Bumper Car Battle: Aqua vs. Magma, Twister: Fury in the Sky, Pokémon Merry-Go-Round and more. Kids are also encouraged to bring their GBA, GBA SP and Nintendo DS along with *Pokémon* games so they can download special bonuses at various download stations set up in the park. For example, if you bring a copy of *Pokémon Ruby, Sapphire, Fire Red, Leaf Green* or *Emerald*, you can download a special Pokémon egg that hatches into a surprise Pokémon with special powers you won't normally earn in the game. Special courses are also available for download into *Pokémon Dash* for the Nintendo DS. To celebrate the opening of PokePark, Nintendo has issued a special edition PokePark Nintendo DS. The blue DS sports the PokePark logo on the outside and has a Pikachu symbol next to the screen. The unit costs 15,000 yen (about $140) and is only sold at the park and in select Toys 'R' Us stores in Japan. PokéPark is a temporary amusement park and will end its operation on September 25th, thus crowds have become a huge problem. Several frustrated parents have been reporting that some rides can take up to four hours waiting in line. Parents have also been critical of the cost of the park, not only do you need to purchase a pass to get in, but every ride has a sperate, additional cost! Parents with Pokémon-crazed children, however, have little choice but to brave the mob.

Nintendo Sound Collection

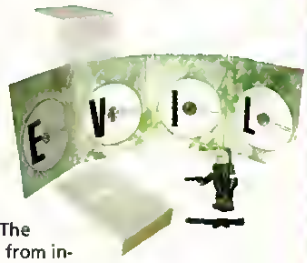

Feeling a little like Peach today? Club Nintendo, Nintendo's points reward system in Japan, is giving away Nintendo soundtrack CDs called *Nintendo Sound Collection*. The CDs contain music from various Nintendo games on the N64, GBA and GameCube. Two *Nintendo Sound Collection* CDs have been released so far: *Vol. 1: Peach* and *Vol. 2: Koopa* (Bowser in the U.S.). The *Peach* disc is the "Healing Music" collection, featuring some of Nintendo's mellower tracks like "Waterland" from *Super Mario 64*, "Zelda's Theme" from *The Legend of Zelda: Ocarina of Time* and the title track from *Animal Crossing*, just to name a few. Koopa's disc is the "Loud" collection, with more aggressive selections like music from *F-Zero X*, *1080 Snowboarding* and *WaveRace 64*. Next up is the Luigi collection, but we're not sure what kind of music it will feature. "Scared" music, perhaps? We've seen a couple of these awesome CDs on Japanese auction sites, so look around!

SNAKE EATER EXTREME BOX

Konami put together a special edition DVD box set for the true hardcore *Metal Gear Solid* fan called *Metal Gear Solid 3: Snake Eater* Official DVD. The Extreme Box. The set comes with four DVDs, a 192-page booklet and a rare "Croc Cap Snake" Kubrick figure from Medicom Toys. The contents of the DVDs range from insider playing tips to developer commentary.

Disc 1 "The Extreme"—Step by step playing tips for getting a Foxhound rank at the Extreme difficulty setting.
Disc 2 "The Variation"—Basic techniques for playing the game (i.e. boss battles, area maps, item locations, etc.)
Disc 3 "The Intermission"—The "fun" disc with special "Find Snake" mini-games, karaoke selections and bonus movies.
Disc 4 "The Lovers"—A special behind-the-scenes disc with commentaries from the development staff.

The booklet, called "Shedding," looks back on the *Metal Gear Solid* trilogy with plenty of art, trivia and interviews. The special Kubrick figure is made exclusively for the set and you cannot get it anywhere else. The entire box set retails for 9,800 yen (about $92).

Biohazard Goods

Riding the tide of the success behind *Biohazard 4* (*Resident Evil 4* in the U.S.), Capcom has released a new batch of *Biohazard* goodies for the hardcore fan. These items are available on Capcom's Japanese online retail site, e-Capcom. *Biohazard Archives* is a 352-page hardcover book detailing everything you've ever wanted to know about each game in the series (except for *Biohazard 4*). The book features artwork, creature stats, producer notes, plot details and all kinds of information dating back to 1996, when the first *Biohazard* game was released in Japan for the PlayStation. The book costs 3,500 yen (about $33). The *Biohazard Sound Chronicle—Best Track Box* is a must-have for any survival horror aficionado. The box set contains six CDs spanning across six *Biohazard* games: *Biohazard* for GameCube (*Resident Evil*), *Biohazard 2* (*Resident Evil 2*), *Biohazard 3: Last Escape* (*Resident Evil 3: Nemesis*), *Biohazard: Code Veronica* (*Resident Evil: Code Veronica*), *Biohazard 0* (*Resident Evil 0*) and *Biohazard 4* (*Resident Evil 4*). Each track was hand-selected by various composers who worked on the games and digitally remastered.

This incredible set costs 8,910 yen (about $83) and can be found at select music stores. For the more fashion-conscious *Biohazard* fan, you can get the *Biohazard* medic khaki outfit for 7,245 yen (about $68). Finally, the *Biohazard* Combat Bag is the real deal with an actual gun holster and machine gun holder. It has tons of secret compartments and pockets that will even confuse airport security! The bag is made of tough nylon material and costs a hefty 20,790 yen (about $195).

TIPS & TRICKS COLLECTOR'S CLOSET

Vol. 44

Are you a video-game packrat? Do you own more video games than you could possibly beat in a whole year, even if you played non-stop? Would you go without food to save up the money to buy a rare TurboGrafx-16 game, an obscure Atari 2600 controller, a limited-edition Game Boy Pocket or a leather *Killer Instinct* jacket? If so, this monthly collectors' column is for you.

CLASSIC GAMING EXPO 2005

The mecca for North American video-game collectors (and readers of *Tips & Tricks' Collector's Closet*) is surely the annual Classic Gaming Expo, now in its eighth year of bringing video game fans, collectors and creators together under one roof. This year's event takes place on August 20 and 21 in the Hyatt Regency Hotel at the San Francisco Airport in Burlingame, California. If CGE 2005 can meet the standards set by previous shows—and we have no doubt that it will—you can expect to see all of the following:

- A hall of exhibitors demonstrating and/or selling all manner of video games and game-related merchandise
- An eye-popping museum jam-packed with rare, unusual and one-of-a-kind games and hardware
- Dozens of classic video-game designers, programmers, artists and industry insiders, many of whom will deliver keynote speeches and answer audience questions (and maybe even sign autographs, if that's your thing)
- A raucous live auction with rare video-game items offered for sale to the highest bidders

- A "swap meet" where attendees can buy, sell and trade games and goodies they've brought to the show themselves
- Dozens of arcade and home video games available for "free play"

Previous shows also included free giveaways, competitions and even live bands playing video-game music. *Tips & Tricks* editors will be in attendance, and representatives of most of the other video-game magazines will probably show up as well, so be sure to say "hi" if you see us walking around.

For more information, visit the official Classic Gaming Expo Web site at www.cgexpo.com. Note that if you pre-register before June 15, you'll save $10 off the price of a two-day admission.

ROOM OF DOOM

Check out the game collection of Daniel Powers Jr. from Middletown, Ohio. Daniel has been a video-game collector for 18 years, and he has the games (over 1,500) and systems (over a dozen) to show for it. While his Room of Doom holds everything from Atari 2600 to Xbox, Daniel's pride and joy is his huge library of games for the Nintendo Entertainment System: It features over 1,100 unique titles, including more than 250 Japanese imports and a near-complete set of North American NES games—he's only missing five U.S. releases!

We invite you to send in your own personal "Room of Doom" photos for display in a future edition of *Tips & Tricks Collector's Closet*. Send two or three photos of your proudly-displayed games to "Room of Doom," c/o *Tips & Tricks*, 8484 Wilshire Blvd., Suite 900, Beverly Hills, CA 90211, and be sure to tell us about the highlights of your collection.

Collecting Michael Jackson Games

Since the O.J. Simpson *murder* trial triggered a brief spike in the value of O.J.-related trading cards, you may be wondering if the recent unpleasantness might cause an increase in the collectability of video games featuring the "King of Pop," Michael Jackson. There hasn't been any noticeable change in the going rates for these titles, but if you'd like to assemble a complete set, here's a recap of Jacko's video-game appearances.

Michael Jackson's Moonwalker

Arcade

Sega brought Michael to the arcades with this three-player isometric-view action game, which was based on the story and setting of his "Smooth Criminal" music video. The dedicated arcade cabinet is tough to find (not to mention transporting and storing it), but the actual game circuitry is entirely contained on a JAMMA-compatible circuit board, so a collector can own and play it with his or her own JAMMA cabinet or "Super Gun" (a type of JAMMA-compatible home system).

Michael Jackson's Moonwalker

Genesis
Sega Master System

The plot in the home versions of *Moonwalker* is similar to that of the arcade game, but the graphics and gameplay are completely different, with a more traditional side view and platform-jumping action. Despite its inferior graphics, the Master System version is slightly more scarce—and therefore slightly more collectable—than the Genesis game.

Scramble Training

Arcade

This laserdisc-based space simulation featured Michael as your flight instructor; he appeared on the cockpit screen to introduce you to the controls and talk you through your mission.

Scramble Training was one of the few interactive programs made for Sega's motion-control AS-1 arcade machine—not an easy thing to collect, as it seats eight people, weighs over a ton and originally sold for tens of thousands of dollars.

Ready 2 Rumble Boxing: Round 2

Dreamcast
PlayStation
PlayStation 2
Nintendo 64
Game Boy Advance

Michael was a secret character in this outrageous boxing game, along with Bill Clinton, his wife Hillary and Shaquille O'Neal. To unlock him, beat the game in Arcade Mode twice, or enter a cheat code from our *Tips & Tricks Codebook*. The designers were so thrilled to have Jacko in the game that they actually included a voice sample of the team exclaiming, "Thanks, Michael!" as the game's credits rolled.

Space Channel 5

Dreamcast
PlayStation 2
Game Boy Advance

Jackson makes a surprise appearance near the end of this music/rhythm adventure from Sega; he's called "Space Michael" in the game. If you save him from the Morolians, he will join Ulala's party as she marches her way to the final boss battle. Note that the Game Boy Advance version has a longer title (*Space Channel 5: Ulala's Cosmic Attack*), but it's basically the same game.

Space Channel 5 Part 2

PlayStation 2

Space Michael returned to Ulala's Swingin' Report Show in this sequel, which was originally released for the Dreamcast and PlayStation 2 in Japan only. The PS2 version eventually appeared in the U.S. as part of a budget-priced two-disc package called *Space Channel 5: Special Edition*, which also included the original *Space Channel 5* game in its entirety.

Other Appearances

- Irem's *Gekisha Boy*, released in Japan for the PC Engine system (a.k.a. Turbo-Grafx-16), was a motherlode of potential copyright infringement lawsuits. You play as a paparazzi who takes photos of crazy happenings; among them unauthorized cameo appearances by pop culture icons like Spider-Man, the Terminator and Michael Jackson, who appears in his white "Smooth Criminal" outfit. Also known as *Photograph Boy*, the game was later released for the PlayStation in Japan under the name *The Cameraman*.

- *Runabout*, a racing game released in Japan for the original PlayStation, features a giant Michael Jackson statue in the Metro City stage; it looks exactly like the figure on the cover of Jackson's *HIStory* album. This statue was altered when the game was released in North America as *Felony 11-79*.

FINAL FANTASY WORLD

Vol. 22

by Charlotte Chen

If you've ever stayed up all night—even though you had an exam to study for, a 50-page term paper to write, a starving goldfish with one fin in the sky and a hundred sundry other responsibilities (like eating or bathing) that you shirked—because you were mesmerized by the glory of a *Final Fantasy* game, this monthly column is for you!

FINAL FANTASY VII Snowboarding

The snowboarding mini-game from *Final Fantasy VII* is now available on mobile phones through V CAST, the wireless broadband service provided by Verizon Wireless. This complete port also includes a new feature: aerial moves. Two modes of play are available, Score Attack and Time Attack. During Score Attack you get points based on technique, speed and the number of balloons collected.

Hanjuku Eiyuu 4: The 7 Hanjuku Eiyuu

Square Enix included a variety of surprising cameo appearances in *Hanjuku Eiyuu 4: The 7 Hanjuku Eiyuu*, a new PlayStation 2 game which is part of a long-running simulation/RPG series in Japan. The title loosely translates to "*Egg Monster Heroes 4: The Seven Egg Monster Heroes.*" This latest installment features a princess with the power to transform into different people, including recognizable heroes from many Square Enix titles: Cloud (from *Final Fantasy VII*), Yuna (*FF X-2*), a Tarutaru (*FF XI*), Fran (*FF XII*) and Lenneth (*Valkyrie Profile, Star Ocean: Till the End of Time.*) According to the official Square Enix Web site in Japan, your character has to be completely maxed out if you want her to transform into Yuna.

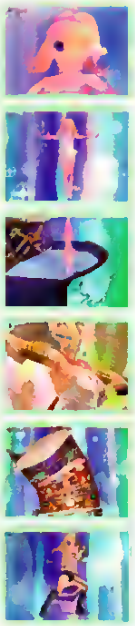

As an added bonus for *Final Fantasy* fans, composer Nobuo Uematsu makes an appearance in the game...and his band, The Black Mages, made the soundtrack! Unfortunately for U S gamers, this title is only available in Japan.

However, we're not completely shut out of the *Egg Monster Heroes* franchise. *Egg Monster Heroes* for the Nintendo DS (already out in Japan) is tentatively scheduled to be released in the U.S. in late May.

FINAL FANTASY VII
ADVENT CHILDREN

Square Enix has finally posted a Web site in English (http://na.square-enix.com/dvd/ff7ac/) for the upcoming *Final Fantasy VII: Advent Children*. At press time, there was nothing on the site except for the same story information that was released earlier and a short trailer.

DIRGE OF CERBERUS FINAL FANTASY VII

A Web site (http://www.square-enix co.jp/games/ps2/dcff7/) for *Final Fantasy VII: Dirge of Cerberus* has been posted as a "teaser" for Japanese audiences. It's a single page with a background picture of Vincent Valentine along with a list of some of the staff members who are working on the game:

Producer: Yoshinori Kitase
Director: Takayoshi Nakazato
Character Designer: Tetsuya Nomura
Art Director: Yukio Nakatani
Art Supervisor: Yuusuke Naora
Main Programmer: Yoshiki Kashitani
Composer: Masashi Hamauzu

Some names should leap out at you, such as character designer Tetsuya Nomura, who also worked on *FF VII*, *Kingdom Hearts* and *Parasite Eve*. Yoshinori Kitase was previously the director for *Final Fantasy X*. The staff line-up looks like an all-star cast; I hope to reveal more information about *Dirge of Cerberus* within the next few issues

FINAL FANTASY XI UPDATE

The latest update to *Final Fantasy XI* includes the new equipment seen here.

MINIATURE CLOUD AND SEPHIROTH

These are just a couple of the items being sold on Square Enix's Japanese website. Aren't they adorable? These designs are based on Tetsuya Nomura's "reimagining" of the *Final Fantasy VII* characters for their appearances in *Kingdom Hearts*. It's too bad that they don't support international orders. When this kind of thing keeps happening, it's enough to make you want to just up and move to Japan.

Kingdom Hearts GBA SP

When *Kingdom Hearts: Chain of Memories* was released in Japan, a special edition Game Boy Advance SP bundle was created to celebrate the occasion. The casing is two-toned (black and silver) and the faceplate has a *Kingdom Hearts* logo. Three keychains featuring the main characters—Sora, Donald and Goofy—were also a part of the package deal. Unfortunately, these were only sold in Japan.

FINAL FANTASY FAN

I have a few questions to ask:

1. What is the most popular Final Fantasy *game Square Enix has ever made?*

2. I was reading about Final Fantasy VII: Advent Children *on the Internet and it said that Cloud gets infected by Geostigma. Does he die? [crying]*

3. I was wondering if you can send me a poster of FF VII: Advent Children *signed by all the people who made the movie (framed and packaged in cardboard).*

—Jason Johnson
Des Moines, IA

P.S. I love Final Fantasy VII.

1. The most popular *Final Fantasy* game Square Enix has ever made is *Final Fantasy VII*.

2. You can't believe everything you read on the Internet. There are rumors that Cloud is infected, but that's all they are—rumors. You'll have to wait until *FF VII: Advent Children* is released to get any real answers, just like the rest of us.

3. No. What do you think this is, Santa's workshop?

—Charlotte

BALDUR'S GATE: DARK ALLIANCE II
Item Duplication Trick
You'll need two controllers for this trick. Pause the game and select the "Change Players" menu, then select a new character (preferably Dorn, since he can carry more). Drop whichever items you want to duplicate and have the second player pick them up. Next, save your game and transfer the items back to your primary character. Enter the "Change Players" menu again and import the second character from the fresh save. That character will have the items that you just dropped as well, so you can sell off any duplicates, have them both equip the same item or break items down at the shop and recover gems. With this trick, you can easily build up your inventory of gems and items by duplicating them and gain massive amounts of gold by selling the duplicate items.
Invincibility/Level Warp
At any time during gameplay, hold **L1** + **R1** + △ + ○ + × + □ and press the **START** button to bring up the cheat menu. You can toggle invincibility on and off and warp to any location in the game from here, even places that you haven't been to previously. You can even warp to levels that you are not supposed to be able to go to, for example, you can go to Zarad's study even when you're not playing as Ysuran.
Level Up Cheat
At any time during gameplay, hold **L1** + **R1** + △ + ○ + × + □ and press the **L2** button. This cheat automatically levels your character up to level 10, gives you 45 Feat points and gives your character 500,000 gold. Be careful when your character passes level 10, since the code will reset all of your character's stats back to level 10.

CHAMPIONS OF NORRATH
Cheat Code
Start a new game. When you have control of your character, press **L1 + R2 +** / **+ R3** (push in the right joystick until you hear it click). As soon as all four buttons are held down, your character will jump to Level 20 with 999 skill points to distribute. You won't get the attribute points (strength, intelligence, dexterity and stamina) that normally go along with each new level, but you will be able to max out a few skills and pump most of the others up, and you'll have enough skill points to max out all of your skills when you reach higher levels (which is something that normally isn't possible).

DDA2: HARDCORE
Infinite Score & Items in Survival Mode
First, start a new game in Survival Mode. When your opponent appears, press the blue **Eject** button on the PlayStation 2 and fight as you normally would. When you defeat the opponent, the time limit will reset to and stay frozen at 40 seconds. Your opponent will lie on the ground, and the next one won't appear! You can continue to attack the fallen opponent by pressing **Up** + △ + . Each time you do this, an item will appear. You can continue obtaining items and points indefinitely. When you're ready to move on to the next opponent, just press the **Eject** button again. You can repeat this process for every single opponent. If you die, the screen will fade to white. It will stay in that state until you press **Eject** again. This trick won't work if you defeat an opponent while "Danger Reach" is in effect.

DOG'S LIFE
Cheat Menu
At any time during gameplay, bark (by pressing □) three times, growl (by holding) three times, then break wind (by pressing **Left, Right, Down**). Now press **SELECT** and you'll find a new option called "Cheats" at the Settings menu. This option allows you to switch dogs, increase the number of bones in your inventory, select any stage and move your dog to any position in the current level at any time.

Money Tree
Search your town for a glowing spot on the ground; you'll find one per day. Dig up the glowing spot with your shovel to find bells. Notice that the hole is still glowing after you remove the bag of money. If you bury some bells in that spot, it may grow into a "money tree" that drops bags of bells like fruit. (The bells won't reappear after a few days the way fruit does.) Try different denominations!
Get the Golden Shovel
Buy an extra shovel from Tom Nook and bury it in the glowing spot (see above) before you leave the acre it's in. If the spot is not too close to a wall, bush or other obstacle, a special golden tree may appear. Within a few days, it may bear fruit in the form of a special golden shovel. The golden shovel can be used to dig up bells from random spots all over your town. You can also use it to find rare items on the island by using the following method. Bury unwanted furniture on the island, then leave the golden shovel there along with various kinds of fruit. Playing on the Game Boy Advance, feed your islander fruit until he or she has a very happy squinting smile, then have the islander dig up the furniture with the golden shovel. He or she will replace the furniture items with rare "island" items or even NES games like *Baseball* or *Wario's Woods*. Now return to the island on the GameCube to retrieve your golden shovel and dig up the rare items the islander buried.
Get the Golden Axe
To get a special golden axe which never breaks, you must maintain what the wishing well considers to be a "perfect" town as determined by the following criteria.
1) Pull all of the weeds in your entire town and pick up all of the trash from the ground.
2) Plant and/or chop down trees until there are between 12 and 14 trees in every acre where it's possible to do so.
3) Plant lots of flowers (flowers can reverse the negative effects of weeds that you may have missed).
Once you've done all this, speak to the wishing well and ask it "How are things?" If it says "Everything is perfect! [Town name] is a very liveable place," you must then maintain the town for two full weeks without any lapses in the "perfect" rating. The next player who visits the wishing well after the 14th day will be given a golden axe by the well spirit. If you get any other message from the wishing well, it's probably because you didn't count the trees correctly. To help you determine which acre each tree is in, pay attention to the invisible borderline that causes the screen to scroll into the next acre when you cross it.

CONFLICT: DESERT STORM II: BACK TO BAGHDAD
Cheat Code
At the main menu, press **Z, Z, Y, Y, X, X, B, B, START, START**. A new "Cheats" option will appear in the Options menu.

CRAZY TAXI
Secret Bicycle
To drive a secret bicycle instead of a cab in Arcade or Original mode, carefully enter the following code at the character-select screen.
Hold **L**, hold **R**, release **L**, release **R**
Hold **R**, hold **L**, release **R**, release **L**
When you lock in your character with the **A** button, you'll hear a bicycle bell to confirm that the code has been entered correctly.
Another Day
Use the following code at the character select screen in Arcade or Original mode. When the character you want to choose is on the screen, press and release **R** once, then hold down **R** and press **A**. You'll see the words "another day" appear in the corner of the screen. In this mode you'll have a different starting point and your customers will be in different locations.
No Arrows
From the "Mode Selection" screen, choose either "Arcade" or "Original." At the next menu, highlight the type of game you would like to play, then hold **R** and press **START**. Continue to hold both buttons until the words "no arrows" appear in the lower left corner of the screen. In this mode, the arrow at the top of the screen will not appear.
No Destination Mark
From the "Mode Selection" screen, choose either "Arcade" or "Original." At the next menu, highlight the type of game you would like to play, then hold **L** and press **START**. Continue to hold both buttons until the words "no destination mark" appear in the lower left corner of the screen. In this mode, your passenger's destination will only be identified by a single green line at ground level, so you won't be able to see it from a distance like you usually can.
Expert Mode
From the "Mode Selection" screen, choose either "Arcade" or "Original." At the next menu, highlight the type of game you would like to play, then hold **L + R** and press **START**. Continue to hold all three buttons until the word "EXPERT" appears in the lower left corner of the screen. This trick combines the effects of the "No Arrows" and "No Destination Mark" codes.
Speedometer
You need a second controller plugged into Port 3 to enter the remaining codes. At any time during a game, hold **R** and press **X** five times using Controller 3. A "mph" indicator will appear next to the Drive/Reverse lights in the corner of the screen. To toggle the speedometer off, just hold **R** and press **X** on Controller 3 again.

Alternate Camera Angles
Use the following button combinations on Controller 3 to change the camera angle at any time during the game.
• Hold R and press Y on Controller 3 to switch to a camera that follows you from a fixed location and moves to various fixed locations as you drive around.
• Hold R and press B on Controller 3 to toggle between two additional camera angles. One is a first-person view through the windshield of your cab and the other is a close-up view of your passenger's face.
• Hold R and press A on Controller 3 to return to the default view.

RESIDENT EVIL
Special Weapon
If you beat the game in Normal Mode in under five hours, you will start with the Samurai Edge Barry Version gun in your inventory when you play again by choosing the "Once Again..." option. The Samurai Edge is similar to the regular Handgun, except it has infinite bullets and fires three rounds consecutively when you pull the trigger.
Infinite Rocket Launcher
If you beat the game in Normal Mode in under three hours, you will start with the Infinite Rocket Launcher in your inventory when you play again by choosing "Once Again..." at the main menu.
Grenade Launcher Trick
(Note: This trick will only work with Jill. Also, it's possible that using this trick will adversely affect the quantities of other items in your inventory, so try this at your own risk.) With the Granada Launcher and at least one spara set of unequipped grenade shalls of any kind in your inventory, equip the Grenade Launcher and find an item box. When you open the item box, immediately select the set of grenade shells in your inventory and place it in the very first slot in the item box. (The first slot of the item box is selected by default when you first opan the box—it usually contains tha First Aid Spray when you start the game or the Closet Kay if you've already cleared tha game once.) Now select the grenade shells occupying the first slot in the item box and combine the shells from the item box directly to your aquipped Grenade Launchar. The number of shells displayed undar tha Granade Launchar will become corrupted. Now exit the item box, Jill will have 240 shells in her Grenade Launchar whan you check her invantory. If you still have unequipped Grenade Launcher ammo in the item box, stay in the item box screen and swap out the grenada shalls again. You'll see the 496 shells back in the item box. Now move the 496 shells from the item box into an empty slot in your inventory and exit out of the item box. You'll still have the spare set of 496 shells—and you'll also have 240 shells in the Grenada Launcher if you pullad them from tha first item spot the sacond time you combined them. If you have more than one set of unequipped shalls, you can keep swapping them out between the first slot of the item box and the equipped Grenade Launcher to creata more shells at any time.

RESIDENT EVIL 2
Unlimited Ammo
Press **START** to pause the game, than choose "Button Config." From the Option menu. When the Controller Setup screen appears, hold the **R** button and press the **Z** button 10 times. If done correctly, you will see the white boxes around the CONFIG and AIM settings turn red.

With the "extra camera angles" code in place, choose "Settings" from the in-game Options menu; two additional camera settings will be available while you're on foot, with six new camera settings while you're in a vehicle. If you choose the "Debug Camera," you can use Controller 2 to set the camera anywhere you wish. The analog stick aims the camera, but if you hold the **Z** button, you can also use it to move the camera's position

Holiday Menu Screens

If you change the date in the GameCube hardware's internal clock to Halloween (October 31), Thanksgiving (the fourth Thursday in November) or Christmas (December 25), the main menu screen will have a special holiday theme with Homer sitting on the couch in a holiday costume

THE SIMS

Cheat Codes

Hold **L + R** at the main menu, then enter any of the following passwords at the cheat entry menu that appears. Note the spaces in some of the codes

FISH EYE—First person perspective. Press the **X** button to toggle it on and off
FREEALL—All items cost §0 Simoleons. This code may cause your game to act buggy. After using it and buying a lot of items, you may want to save and then reset the machine to deactivate the code
MIDAS—Unlocks all skins, items and multiplayer games. After entering the code, start a new "Get a Life" game, then quit to the main menu while in the Dream House
PARTY M—Unlocks "The Motel" multiplayer game. (Note: You can only access this game after unlocking the Bonus Menu by entering the "MIDAS" code)
SIMS—Unlocks the "Play the Sims" mode, which is normally unlocked by playing "Get a Life"

SMUGGLER'S RUN: WARZONES

Cheat Codes

At any time during the game, press **START** to pause, then enter any of the following codes
Enable countermeasures—**Y, Y, X, X, Z, Z**

SPIDER-MAN 2

Cheat Code

At any time during gameplay, pause the game, enter the Save/Load menu and select "New Game." At the "Enter Name to Start New Game" prompt, enter "HCRAYERT" as your name and select "Enter," you'll see the name disappear. Now simply back out of the "Enter Name" screen and unpause: you'll warp directly to Chapter 16 with at least 44.38% of the game completed. This code also gives you 200,000 Hero Points, all four Boss Awards, the Web Zip upgrade and six Speed Swing upgrades. You can also enter the code at the "Enter Name" prompt that appears when you load the game without a save file present. Entering the code repeatedly will allow you to rack up additional Hero Points, they won't count toward the §0.000 you need to finish Chapter 16, and they may not appear in the Hero Points total at your "Status" screen, but they'll be there when you enter a Spidey Store

SPONGEBOB SQUAREPANTS: BATTLE FOR BIKINI BOTTOM

VIEWTIFUL JOE 2
How to Unlock the 36 Chambers
1 Defeat Drill Sergeant Big John in Reel 1, Act IV.
2 In Reel S, Act I, when you're fighting ninjas on the slippery ice on the cliffs (after you've launched up to the cliffs using the remote-controlled platform), finish the scene with at least five hearts.
3 Get killed by the enemies that look like paper bags.
4 Finish any scene with only one heart remaining.
5 Pass Reel 2, Act III.
6 Pass Chamber 1.
7 Collect all the V-Reels from every act in any film.
8 Get a "Game Over" and don't reset.
9 Pass Reel 3, Act I.
10 Pass Chamber 1 and enter a bonus room in Reel 4, Act II. The bonus room is in the house where the switches move the rooms in a clockwise direction. When you place the three objects (teardrop, sword and mirror) into the matching scrolls, a door opens on the right side of the room on the upper right. However, if you hit the switch in this room instead of going through the door, you'll end up on the bottom level, and when you go through the open space on the right, you'll enter a bonus area filled with ninjas.
11 Pass Chamber 2 with at least an "A" rating.
12 Earn a "V" time ranking in five consecutive scenes.
13 Have only one heart left from beginning to end in any scene.
14 Pass Reel 4, Act II.
15 Earn a "Rainbow V" ranking (get a "V" for V-Points, Defense and Time) during the UFO fight in Reel 4, Act I.
16 Finish the last scene in Reel 2, Act I without using any VFX powers.
17 Pass Chamber 8.
18 Pass Chamber 9 and buy the Sliding power-up.
19 Pass the miniboss fight against Big John in Reel 3, Act II with an "A" rank or higher.
20 Pass the kitchen scene in Reel 1, Act III, with a "Rainbow V" ranking.
21 Pass Chambers 3 and 12.
22 Pass Chamber 13.
23 Pass Reel 7, Act III and have more than 200,000 Viewtifuls saved up.
24 Get Joe thrown out of the women's restroom 10 times in a row in Reel 3, Act I.
25 After finishing the scene where you start the gears turning in Reel 3, Act II, don't use any VFX until the next "Just Go For It!" scene starts.
26 Pass Chamber 17 and finish Story Mode.
27 Pass Chamber 18 and buy the Redhot Kick power up.
28 Pass the challenging button scene in Reel 7, Act I where Silvia has to use her Replay VFX, with at least 30 seconds to spare.
29 Collect every V-Reel in Reel S, Act I.
30 Earn a "Rainbow V" in five consecutive scenes. They can span across Acts, so if you get a "Rainbow V" in each of the first four scenes in Reel 1, Act I, you'll still get the chamber to unlock if your first grade in Reel 1, Act II is also a "Rainbow V."
31 Perform the Ukemi 10 times in a row in Reel 7, Act I. When one of the weaker enemies hits you, if you use VFX Zoom in right before your body hits the ground, you'll recover without taking damage.
32 Pass Chamber 23, and also attain an overall rank of "Rainbow V" for any of the scenes during the following acts: Reel 1, Act III, Reel 2, Act III, Reel 3, Act III, Reel 4, Act II, Reel 5, Act III
33 Pass Chamber 24.
34 Pass Reel 1, Act IV without picking up a single V-Reel.
35 Pass Story Mode on Adults difficulty.
36 Pass Chamber 27 and Story Mode.
37. This is a secret chamber that unlocks if you complete Chamber 6, finish the Story Mode and earn an overall rank of "D'oh" in three consecutive scenes. It's harder to earn a "D'oh" than you think, since the game is relatively forgiving when ranking you on defense. Buy up a bunch of "Take 2" power-ups, then play through the first three scenes in Reel 1, Act I. Let the enemies kill you at least one time during each scene and you'll get a "D'oh" for defense. If you want to minimize V-points, don't break anything, and kill enemies with one VFX Zoom In punch. Take as long as you want to pass, getting a "D'oh" time ranking is the easiest part.

GRAND THEFT AUTO: VICE CITY

Secret Cheat Codes

Enter the following cheat codes at any time during the game (but not while paused). Each time you enter a code successfully, a message will appear in the upper left corner of the screen to confirm. Note: Most of the codes cannot be deactivated once you've turned them on, you must reset the Xbox in order to restore the game to normal. **Do not save your game after entering codes**, if you do, the codes may be permanantly activated in your save file. It's a good idea to keep a copy of your save file on a memory card, this way, you'll have a backup in case anything happens to the *GTA: Vice City* save on your Xbox hard drive. Note: Some codes may cause unpredictable results which may cause the game to "crash," especially if you have several codes in effect at once. Codes that modify the appearance or behavior of vehicles or pedestrians will usually not effect those that are already in the immediate vicinity, you'll see the effects when new vehicles or pedestrians appear. The codes that cause vehicles to appear may not work if you're too far from a street or other area where vehicles are allowed to drive.

NINJA GAIDEN

Blue Ninja Costume
Hold **Left Trigger + Right Trigger** when selecting "New Game" from the main menu; this will allow Ryu to keep the blue ninja costume throughout the entire game.
New Costume
After you beat the game, hold down **Left Trigger** when selecting "New Game" from the main menu to use a new costume.
Successive Play
After you beat the game and save your progress, loading that saved game will start a new game in Successive Play mode, which allows you to keep the Golden Scarabs that you have collected the first time through and use them in the new game beginning from Chapter 1.
Hidden Weapon
After you beat the game, the Dark Dragon Blade secret weapon can be found in the Hayabusa Ninja Village storehouse in Chapter 13 during the second time you play through.
Unlock Classic Ninja Gaiden Games
To unlock the classic *Ninja Gaiden* game, collect 50 Golden Scarabs and trade them in at Muramasa's shop.
To unlock *Ninja Gaiden II: The Dark Sword of Chaos*, you must have the original *Ninja Gaiden* in your inventory. In Chapter 4 or later, shoot an arrow at the face of the Clock Tower from the platform above the door that leads to Pleasure Street and Han's Bar. A treasure chest containing *Ninja Gaiden II* will appear on the roof of the building that houses the Clock Tower.
To unlock *Ninja Gaiden III: The Ancient Ship of Doom*, you must have *Ninja Gaiden II* in your inventory. At the Peristyle Passage in the Aquaduct, the *Ninja Gaiden III* disc can be found on top of the pillar that previously held a Golden Scarab.
To play the classic *Ninja Gaiden* games after collecting any of the discs, access the arcade machine on the first floor of Han's Bar in Tairon with the appropriate *Ninja Gaiden* game disc in your inventory. When you finish the game with any of the *Ninja Gaiden* discs in your inventory, a "Classic Ninja Gaiden" option will also be added to the main menu, allowing you to play the classic game(s) you've unlocked at any time.

DO YOU KNOW THE SECRET OF THE MYSTERY CODES?

Tips & Tricks may be the #1 Video-Game Tips Magazine, but even our most skilled cheat finders get stumped every once in a while. The following codes are known to exist in the games shown, but even after extensive testing, we still can't figure out what they do. (In some cases, they may not do anything.) If you can solve the mystery, you might win a prize....

As a service for our readers who may have missed past editions of *Mystery Codes*, this month we'll be featuring the most conspicuous codes from previous issues that still have not been solved. Each of these codes represents an opportunity for you to win a prize if you can figure out what effects it causes. *Can you solve the mystery?*

#1 BATMAN: RISE OF SIN TZU

The Code: Choose "Continue" from the main menu and enter "_ F L Y M _" as your password.

#6 TREASURE PLANET

The Code: At any of the game's menu screens, press **R2, R2, R2, R2, R1, Up, Down, Down, ○, □, □, L2, L2, L2.**

#11 AGGRESSIVE INLINE

The Code: Select "Cheats" from the main menu and enter the following code: **B A K A B A K A**

#22 TIGER WOODS PGA TOUR 2005

The Code: Choose "EA Sports Options & Extras," then select "Password" and enter the following code: **R O A R**

#28 GRETZKY NHL 2005

The Code: Press **START** at the Unlockables menu and enter the following code at the code entry screen: **blue haze**

#31 THE GETAWAY: BLACK MONDAY

The Code: During the video sequence that appears before the main menu, press **□, △, Right, ○, Left, Left.**

#34 SLY 2: BAND OF THIEVES

The Code: Enter the following code at the pause menu: **Left, R1, R1, Down, Down, Left**

MYSTERY CODES SOLVED!

After a drought of several months without any solid leads, our readers finally came through with the solutions to two different Mystery Codes:

• Eric Kwoka of Roseville, California cracked the solution to Mystery Code #14, for *Future Tactics: The Uprising* on the Xbox. Eric determined that pressing **Left Trigger, Left Trigger, Right Trigger, Up, Up, Down, Left** during gameplay will raise your character to Level 20 with a fully-upgraded weapon. However, you don't see the effects until you begin your next turn.

• Tommy Landsman of Baltimore, Maryland figured out Mystery Code #39, for *Grand Theft Auto* on the Game Boy Advance. This was a tricky one; after pressing **Left, Right, Up, Down, L, R** at the main menu and hearing the confirmation sound, you must hold the **START** button down and press **A** to complete the code; it causes a "Pick Level" (stage select) option to appear at the bottom of the main menu. After we received Tommy's letter, we also discovered that you can view the game's credits by pressing **B** at the main menu with the "Pick Level" menu unlocked. Nice work!

Congratulations and big thanks to both winners; your *Tips & Tricks* caps will be arriving in the mail soon.

CRACK THE CODE AND WIN A PRIZE

Think you've got what it takes to beat the *Tips & Tricks* editors at our own game? Test out these codes for yourself; if you're the first person to tell us exactly what they do, we'll send you your very own *Tips & Tricks* cap and print your name right here so all the world will know that you were the one who solved the mystery. No guesses, now---you must describe the difference in the game that results from entering the code so we can verify that your answer is correct. Send your answers to:

Please note that these codes may not have any effect at all; there's a very strong possibility that they were left in the games inadvertently or that their effects were intentionally disabled before the games were released. However, we invite you to prove otherwise.
